Mark Chassin, M.D.
President

The Joint Commission is an independent, not-for-profit, national body that oversees the safety and quality of health care and other services provided in certified organizations. Information about certified organizations may be provided directly to The Joint Commission at 1-800-994-6610. Information regarding certification and the certification performance of individual organizations can be obtained through The Joint Commission's web site at www.jointcommission.org

August 29, 2011

Bryan V. Lich
President
Perfusion.Com, Inc.
17080 Safety Street -Suite 109
Fort Myers, Florida 33908

Joint Commission ID#: 496306
Certification Activity: Intra-Cycle
Certification Activity Due: 07/01/2011
Program: Health Care Staffing Services
Certification

Dear Mr. Lich:

The Joint Commission would like to thank your organization for participating in the Joint Commission's certification intra-cycle evaluation process. This process is designed to help your organization continuously provide safe, high-quality care, treatment, and services. We encourage you to use the certification intra-cycle evaluation process as a tool for continuous standards compliance and operational improvement.

As a result of the recent intra-cycle evaluation conference call, The Joint Commission is pleased to continue to grant your organization a Passed Certification decision for all services reviewed under the Health Care Staffing Services Certification Manual.

Thank you for your participation and congratulations on your certification award.

Sincerely,

Ann Scott Blouin, RN, Ph.D.
Executive Vice President
Accreditation and Certification Operations

ValleyHealth
Winchester
Medical Center

June 2, 2006

To Whom It May Concern:

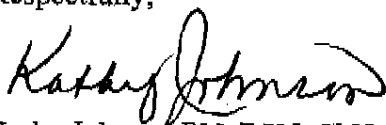

This letter of reference is written for Perfusion.com, Inc. regarding our working relationships and their deliverables at Winchester Medical Center, Winchester, Virginia.

Winchester Medical Center is a regional hospital that provides all services except transplant. The WMC Heart and Vascular Center provides the full range of cardiology diagnostic and interventional services and complete thoracic, cardiovascular and peripheral vascular services.

Eighteen months ago, WMC submitted a Request for Proposal for perfusion services to our current provider plus 6 other regional perfusion companies. We received five replies and conducted four company interviews. It took only a few minutes of interview time with Brian Lich, CCP, and his team to clearly differentiate the level of quality, commitment and progressive perfusion services his company could provide. We selected Perfusion.com as our new perfusion provider and since that time have had our initial impressions confirmed over and over again. Perfusion.com has heightened the quality, not only of perfusion services, but the knowledge and education of the perfusion staff. They have upgraded techniques and made positive improvements in all elements of the services. Probably the one word that best describes this company is integrity. Their mission is to provide safe, efficient, cost effective perfusion care and this is obvious every day.

In conclusion, we are extremely pleased with Perfusion.com as a company and especially with its leadership and outcomes. In my 30 year career in cardiovascular services, this is absolutely the best perfusion company I have contracted with. Please feel free to call me at 540-536-8721 if you have any further questions.

Respectfully,

Kathy Johnson RN, BSN, CNOR
Director of Surgical Services
Winchester Medical Center

Ralph de la Torre,
M.D.
Section Chief,
Cardiac Surgery

February 23, 2006

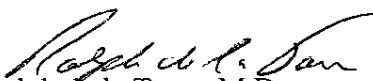

To whom it may concern:

As Section Chief of Cardiac Surgery at Beth Israel Deaconess Medical Center, I am writing this letter on behalf of Perfusion.com and Ms. Iris Chacon. On two separate occasions, our perfusion department was faced with a short-term need for perfusion services. We contacted Perfusion.com and were sent Ms. Iris Chacon to cover until we filled our vacant positions. Ms. Chacon's prior experience and depth of knowledge enabled her to perform extremely well, even during our most challenging cases. I feel we were sent a highly qualified perfusionist. Iris was easily able to adapt to our techniques and seamlessly immersed herself into our challenging operating environment. When we had a need for coverage a second time, I did not hesitate to contact Perfusion.com.

Perfusion.com has been excellent in their coverage and I would recommend their services to any program in need of experienced and highly competent perfusionists. I fully endorse their services and welcome you to contact me with any further questions. .

