

One-Touch Workflows for Healthcare

With Canon Workflow Composer, you can transform labor intense, manual workflows into custom, one-touch buttons.

This enables you to improve productivity while completing tasks in an accurate, repeatable, and consistent fashion.

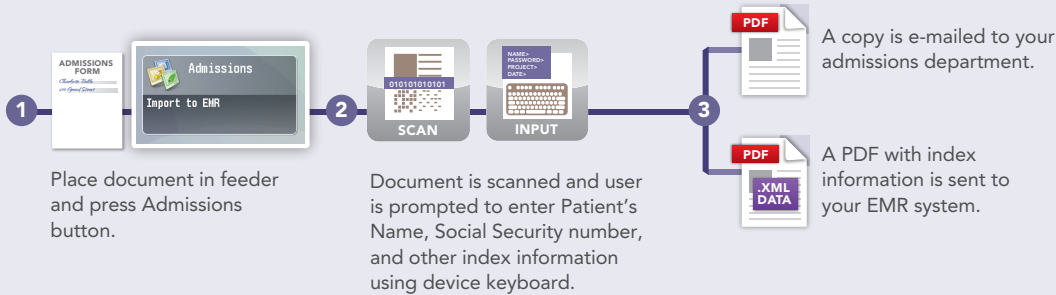

It's easy to streamline common workflows including patient admission and discharge, sending lab requests and permissions, printing out common forms, and much more. Whatever your unique document workflows are, you can now save time by executing them with a single touch.

You can create Workflow Composer and Quick Menu buttons that support common healthcare workflows or customize them to execute tasks unique to your organization.

Automate Admissions Processes

Admissions

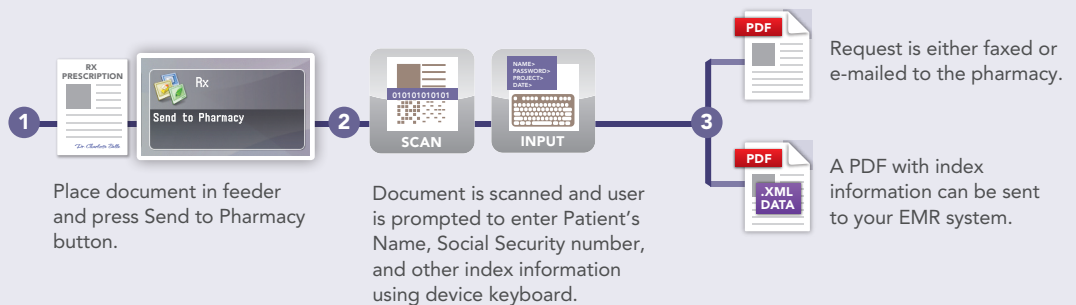

Simplify multistep admissions tasks with custom Workflow Composer buttons.

You can quickly scan documents, add index information like patient's name, and send them to your EMR for easy search and retrieval later.

Send Prescriptions Accurately

Pharmacy

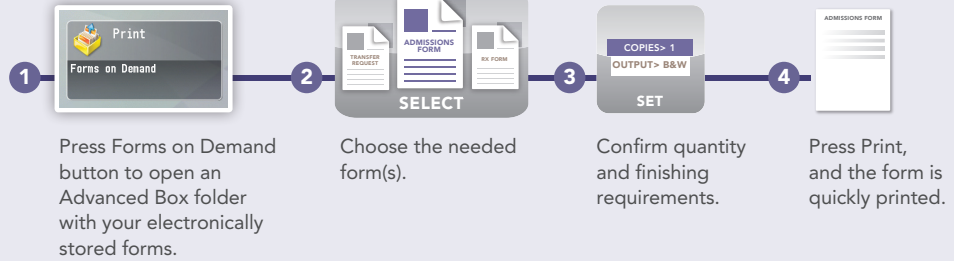

Now you can send prescriptions to the right pharmacy every time. You can also integrate copies of them into your EMR system to ensure accurate record-keeping.

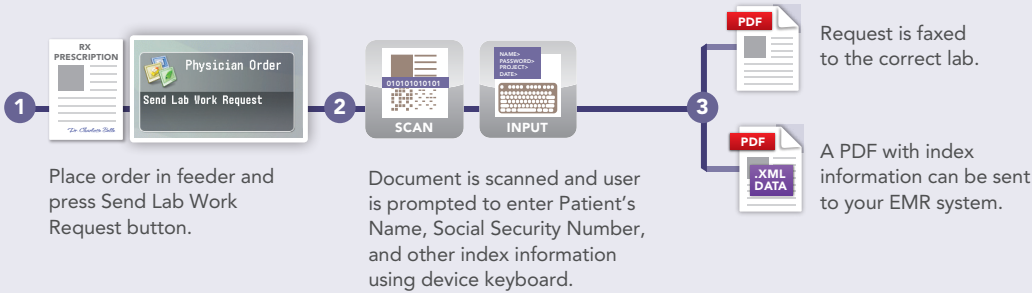

Forms on Demand

Save time and space by printing admissions, transfer, discharge, and other forms from the Advanced Box storage space of any networked imageRUNNER ADVANCE device.

Access Forms Whenever You Need Them

Expedite Work Orders

Lab Work

Submit orders quickly and accurately to internal and external labs while simultaneously entering a record of the request into your EMR. At the same time, you can avoid HIPAA violations by always sending orders to the right addresses.

Additional One-Touch Productivity Workflows

Workflow Composer and Quick Menu buttons enable you to perform common device operations quickly and easily, while helping to reduce errors.

Send Documents to Microsoft® Office SharePoint Server

Do you often scan and send documents to Microsoft Office SharePoint Server (MOSS)? You can now have a single button available to complete tasks like this.

Preset Copy Buttons

If you want to cut costs, you can easily set up and make available a Quick Menu button that outputs only black-and-white, two-sided copies. You can also create buttons that facilitate advanced finishing settings such as stapling, folding, or booklet creation.

Take Advantage of Expert Advice

Workflow Composer buttons can be created by you and your staff in-house, but for more complex processes you have the option to call in our experts. Your Canon Authorized Dealer or Canon Professional Services can assist you if you have more unique processes that may require additional customization.
