Standard MINISIS Application

MINISIS INC

Training on the Standard MINISIS Application/MINISIS for Windows

*MINISIS Inc. has received requests for a training course on the SMA. This course is a 5 day long course and reviews the key components of the SMA required to set up, configure, create, and modify databases. The point of this form is to solicit trainees preferred dates and location. We will take your feedback for the preferred date and locations and then make the final decision for the time and place and number of courses to be offered. The first course we are trying to schedule within July 2013 and somewhere in Canada. We will follow up with the most widely acceptable dates and places. To be clear, signing up now does **not** commit you nor your organisation to the training. We just need to know how many and preferred locations.*