Julia M. Herron

RE: Bryan Lich

To Whom It May Concern:

This letter is to strongly recommend Bryan Lich and his company, Perfusion.com. I have known Bryan for 10 years and he and his staff have worked with me. They are very reliable and have handled all problems in a very timely and professional manner. He and his staff have always been courteous to all hospital staff and to the cardiac surgeons. They have handled stressful situations very well. It is obvious by their performance in the operating room under various conditions that they are seasoned and experienced perfusionists.

On a personal basis, Bryan has been very instrumental in helping me establish a cardiac surgical program of a public hospital in Santiago in the Dominican Republic. Through his efforts, we have made this program successful. The humanitarian effort on the indigent patients there would not have been possible without his help. He has given up a considerable amount of this personal time in order to make this a successful undertaking. This is solely a goodwill pro bono undertaking.

As a cardiac surgeon that has practiced now for 30 years and has dealt with many individuals in the hospital setting, I can wholeheartedly recommend his organization without any reservations.

If I may be of any further assistance, please do not hesitate to contact me.

Very truly yours,

Robert D. Pascotto, M.D., F.A.C.S.

June 2, 2005

To Whom It May Concern:

I was pleased when Bryan Lich asked if I would submit a letter of reference for Perfusion.com.

I have worked with Perfusion.com for two years securing Perfusion coverage for our health system. During that time, I have found them to be extremely knowledgeable about their staff, attentive to our coverage needs, accommodating as well as finding the best possible perfusionists to work in our department. Whenever I've needed assistance – I am contacted by Mr. Lich almost immediately and any issues and/or concerns are rectified immediately. You always know who you will be talking to on the other end of the line – not so with other companies.

They have proven to me, without a doubt, to be a leader in their field – one that truly cares about the service they provide.

If I can be of further assistance, please feel free to contact me at 701-780-5119 or at msovoboda@altru.org.

Sincerely,

A handwritten signature in black ink that reads "Msovoboda".

Poplar Bluff, MO 63901-3396
October 5, 2005

To Whom It May Concern:

This letter is an endorsement of the excellence of perfusion services provided by Perfusion.com and its highly-trained staff. As a recent arrival to Poplar Bluff Regional, I was made to feel at ease by Perfusion.Com's flawless and smooth performance. Their experience provides predictability in their reading of my mannerisms as well as the direction of the case. Experienced perfusionists are also well-suited to the occasional high-risk and stressful cases we perform. All of their staff has at least 10 years of perfusion experience. I highly recommend Perfusion.Com and know that any surgeon would feel comfortable having them on their team.

Sincerely,

Stanley Ziomek, M.D.

FAXED

To Whom It May Concern:

I am writing this letter on behalf of Perfusion.Com. Perfusion.Com has been providing perfusion services for our hospital since October of 2003. As chief cardiovascular surgeon of Southeast Medical Center, I feel very comfortable in having their staff working with our demanding four surgeon program. Their experienced staff provides a high level of service and accountability. We especially like the way they are able to provide support for VAD on short notice. In this way, our staff is not strained and is able to perform their normal responsibilities. I highly recommend Perfusion.Com for demanding programs which need experienced perfusionists during difficult cases. If you have any questions, please feel free to call me.

Sincerely,

Randy Brown, M.D.

Beth Israel Deaconess Medical Center
Boston, MA

February 8, 2006

To Whom It May Concern:

My name is Brian R.O'Connor and I am the Chief, Perfusion Services at Boston's Beth Israel Deaconess Medical Center, a major teaching hospital of Harvard Medical School. I have been Chief at the Medical Center for 27 years, and in that time have seen many perfusionists come and go. Over the past two years we have employed the services of Perfusion.com to provide additional coverage for our service. Our caseload is comprised of extremely complex procedures, from minimally invasive valve surgery to complex reconstructions of the aorta and vascular tree. Perfusion.com has been expeditious and professional in supplying us with highly trained and competent coverage. In particular, Iris Chacon has provided the bulk of that coverage. She is articulate, accomplished and very professional. More importantly she has been adaptable and personable and transitioned beautifully into a demanding environment. She has spent nearly seven months with us over the last two years. If I could hire her away, I would! I can say without reservation or hesitation, should you need short or long term staffing support, Perfusion.com would be my first recommendation.

