### **SECTION VII. TECHNICAL SPECIFICATIONS**

#### General Specifications:

1. Placing Limitations: Asphalt mixtures shall not be placed when the weather or surface conditions are such that the material cannot be handled properly, finished or compacted. The surface upon which asphalt mixtures are to be placed shall be reasonably free of standing water at the time such materials are spread.
2. Conditioning of Existing Surface: When the condition of the existing pavement or base is broken or irregular, it shall be brought to uniform grade as directed. Contact surfaces of curbing, gutters, manholes and other structures projecting into or abutting the pavement shall be painted with a coating of bituminous material prior to the asphalt mix being placed against them.
3. Priming the Existing Surface: When an existing surface exists, a tack coat shall be applied between the existing surface and the asphalt paving mixture. Asphalt Emulsion (tack) shall be applied ahead of the paving operation, and sufficient time allowed to secure a tacky residue for maximum adhesion of the paving mix to the base.

## IFB 10-01 ASPHALT REPAIR AND REMARKING

4. Spreading and Finishing: A mechanical paver shall be used to distribute asphalt. Areas which prohibit the practical use of mechanical spreading and finishing equipment shall be installed using hand tools, however, special care shall be taken to obtain the required thickness, compaction and surface smoothness. All necessary corrections to surface irregularities shall be performed prior to compaction. The finished pavement shall be uniform and smooth. The placement of asphalt paving shall be as continuous as possible and shall be scheduled such that the interruption occurring does not detrimentally affect the partially completed work. Material shall not be delivered to site which cannot be spread and finished in daylight.

5. Compaction: Immediately after asphalt mix has been spread and surface irregularities corrected, it shall be thoroughly and uniformly compacted by rolling. The surface shall be rolled when the mixture is in the proper condition and when rolling does not cause undue displacement, cracking or shoving. The number, weight and type of rollers furnished shall be sufficient to obtain the required compaction.

### Execution:

1. Patch Roadways/Parking Areas: Contractor shall excavate defective asphalt to depth as specified by the Director of Public Works, or her designee, to obtain sub grade elevation. All dirt and debris resulting from excavation shall be removed from site. Apply tack coat to existing asphalt edges and install hot asphalt (SM-9.5D or BM-25.0) or as directed by Director of Public Works or VDOT specifications) mix at thickness directed by the Director of Public Works, or her designee, on existing compacted subgrade. Asphalt shall be rolled smooth on grade.

2. Resurface/Overlay Roadways and Parking Areas: Contractor shall hammer out an asphalt heel at starting and termination points of overlay and at points where asphalt abuts concrete work. Surface to be overlaid shall be broom cleaned and treated with a tack coat to insure proper bonding. Contractor shall install hot asphalt (SM-9.5D or BM-25.0 or as directed) mix at 2" thickness over existing asphalt surface with mechanical paver. New asphalt shall be rolled smooth on grade and all joints shall be sealed.

## IFB 10-01 ASPHALT REPAIR AND REMARKING

  - b. Asphalt mix shall conform to the requirements of VDOT bituminous concrete mixture Type SM-95D or BM25.0 in accordance with VDOT, Road and Bridge Specifications, Section 211 (December 2001) or as amended.
2. Aggregate Subbase:
  - a. Subbase material shall consist of compacted crushed gravel or stone, free of soil, clay or other admixtures.
  - b. Subbase material shall conform to the requirements of Graded Aggregate Size 21A in accordance with VDOT, Road and Bridge Specifications, Section 208 (December 2001) or as amended.
3. Tack Coat: Tack coat material shall be used to treat existing asphalt pavement prior to the installation of a new asphalt surface.

Asphalt for tack coat shall be CRS-1, CRS-2, CRS-1h or CSS-1h and conform to the requirements of Section 210 in accordance with VDOT, Road and Bridge Specifications, Section 310 (December 2001) or as amended.

Equipment:

1. Hauling Equipment: Trucks used for hauling bituminous mixtures shall have tight, clean, smooth metal bodies equipped with a positive locking metal tailgate. Metal surfaces which are to be placed in contact with asphalt mixtures shall be given a thin coat of aliphatic hydrocarbon invert emulsion type release agents (non-puddling), lime solution or other material on the VDOT list of approved release agents to prevent the mixture from adhering thereto. Except where non-puddling type release agent is used, the beds of dump type trucks shall be raised to remove excess agent prior to loading. Only non-puddling type agent shall be used in truck beds which do not dump. Each truck shall be covered with a tarpaulin or other suitable cover which shall protect the mixture from moisture and foreign matter and prevent the rapid loss of heat during transportation.
2. When necessary to maintain the specified temperature until discharge at the job site, truck bodies shall be insulated and covers securely fastened.

