# 7TH ANNUAL PEDIATRIC SYMPOSIUM

OBJECTIVE:

The 7<sup>th</sup> Annual Pediatric Symposium is an educational event designed to provide the healthcare professional with valuable information on the latest trends, treatments and modalities in the care of children and adolescents.

1. Review the patho-physiology of the pediatric burn victim.Highlight the differences between the adult and pediatric burn patient. Review the operative techniques in the burned child.
2. Review the basics of pediatric resuscitation. Define what makes up a good team during pediatric codes. Review the current literature and discuss the aftermath, where we can improve.
3. Define what methamphetamines are and how they are being abused by children and teens. Discuss how methamphetamines are produced. Name commonly used street drugs and “Games Kids Play”
4. Describe how criminals use internet technology to victimize others. Discuss the dangers of online predators.
5. Report what teens are being taught by law enforcement.
6. Review patho-physiology associated with traumatic brain injuries and secondary insults. Identify treatment for closed head injuries. Discuss closed head injury rehabilitation.Discuss the effects of concussion and repeated concussions.
7. Define autism spectrum disorder and sensory processing disorder. Describe the behaviors and characteristics of individuals with autism. Provide an overview of the treatment for children with autism.