Please feel free to contact me with any questions that you might have.

Kindly,

Brian R. O'Connor, CCP
Chief, Perfusion Services
Beth Israel Deaconess Medical Center
Boston, MA

Thad Bruhn

Rapid City Regional Hospital

353 Fairmont Boulevard

Rapid City, SD 57701

April 2, 2004

To Whom It may concern:

In 2003, our hospital contracted Bryan Lich through Perfusion.com for Perfusion coverage. Bryan Lich, president of Perfusion.com, sent Iris Chacon. Iris worked with me for 3.5 months due to unexpected resignation of two employees. Iris is very hard working and easy to get along with the staff and the surgeons. Iris adapted well and quickly to our setup and policies. Iris is very knowledgeable and willing to learn. Iris would be a great asset to any perfusion group for coverage or long-term employment.

Bryan Lich was a great resource to help me out when I need perfusion coverage. I felt that Bryan went the extra mile to place the right perfusionist with me to fit the needs of the hospital. I highly recommend and would not hesitate in using Perfusion.com for perfusion coverage again. Please feel free to contact me at (605) 719-2288 if you have any questions.

Sincerely,

Thad Bruhn-CCP

Sarah Yarcusko, CCP
BVRHC
145 W. Wallace St
Findlay, OH 45840

To Whom It May Concern:

This letter is to highly recommend Bryan Lich and Perfusion.com. Their quick, efficient and reliable service has been invaluable to our new cardiac program. Since we opened in November, we have had to call on Perfusion.com several times on short notice to provide coverage for our hospital in different situations. Bryan has gone above and beyond to see that we have always had the staff that we needed to keep things up and running here.

Bryan's staff has always been punctual and courteous. They are knowledgeable and have adapted easily to our system. Specifically, during the first two weeks in which our program was open, Karen Irvine was at our institution. Her input and assistance during the two weeks that she was here was invaluable to me personally. It was a great comfort and help to have her as a "last check" to look over the department that I had built.

I would recommend without reservation Bryan and his staff for any contract perfusion needs.

Sincerely,

Sarah B. Yarcusko, CCP

February 17, 2006

To Whom It May Concern:

I would like to comment on the excellent service we have received from the perfusion group at Perfusion.com. In 2005, Iris Chacon CCP provided five months of service to our cardiac surgery department here at Beth Israel Deaconess Medical Center. She is also completing an additional two months with us now.

Iris has excellent skills as an experienced perfusionist. She communicates well and has outstanding abilities to adapt to multiple surgeons and handle complex cases. She is well-versed in cardiovascular physiology and techniques of cardiopulmonary bypass. I worked with her daily in the OR for both of her stays with us, and she was a vital part of our team.

I would recommend her services and those of her company. Please contact me if you have questions.

Sincerely,

A handwritten signature in cursive script that reads "Naomi Teperow".

Mr. Bryan Lich, CCP
President and CEO, Perfusion.Com

Dear Mr. Lich:

I am writing you to express my thanks for the support Perfusion.com has provided the Cardiac Surgical Unit. In particular the excellent work of Tunisia Ellis deserves comment. What a relief it was to know you would be able to provide Tunisia again to fill in as a staff perfusionist. In the brief time she had helped in April, Tunisia became a trusted and valuable member of our team. Her help this June and July has confirmed our first impressions of Tunisia's exceptional perfusionist skills and her delightful personality.

Please know that Tunisia Ellis has represented Perfusion.com in a thoroughly professional manner. She is a tireless worker totally dedicated to providing high quality, broad based perfusionist expertise. With great enthusiasm she quickly learned our set-ups and techniques. Her conduct on bypass is one of steady focus, with the stamina to maintain consistency throughout difficult and challenging cases.

In addition to Tunisia's clinical expertise, her upbeat personality adds to her value. Tunisia is a team player willing to help out wherever and whenever she is needed. I strongly endorse Tunisia. Ellis. She will be a welcome addition to any cardiac team. We look forward to the next time we use the services of Tunisia Ellis and Perfusion.com.

