

California Advanced Homes Program

Letter of Interest

Dear CAHP team,

I would like to participate in the California Advanced Homes Program ("Program") with Pacific Gas and Electric for the _____ (Project name) project located in _____ (Project city). This project will be built by _____ (Builder or custom homeowner name), and will have a total of _____ (Number of lots) lot(s). I understand that the Program is a statewide, residential new construction energy-efficiency program, funded by utility customers through the Public Purpose Programs surcharge. I am interested in improving the energy efficiency of my project using financial incentives, design assistance, and marketing support available through the Program.

I agree to provide all required Program application documents and items within 90 calendar days of this letter of intent submittal. I am willing to consider efficiency recommendations that may improve the performance of my project significantly beyond Title 24 requirements. I am aware that my Title 24 documentation must be prepared by a Certified Energy Plans Examiner or Certified Energy Analyst, and that I am responsible for hiring a HERS rater to perform the energy efficiency verifications. Additionally, I agree to provide energy model revisions within 10 business days of receiving the plan reviewer's revision requests.

I understand that if I fully comply with the Program timelines stated above, my project will be eligible to begin HERS testing and/or installing sheetrock and drywall on the date this letter of interest is received by the Program implementer. Further, I understand that if I do not comply with the Program timelines stated above, my project eligibility date will be revised to the date the Program plan review process is complete. I acknowledge that this letter of interest is not a guarantee of project eligibility, and that notice of project eligibility must come directly from the Program implementer. Further, I am aware that any lots that have HERS testing, or that have drywall and/or sheetrock installed prior to the project eligibility date will not be eligible to receive Program incentives.

I understand that participation in the Program is voluntary, and that I am under no obligation to modify the design or construction of my project based on the resulting recommendations. I also understand that I will receive financial incentives only if I complete an agreement; that my eligibility is established by the utility, the performance of my project meets the Program requirements, and the energy-efficiency measures are installed and verified.
