

DESIGN YOUR OWN DORM ROOM

Directions: Below is the floor plan for a small 12' x 15' dorm room that sleeps two. For this project you will cut out the furniture on page 3 and place it on the floor plan below to design your own dorm room. Then, on page 2, you will choose bedding, appliances, electronics, decorations, and accessories to complete the look. Beds may be stacked to make bunk beds if you would like more floor space. If you are not going away to college, you may redesign the room you live in now.

DESIGN ELEMENTS

Directions: Go online to find pictures of the items listed in the boxes below. Print pictures (preferably in color) of the items and glue them in the boxes. Total up the cost for the items in each box. At the bottom of the page add up the grand total.

Bedding