Sincerely yours,

Kevin J. Cotter, CCP, LP

Head of Cardiovascular Surgery
Skaggs Community Health Center
North Business 65 & Skaggs Road
Branson, MO 65616
(417) 336-9728
September 28, 2005

To Whom It May Concern:

I am writing today on behalf of Perfusion.com. For many months, our hospital has contracted Perfusion.com to provide temporary perfusion services due a short-term need in our operating room. Perfusion.com was immediately able to provide experienced and licensed perfusionists to fill our need. Iris Chacon and Steve Bator, both with over 10 years of experience, were able to perform well in a completely new environment. Working with a new surgical team takes time to perfect, yet Perfusion.com's staff is accustomed to new and challenging work. I feel very comfortable with their clinical abilities in my operating room and I know our hospital is very pleased with their administrative procedures. I highly recommend Perfusion.com. Thank You.

Sincerely,

Paul Robison, M.D.

President, Perfusion.Com
17080 Safety St., Suite 109
Fort Meyers, FL 33908

Dear Mr. Lich,

I would like to commend you and Mr. Ty Walker on the perfusion services now being provided by your company at St. Francis Hospital in Columbus, Georgia.

Mr. Walker has assembled a very pleasant and competent staff to compliment the numerous upgrades in equipment and techniques implemented over the past year. He has educated all of the players on the heart team (surgeons, anesthesia, nurses, lab and ICU personnel) either by handouts, meetings or both to get everyone on the same page with what he is doing which ultimately benefits the patient.

Almost unknowingly, we have all become a TEAM with the same goal which is why I wanted to take this opportunity to thank you and Ty for helping St. Francis do what we advertise, "We care for life".

Sincerely,

Bill Bence, AA-C
Director, SFH Anesthesia

Fort Meyers, FL 33908

Bryan,

As you know, before Ty Walker arrived on the scene as our Director of Perfusion and Blood Management, the perfusion department of St. Francis was essentially "dead in the water" as far as direction and progress in technology. Since Ty, Joe Sleep, Keith Cote, and Andria Peters arrived, there has been a big difference in the way we communicate, work together, and strive for better patient outcomes.

I have been a Perfusionist for most of my life and I have known Ty Walker for many years, but I never really came to appreciate his passion and ability to "Gel" a program together. Over the past seven months, Ty has brought all of the "players" on the Heart team together and implemented many methods plus new technology that have resulted in a tremendous improvement in patient care and outcomes.

As a member of the Heart Team here at St. Francis, I am very happy and proud that Ty and his team from Perfusion.Com have come onboard and made some very positive changes to our program.

RE: ORTIZ, JOHNNY

To Whom It May Concern:

This is to inform you that I had the privilege of working with Mr. Johnny Ortiz who was a temporary perfusionist at Maine Medical Center. He is a gentleman who has come to us as a temporary perfusionist, who over the last six months has done very well at our facility. He appeared to be highly motivated with great communication skills and quickly became acclimated with the staff. He certainly was able to work professionally and independently. He collaborated well with all staff members including the OR staff, anesthesiologists and the surgeons.

I really enjoyed working with him. He seemed to be highly committed and professional and was experienced in many aspects of cardiopulmonary bypass. I particularly enjoyed his infectious enthusiasm demonstrated at the time that we started rewarming in each case, it became a personal trademark in the operating room and we will miss him. I wish we could talk him into stopping his traveling and spending some more time with us.

I can highly recommend him as a perfusionist. Again, he was professional, highly qualified, a great problem solver and it is a difficult position to come into a group for a short period of time but he gained people's confidence readily and did very well.

I would be glad to discuss any questions you may have in the future.

Sincerely,

Reed Quinn, M.D.

I am writing this letter in full support of the services with Perfusion.com.

Approximately one year ago, we transitioned from a perfusion service that was owned and operated by our practice to Perfusion.com. Our results and satisfaction with overall level of care and service our patients receive has increased dramatically.

