Investment strategy of the Scheme

The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instrument and investors. The aim of the Investment Manager will be to allocate the assets of the Scheme between various money market and fixed income securities with the objective of achieving optimal returns with a highly liquid portfolio. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets.

The Fund has put in place detailed Investment manual defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. All investment decisions are recorded by the fund manager.

Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment manual is made by the IMC and is duly informed to the board. The performance of the fund will be monitored against its peer group in the industry and presented and reviewed at every Board meeting.

Currently no AMFI - recognised benchmark is available for strict comparison for the Scheme. However Crisil Short Term Bond Fund Index being a widely used benchmark in the market, the same has been selected as a standard benchmark for the purpose of this Scheme.

The AMC may approach rating agencies such as CRISIL, ICRA, etc for ratings of the scheme.

The scheme shall mature on September 25, 2014. If the maturity date falls on a non-business day, the maturity date shall be the next business day.

- Financial statement analysis
 - Balance sheet analysis (Debt equity ratios, Networth, etc)
 - Profit & Loss statement analysis (Interest coverage ratios, ROA, Gross and net margins)
 - Cash flow analysis.
- Qualitative analysis by meeting the key officials of the company on a periodic basis to get a better understanding.

The scheme shall invest in various securities/ instruments as mentioned below with the ratings mentioned against the type of instrument.

As per the regulations, the scheme is allowed to invest within a range of 5% of the intended allocation (floor and cap) against each sub asset class/credit rating. The indicative allocation is as follows :

Instruments	Rating							
	AAA	AA	A	BBB	A1+	A2	Unrated	Not Applicable
CD's	-	-	-	-	40-45%	-	-	-
CP's	-	-	-	-	25-30%	-	-	-
NCD's	-	25-30%	-	-	-	-	-	-

- The Fund manager shall reserve the right to improve the portfolio credit quality by deviating the asset allocation in favour of higher credit rated instruments in the same category of instruments at the time of launch of the scheme.
- All investment shall be made based on the rating prevalent at the time of investment. However, in case of an instrument having dual ratings, the most conservative publically available rating would be considered.
- In the event of any deviations from the floor and ceiling of credit ratings specified for any instrument, the same shall be rebalanced within 30 days from the date of said deviation. Such changes in the investment pattern will be for a short term and for defensive consideration and the intention being at all times to seek to protect the interest of unitholders.
- In case of non availability and taking into account the risk reward analysis of NCDs and CPs the scheme may invest in Treasury bills, Cash Management Bills CBLO or bank CDs of highest credit rating i.e. A1+. 	<p>There shall not be any deviations in the intended allocation and actual allocation post NFO other than the scenario envisaged in 3 & 4 above due to unavailability of securities with the desired credit quality.</p>							
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>Price-Risk or Interest-Rate Risk: Fixed income securities such as Bank CD run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.</p> <p>Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.</p> <p>Basis Risk (Interest - rate movement): Basis risk in finance is the risk associated with imperfect hedging. It could arise because of difference in performance of both the asset classes (e.g., long 5 year bond at 9% and pay 5 year OIS at 7.00%, giving spot spread of 200 bps, this spread may increase or decrease in future depending upon market conditions as both these asset classes may not move in identical manner).</p> <p>Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favorably leading to fluctuation in the NAV.</p> <p>Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.</p> <p>Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.</p> <p>Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the scheme information document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. Similarly, unrated securities may be comparatively more risky than rated securities.</p> <p>Quality Risk: This is the risk of investing in unsustainable/weak companies.</p> <p>Price/timing risk: This is the risk of Risk of buying the bonds at lower yields compared to fair value due to timing of purchases. Being a close-ended fund, the portfolio is built at the same time and investors are exposed to timing risks.</p> <p>Listing related risks : Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV. Trading in Units of the respective Plan(s) on the Exchange may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the respective Plan(s) is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the respective Plan(s) will continue to be met or will remain unchanged. Any changes in trading regulations by the Stock Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV. The Units of the respective Plan(s) may trade above or below their NAV. The NAV of the respective Plan(s) will fluctuate with changes in the market value of Plan's holdings. The trading prices of Units of the respective Plan(s) will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the respective Plan(s). The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund on the maturity date will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control.</p> <p>The market price of the Units of the respective Plan(s), like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the Unit (or NAV), and (2) demand and supply of Units in the market. Sizeable demand or supply of the Units in the Exchange may lead to market price of the Units to quote at premium or discount to NAV. As the Units allotted under respective Plan(s) of the Scheme will be listed on the Exchange, the Mutual Fund shall not provide for redemption / repurchase of Units prior to maturity date of the scheme.</p>							
Risk management strategies	<p>The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.</p> <p>The Fund has identified following risks of investing in bonds and designed risk management strategies, which are embedded in the investment process to manage such risks.</p> <table border="1"> <thead> <tr> <th>Risk & Description specific to the Schemes</th> <th>Risk mitigants / management strategy</th> </tr> </thead> <tbody> <tr> <td>Quality/ Credit risk</td> <td>Stringent credit evaluation process to ensure high quality portfolio</td> </tr> <tr> <td>Price/timing risk</td> <td>The purchases can be spread over a shorter time frame to ensure the impact is minimized.</td> </tr> </tbody> </table>		Risk & Description specific to the Schemes	Risk mitigants / management strategy	Quality/ Credit risk	Stringent credit evaluation process to ensure high quality portfolio	Price/timing risk	The purchases can be spread over a shorter time frame to ensure the impact is minimized.
