**ASSOCIATE DEGREE NURSING  
CRITERIA FOR NURSING CARE PLAN  
NURS 100**

**Criteria:** Must achieve at least 80% of total possible points to receive a passing score. Failure to receive a minimum of 80% on a second care plan will result in a course grade of "F".

Nursing Diagnosis: \_\_\_\_\_

| Points Possible |  | Points Achieved | Comments   |
|-----------------|--|-----------------|--|
| 1               | Erickson is completed  |                 |  |
| 1               | Maslow is completed  |                 |  |
| 5               | Pathophysiology/Clinical Prep packet completed. Including medication sheet   |                 |  |
| 15              | Fully and accurately completed assigned areas of the nursing history and assessment/Narrative history and assessment summary   |                 |  |
| 0               | All nursing diagnoses are identified   |                 |  |
| 0               | All nursing diagnoses are prioritized  |                 |  |
| 0               | Diagnostic test data is included. Complete and accurate evaluation of data   |                 |  |
| 20              | Patient diagnostic statement is accurately derived from assessment data; etiology correctly reflects the cause of the diagnostic statement and signs & symptoms are correctly identified (if applicable) |                 | This is the portion of the grading sheet used for the assessment |
| 5               | Patients desired outcome is derived from the diagnostic statement  |                 |  |
| 5               | Outcome is measurable & realistic in relation to the patients current and potential resources and capabilities   |                 |  |
| 5               | Outcome includes a realistic time frame for attainment   |                 |  |
| 15              | Plan of care includes nursing interventions based on the diagnostic statement and the desired outcome  |                 |  |
| 3               | An intervention is included that monitors the patients response to the implemented nursing interventions (Doenges, p 118)  |                 |  |
| 10              | Interventions include the qualifiers of who, what, how amount, time and/or frequency   |                 |  |
| 5               | The action verb describing the nurse's intervention focuses on the nurse's behavior, not the patients  |                 |  |
| 10              | Rationale included for a selected nursing intervention thoroughly explains the reason for selection and the desired effect of implementation. Source & page # included.                                  |                 |  |
| 0               | Evaluation includes the patients progress toward desired outcome attainment  |                 |  |
