3. Shopfitters Company Rankings

3.1 Introduction to the Rankings

The following section ranks the companies identified in the previous chapter by various key financial indicators. It should be noted that each company will have varying degrees of activity within this sector and will include an element of variation in terms of product and service portfolio.

Where possible, we have used the financial information reported by each company. However, for small and medium sized companies reporting obligations are less strict and these companies are not obliged to disclose turnover, profit before tax and other information such as number of employees etc. Where this data does not exist, MTW have provided an estimate based on previous performance, industry averages, other financial indicators and background knowledge of the industry.

Whilst we endeavour to attain high levels of accuracy, it should be borne in mind, therefore, that the rankings and other information provided within this report may contain an element of estimation.