Most significantly has been blood management resources that have been implemented. Specifically, the introduction of thromboelastogram and CardioPAT systems to our operating room for blood management has significantly reduced our transfusion rate. With this has also come decreased morbidity, decreased time on the ventilator and less renal failure.

Again, I write this letter in full support and express my overall satisfaction with Perfusion.com with the most significant improvements being our blood management therapies. I would highly recommend this service to any surgeon or cardiac surgery program.

Sincerely,

Jeffrey A. Travis, M.D.

To Whom It May Concern:

I am writing today on behalf of Perfusion.com. Our hospital, Winchester Medical Center, has been using Perfusion.com since December 2005. Winchester Medical Center is a regional hospital that provides all adult services except transplantation. The WMC heart and vascular center provides the full range of cardiology, diagnostic and intervention services and complete thoracic cardiovascular and peripheral vascular services.

I have been completely satisfied with their professionalism, clinical and administrative services, and everything from the billing process to their highly experienced staff. We have awarded them a second long-term contract based on their performance. Possibly, the word that best describes this company is "integrity". Their input and recommendations are based solely on evidenced-based practice guidelines and not financial gain, and it is clear to our surgical team that patient safety is their first priority.

In conclusion, we are very pleased with Perfusion.com, especially with their leadership and outcomes. I highly recommend them. Please feel free to contact me at 540-536-4573 if you have any further questions.

Sincerely,

Phillip E. Webb, RN, MSN, CNOR
Director, Surgical Services
Winchester Medical Center

April 21, 2010

To Whom It May Concern:

I am writing this letter in full support of Perfusion.com.

It is a pleasure to work with each of the members of the perfusion team. Each member is very knowledgeable and professional. The perfusion team works well with the Operating Room Associates. With Ty's diligence we have been able to make improvements to our blood management systems and overall patient outcomes by reducing the need for transfusions.

Ty and the perfusion staff are knowledgeable and easy to work with. Ty makes informed decisions and has excellent communication skills.

I would highly recommend Perfusion.Com services to other facilities and programs.

Sincerely,

A handwritten signature in cursive script that reads "Nancy Daughety".

July 22, 2010

To Whom It May Concern:

I am writing a letter as managing partner of Gulf Coast Cardiothoracic Surgeons in support of our contract perfusion service, Perfusion.com, Inc.

Our surgical group includes ten surgeons and provides cardiac surgery and vascular services to three area hospitals, performing about 1400 cardiac procedures annually as well as many more complex vascular procedures.

Since November of 2006, Perfusion.com has been the perfusion service provider at two of these facilities, and I have worked with many of their current staff since 1990. During this time span, I have been completely satisfied with their performance in the operating room, and I have enjoyed an excellent working relationship with their perfusionists and management team. Our surgeons' clinical needs are always dealt with promptly and professionally.

One important item worth noting is that Perfusion.com has brought a renewed energy to the perfusion team. They are constantly undertaking practice improvement projects and have made a concerted effort to engage our surgeons by regularly sharing evidenced-based literature. They have also recently become certified by the Joint Commission, which is an impressive achievement.

In conclusion, our group is pleased with Perfusion.com, especially with their leadership and energy. I highly recommend them. Please feel free to contact me at (239) 939-1767 if you have any further questions.

Respectively,

Brian W. Hummel, M.D.

July 23, 2010

This letter is in support of the program and services provided by Ty Walker and Perfusion.com regarding TEG testing and Blood Management at St. Francis Hospital. As the Laboratory Administrative Director I had given up much hope of decreasing blood utilization and spiraling costs of blood products, until Mr. Walker was able to coordinate the establishment of a new Blood Utilization Committee as part of a new blood management program.

Since the implementation of the Blood Management program, Blood Utilization Committee, and TEG (thromboelastograph) testing, we have seen a dramatic decrease in our blood product utilization and expense (\$335,000 in the first 6 months of this year).

From our Laboratory and Blood Bank perspective I highly recommend Perfusion.com for any facility wishing to improve its blood management program.