## **IFB 10-01 ASPHALT REPAIR AND REMARKING**

3. Asphalt Pavers: Asphalt pavers shall be of an approved design, self-contained, power-propelled units, provided with an activated screed to strike-off assembly, heated if necessary, and capable of spreading and finishing courses of asphalt concrete in the specified thickness.

The paver shall be equipped with a receiving hopper having sufficient capacity to provide a uniform spreading operation. The hopper shall be equipped with a distribution system to place the mixture uniformly in front of the screed.

The screed or strike-off assembly shall effectively produce a finished surface of the required evenness and texture without tearing, shoving or grouping the mixture. The screed shall be adjustable at each end and equipped with a device which shall indicate its horizontal position.

Pavers shall be equipped with mechanical devices, such as equalizing runners, straightedge runners, even arms or other compensating devices to adjust to grade so that minor changes in elevation shall not be immediately reflected in the finished surface and shall also confine the edges of the mixture to true lines.

Pavers shall be operated at forward speeds consistent with satisfactory laying and compaction of the mixture.

4. Rollers: Rollers shall be of the steel-wheel, static or vibratory and/or pneumatic-tire type and shall be in good operation condition, capable of reversing without backlash, and shall be operated at speeds slow enough to avoid displacement of the mixture. The number and weight of rollers shall be sufficient to compact the mixture to the required density while it is still in a workable condition. The use of equipment, which results in excessive crushing of the aggregate or the marring of the pavement surface, shall not be permitted.

If, during construction, it is found that the equipment being used mars the surface to the extent that the imperfections cannot satisfactorily be corrected or produces permanent blemishes, the use of such equipment shall be discontinued and replaced with satisfactory units.

### 5. Traffic Markings

- (a) Description: This work shall involve the re-installation of traffic markings disturbed by construction. All traffic markings shall be Thermoplastic (Class I) and installed in accordance with the Manual On Uniform Traffic Control Devices and in accordance with Section 704, Virginia Department of Transportation, Road and Bridge Specifications, 2001 version and subsequent revisions. Certain crosswalks may be designated to contain either diagonal or longitudinal lines within the crosswalk. Diagonal markings shall be 12" in width. Longitudinal markings shall be 24" in width.

Lane arrow markings and STOP AHEAD letters shall be Thermoplastic and constructed and installed in accordance with the Manual On Uniform Traffic Control Devices and in accordance with Section 704, Virginia Department of Transportation, Road and Bridge Specifications, 2001 version and subsequent revisions.

The contractor shall provide cones spaced adequately on the traffic markings to preclude tracking of the paint by vehicles.

- (b) Clean Up: The contractor shall be responsible for removal of all paints, solvents, and other chemicals used in the traffic marking operation. Cleaning of equipment shall not be allowed on public streets and only in areas so designated by the Town of Vienna.

If a bid/proposal is mailed in an envelope, not identified as specified, the bidder/offeror takes the risk that the envelope may be inadvertently opened and the information compromised which may cause the bid/proposal to be disqualified. The Town reserves the right to declare such a bid/proposal as non-responsive. Bids/proposals may be hand delivered to the designated location.
4. **LATE BIDS/PROPOSALS:** LATE bids/proposals will be returned to bidder/offeror UNOPENED, if the IFB/RFP number and return address is shown on the envelope.

After bid opening, no changes in bid prices or other provisions of bids prejudicial to the interest of the Town or fair competition shall be permitted. Except as otherwise provided by regulation, all decisions to permit the correction or withdrawal of bids, or to cancel awards or contracts based on bid mistakes, shall be supported by a written determination made by the Purchasing Agent. No bid may be withdrawn when the result would be to award the contract on another bid of the same bidder or of another bidder in which the ownership of the withdrawing bidder is more than five percent (5%). If a bid is withdrawn, the lowest remaining bid shall be deemed to be the low bid. If the Purchasing Agent, the Using Department, or a designee of such, denies the withdrawal of a bid, he shall notify the bidder in writing stating his decision.
9. **TAXES:** The Town of Vienna is exempt from the payment of federal excise or state sales taxes on all tangible, personal property for its use or consumption except taxes paid on materials that will be installed by the bidder and become a part of real property.  
  
If a bidder is bidding on materials that require installation by the bidder and become a part of real property, the applicable taxes shall be included in the lump sum bid price for the installation of the material and not as a separate charge for taxes. The taxes shall be an obligation of the successful bidder and not of the Town, and the Town shall be held harmless for same by the successful bidder.

