

**COM110 Fall 2015
Assignment 2 Grading Form**

Student Name:

Days late:

Grading TA/instructor:

Assignments in our class are graded on two general criteria: functionality and style.

A. Functionality and User Interface.

Program has a clear purpose:	/15
Computations are correct (given goal of program):	/25
Program is novel (does not just reuse code/ideas already used in class or labs or reading):	/10
Program describes its purpose to the user and has a pleasing presentation:	/8
User-friendly user input (the user doesn't have to guess what format his/her input should be in, etc.):	/6
Nicely presented output:	/8
Other subtractions (buggy behavior, lateness, etc.):	
Bonus for extra creativity:	
Criteria A total (out of 72):	

B. Coding Style.

Code is structured, clean, organized and efficient:	/14
A main function is defined, and also called at end of module:	/2
Comments both at the top (including name, date and description) and in body of code:	/8
Variables have descriptive names:	/4
Style total (out of 28):	

General feedback:

Assignment 2 total (i.e., total of A + B, out of 100):