Sincerely,

Kenneth M. Cole, MS, MT (ASCP)
Director, Laboratory Services

To whom it may concern:

July 23, 2010

I have worked closely with Perfusion.com over the last 5 years. It has been my pleasure to interact with the company from top to bottom. Bryan Lich and Iris Chacon have always been available and responsive, even answering e mails and phone calls within hours. In times of need they have even come in person. The four perfusionists hired by the group have been outstanding, melding with our team and enriching our program. We have made significant advances in technology (MPS, platelet gel) and refined our blood management program to excel into the 99th% in STS for take-backs for bleeding. Education and evidence-based applications are stressed by Perfusion.com. They even have a monthly Blood Management Newsletter. Coverage during vacations has been seamless as well.

Efficient and safe perfusion services have always been stressed. I highly recommend Perfusion.com without reservations.

Please call if you have any further questions,

I am the Point of Care Coordinator of NCH Healthcare Systems Hospital. I am writing this letter on behalf of Perfusion.com, the contracting agency for the Perfusionists team at NCH Healthcare Systems Hospital. I have worked with the Perfusionists for a number of years; they have always displayed great professional ethics and performance. Evidence of their work is documented through our Quality Assurance Program by their participation in annual review of skills, quality control, maintaining analyzers, proficiency testing and communicating the needs of the Unit.

Please feel free to contact me if you have any questions. Thank you

August 1st, 2011

To whom it may concern,

This letter of reference is written to strongly recommend Perfusion.Com, Inc., and their autotransfusion services at Gulf Coast Medical Center provided by Bryan Lich and his staff.

They have provided quality service for our group at the old Southwest Regional facility and in the new Gulf Coast OR suites since they opened in March of 2009. Their experienced staff; Billy Dennard and Peter Zuck, provide us a high level of competent service and accountability. They are reliable and easy to work with, and provide a knowledgeable and professional adjunct to our vascular surgery with their blood salvage and cell saver services, as well as platelet rich plasma sequestration.

Perfusion.Com has been superb in their autotransfusion and PRP service, and I would recommend them highly to anyone in need of competent and experienced services.

Sincerely,

Michael Novotney, M.D., F.A.C.S.

To whom it may concern,

This letter is to endorse the excellent service provided us by Perfusion.Com. Their experienced staff consistently offers highly trained, competent coverage for our more difficult cases requiring blood salvage and platelet gel therapy. Their certified technicians are friendly, helpful, and reliable. In particular, Billy Dennard has been available to us at a moment's notice, is very knowledgeable, and communicates well with the entire OR staff.

We have used Perfusion.Com's autotransfusion and platelet rich plasma sequestration since we have begun working here at Gulf Coast Medical Center, are very pleased with them, and would recommend them without hesitation.

Sincerely,

To whom it may concern,

I'm writing this letter on behalf of Perfusion.Com, Inc. They have been providing quality autotransfusion service here at Gulf Coast Medical Center ever since the opening of the new facility. Their able staff, and specifically Billy Dennard, PBMT, are all highly qualified, competent, and courteous. As well as comprehensive autotransfusion service they also provide us with the latest in platelet rich plasma therapy. Perfusion.Com gives us professional, dedicated, experienced individuals who help us achieve the maximum in blood conservation for our patients. I can recommend their services without reservation, and would be happy to have you contact me if you have any questions.

Sincerely,

August 25, 2011

To Whom It May Concern;

I am writing in reference to Brian Litch and his company, Perfusion.com, which provides perfusion and blood salvaging services at GCH. I have been an attending cardiac anesthesiologist for over 24 years in Fort Myers servicing both the Southwest Florida Regional Medical Center and most recently the Gulf Coast Medical Center. During the past 5 - 6 years I have worked with Brian Litch and his employed personnel including Billy Dennard and Peter Zuck. We have performed many cases during this time requiring cardiopulmonary bypass for coronary bypass grafting as well as more complex procedures such as coronary bypass procedures coupled with double valve replacements, ascending and arch aneurysm repairs with total circulatory arrest, and ventricular remodeling as well as blood salvaging for spinal fusions, AAA repairs and other major intra-abdominal procedures. He and his team members have always been very diligent, judicious and vigilant in their perfusion and cell saving techniques and protocols. We have never had serious or critical outcomes related to inadequate cardiopulmonary perfusion or management of salvaged blood. In addition, communication with Brian and his team members has been outstanding and highly professional. He maintains a high level of integrity and has demonstrated a strong sense of commitment and reliability.