10. **USE OF BRAND NAME OR EQUAL:**

- article desired. Any article which the Town of Vienna, in its sole discretion, determines to be equal to that specified, considering quality, workmanship, economy of operation, and suitability for the purpose intended, shall be accepted.
- b) The bidder/offeror is responsible to clearly and specifically indicate the product being offered and to provide sufficient descriptive literature, catalogs and technical details to enable the Town of Vienna to determine if the product offered meets the requirements of the solicitation. This is required even if offering the exact brand, make or manufacturer specified. Normally in competitive sealed bidding only the information furnished with the bid will be considered in the evaluation. Failure to furnish adequate data for evaluation purposes may result in declaring a bid non-responsive. Unless the bidder/offeror clearly indicates in its bid/proposal that the product offered is an "EQUAL" product, such bid/proposal will be considered to offer the brand name product referenced in the solicitation.
  - c) It shall be understood that the burden of proof for an "equal" product shall be and remain the sole responsibility of the bidder. The Town's decision of approval or disapproval of a proposed alternate shall be final. Nothing herein is intended to exclude any responsible bidder, its product or service or in any way restrain or restrict competition.

  13. **DELIVERY:** Bids must show number of days required to place material in using agency's receiving area under normal conditions. Proposal must show the number of days required to provide the services/reports as specified.  
  
Failure to state delivery time obligates bidder/offeror to complete delivery in fourteen (14) calendar days or as specified. A five (5) day difference in delivery promise may break a tie bid. An unrealistically short or long delivery promise may cause a bid/offer to be disregarded. Consistent failure to meet delivery promise without valid reason may cause removal from bid list. Delivery shall be made during normal working hours, 8:00 am to 4:30 pm Monday through Friday, unless prior approval for another time period has been obtained from Consignee.
  14. **DEFAULT:** In case of failure to deliver goods/services in accordance with the contractual terms and conditions, the Town of Vienna, Virginia, after due oral or written notice, may procure them from other sources and hold the defaulting Contractor responsible for any resulting additional purchase and administrative costs. This remedy shall be in addition to any other remedies which the Town of Vienna may have.
15. **TOWN'S RIGHT TO TERMINATE THE CONTRACT:** The Contract may be terminated by the Town for any one of the following reasons:
    - a) If the successful bidder should be adjudged bankrupt, or make a general assignment for the benefit of its creditors, or if a receiver should be appointed on account of the successful bidder's insolvency, or if the successful bidder should persistently or repeatedly refuse or should fail, except in cases for which extension of time is provided, to deliver the goods or services within the time specified, or if the bidder otherwise defaults, then the Town may without prejudice to any other right or remedy, and after giving the successful bidder seven (7) calendar days written notice, terminate the employment of the successful bidder and procure such goods or services from other sources. In such event, the successful bidder shall be liable to the Town for any additional cost occasioned by such failure or other default.
    - b) In such cases, the successful bidder shall not be entitled to receive any further payment if the expense of finishing the contract requirements, including compensation for additional managerial and administrative services shall exceed the unpaid balance of the contract price, the successful bidder shall pay the difference to the Town.
    - c) If the successful bidder should fail to make prompt payment to Subcontractor(s) for material or labor, persistently disregards laws, ordinances or the instruction of the Town, or otherwise be in substantial violation of any provisions of the Contract;
    - d) Failure of the Contractor to promptly make good any defects in materials or work or any defects of any other nature, the correction of which has been directed in writing by the Town;
    - e) Substantial evidence of collusion for the purpose of illegally procuring a contract or perpetrating fraud on the Town in the construction of work under contract.
    - f) Prior to termination of the Contract, the successful bidder and his Surety shall be notified in writing by the Town of the condition which makes termination of contract imminent. Ten (10) days after this notice is given, if a satisfactory effort has not been made by the successful bidder or his Surety to correct the conditions, the Town may declare the Contract terminated and notify the successful bidder and his Surety accordingly.
    - g) Upon receipt of notice of contract termination, the successful bidder shall immediately discontinue all operations. The Town may then proceed with the work in any lawful manner that they may elect until the project is final and complete.
    - h) The Town reserves the right to take possession of the premises and of all materials, tools and appliances thereon and finish the work by whatever method is deemed expedient. In such case, the successful bidder shall not be entitled to receive any further payment. If the expense of finishing the work, including compensation for additional managerial and administrative services, shall exceed the unpaid balance of the contract price, the successful bidder shall pay the difference to the Town. The expense incurred by the Town as herein provided, and the damaged incurred through the Contractor's default, shall be certified by the Town.

  - c) If the proposed addendum is acceptable to the Town, the Town may award a contract within funds available to the lowest responsible bidder based upon the bid as amended by the addendum.