From a clinical perspective I can highly recommend Brian Litch and his services. He has performed on a clinical and professional level that I would consider outstanding. Please consider him favorably in your choice for management of perfusion services.

Sincerely,

Bernard M Shucavage, MD
Chairman, Dept of Anesthesia

To Whom It May Concern:

This is a letter of recommendation for Perfusion.com. Our practice has utilized the services of this company for many years for perfusion services. They communicate well and are always approachable and available. Each member of this company is a highly trained certified technician and provides integral service to our patients. If our patients did not have the services of Perfusion.com available to them, they most likely would require more blood transfusions in the immediate postoperative period. I recommend Perfusion.com without reservation.

Sincerely,

Gary J. Correnti, M.D.

August 22, 2011

To Whom It May Concern:

As a neurosurgeon who performs a significant number of complex spinal operations, and cranial operations that require and benefit from Cell Saver harvesting of blood lost during surgery, it is imperative that cell saver harvest technology be available to minimize the risk of surgical blood loss. The company that has provided these services over the last decade, going back to Southwest Florida Region Medical Center and currently at Gulf Coast Medical Center, is PERFUSION.COM headed by Mr. William Dennard, PBMT who is the blood management technologist for this company, who has been instrumental in providing these excellent services. The Cell Saver technology provided by Mr. Dennard and his staff has been outstanding in decreasing the need for surgical blood loss transfusions and the utilization of banked blood. While no studies have been performed that I know of, I do know that in the complex lumbar fusions, the diligent and sterile harvesting of blood loss has significantly decreased my utilization of packed red blood cells compared to previous years when a less diligent cell saver service was utilized. The PERFUSION.COM staff is very professional, reliable, and technically superior to any other similar service with which I have had experience. It would be in the best interest of patients, the hospital and the surgeons that provide surgical services at Gulf Coast Medical Center, which includes the vascular surgery team as well, to continue utilizing this company and their services. Undoubtedly, patient outcomes have been improved by their diligent work.

Sincerely,

Jaime A. Alvarez, M.D.

AMERICAN SOCIETY OF EXTRACORPOREAL TECHNOLOGY

February 1, 2008

Bryan V. Lich
17080 Safety St, Suite 108
Fort Myers, Florida 33908

Dear Bryan,

On behalf of AmSECT's Achievement Recognition Committee and the Board of Directors, I am pleased to announce that you have been nominated by your peers for consideration as AmSECT's 2008 Award of Excellence recipient.

The Award of Excellence is presented annually to a perfusionist who demonstrates that work of excellence which best exemplifies creativity and intellectual honesty in perfusion. The award is presented in any area such as education, continuing education, research, publication or leadership. Individuals are nominated by the AmSECT membership and selected by the Board of Directors. The award consists of a plaque and a check in the amount of \$1,000. The Award of Excellence is sponsored by Wood Insurance.

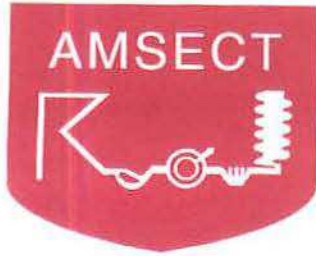

The recipient of the Award of Excellence will be announced at AmSECT's 46th International Conference during the Awards Ceremony beginning at 10:00 am on Saturday, April 12, 2008 at the Hilton Walt Disney World Resort in Orlando, Florida. Conference and hotel information can be found at www.amsect.org. If you are selected as the recipient for 2008, you will be contacted in advance and asked to prepare a brief acknowledgement of acceptance.

It is indeed an honor to be recognized as an outstanding professional from among a membership of over 2,000 perfusionists, and you have our heartfelt congratulations. Your excellence in extracorporeal technology activities is a shining example to us all.

Best wishes,

Alfred H. Stammers, MSA, CCP
President

February 21, 2007

Bryan V. Lich
17080 Safety Street, Suite 108
Fort Myers, Florida 33908

Dear Bryan,

On behalf of AmSECT's Achievement Recognition Committee and the Board of Directors, I am pleased to announce that you have received from your peers a nomination for AmSECT's 2007 Perfusionist of the Year.

The Perfusionist of the Year Award is presented annually to a perfusionist making significant contributions to the field of extracorporeal technology. Individuals are nominated by the AmSECT membership and selected by the Board of Directors. The award consists of a plaque and a check in the amount of \$1,000. The Perfusionist of the Year Award is sponsored by Medtronic, Inc.

The recipient of Perfusionist of the Year will be announced at AmSECT's 45th International Conference during the Awards Ceremony beginning at 7:00 pm on Friday, April 27, 2007 at the Omni Hotel at CNN Center in Atlanta, Georgia. Conference and hotel information can be found at www.amsect.org.

It is indeed an honor to be recognized as an outstanding professional from among a membership of over 2,000 perfusionists, and you have our heartfelt congratulations. Your excellence in extracorporeal technology activities is a shining example to us all.

Best wishes,

Susan Englert, RN, BSN, CCP
1635 Bower Drive
Wichita, KS 67230

Dear Susan:

On behalf of AmSECT's Board of Directors and the Achievement Recognition Committee I am pleased to announce that you have been selected to receive the 2008 Perfusionist of the Year Award. This is one of the highest honors given in the field of perfusion, to individuals who have made outstanding contributions to extracorporeal circulation. I can think of none more deserving of this award than yourself to receive this honor.

The award will be formally presented on the morning of April 12, 2008. We ask that you give a 5 to 7 minute during this time following the granting of the award.

Again, congratulations on being 2008 recipient. Well deserved Susan!

My best always,

Al

January 9, 2009

Bryan V. Lich, CCP
17080 Safety Street, Suite 108
Fort Myers, Florida 33908

Dear Bryan,

On behalf of AmSECT's Board of Directors, I am pleased to announce that **you have been selected to receive the award for AmSECT Perfusionist of the Year 2009**. This is one of the highest honors in the field of Perfusion, presented only to those individuals making significant contributions to the field of extracorporeal technology. The award consists of a plaque and an honorarium in the amount of \$1,000.

Perfusionist of the Year 2009 will be formally presented on Saturday, March 14, 2009 as part of the National Awards Ceremony at the Grand Hyatt, San Antonio, Texas, in conjunction with AmSECT's 47th International Conference. Perfusionist of the Year recipients are asked to give a five to ten minute presentation highlighting their achievements or contributions to the field.

Congratulations on having been selected as Perfusionist of the Year 2009. Please contact Donna Pendarvis at AmSECT National Headquarters, donna@amsect.org, with questions or for more information. I look forward to presenting you with this distinction at the ceremony.

My best always,

Carla R. Maul, LP, CCP, PBMT

Bryan V. Lich CPBMT CCP
17080 Safety St, Suite 109
Fort Myers, FL 33908

Dear Bryan,

On behalf of AmSECT's Achievement Recognition Committee and the Board of Directors, I am pleased to announce that you have been nominated by your peers for consideration as the recipient of AmSECT's 2012 Award of Excellence. Nominees will be published in the January/February issue of *AmSECT Today*, and the National Awards will be presented this March at AmSECT's 50th International Conference in Orlando, Florida.

The Award of Excellence is presented annually to a perfusionist who demonstrates that work of excellence which best exemplifies creativity and intellectual honesty in perfusion. The award is presented in any area such as education, research, publication or leadership. Individuals are nominated by the AmSECT membership and the recipient is then selected by the Board of Directors.

The selection process for 2012 has concluded, resulting in the selection of one of your fellow nominees as this year's award winner. Although another member has been selected for this year, this in no way diminishes your excellence in extracorporeal technology activities as a shining example to us all. It is indeed an honor to be recognized as an outstanding professional from among a membership of over 2,000 perfusionists, and you have our heartfelt congratulations.

Warm regards,

Susan J. Englert RN CNOR PBMT CCP
President
