# Features and Fixes for SRS EHR v9.6.029 (Teal)

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | Enhanced Feature | Charge Passage | Charge Passage will now include HCPCS codes, modifiers and units. |
| - | Enhanced Feature | CPOE | Default Future Order Attributes in Order Entry, Favorite Completed Order List and Orders Admin PowerTab to create default future orders. |
| - | Enhanced Feature | CQM Report | Includes CQM updates for 2015 PQRS and MU reporting. |
| - | Enhanced Feature | Reports | Provides the ability to export the Referral Aging Report to a CSV file. |
| 10979 | Unexpected Behavior | CPOE | Manual lab results entered into SRS now follow the Provider Routing rules and properly display the message. |
| 10411 | Unexpected Behavior | EDS | Users will now be able to access the EDS server even if the connection to SRSAPPSVR is lost. |
| 11359 | Unexpected Behavior | Labs | Lab results will no longer display the entire requisition in red if only one value is abnormal. |
| 11110 | Unexpected Behavior | Reports | Imaging Results measure on the Meaningful Use 2 Report Card will now increment the numerator when manually matching a file to a radiology order via Scan Place. |
| 11503 | Unexpected Behavior | Reports | Imaging Results measure on the Meaningful Use 2 Report Card will now increase the numerator for results received via a bi-directional PACS interface. |
| 11283 | Unexpected Behavior | Reports | Optimized performance for the Referral Aging report. It no longer freezes or crashes the SRS EHR. |
| 11288 | Unexpected Behavior | SRS Portal | A Communicator message will no longer fail on the third response within the same message thread. |

# Features and Fixes for SRS EHR v9.5.520 Cloud

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| 11412 | Unexpected Behavior | eRx / Med History | Medication History requests will now process successfully if a patient has a hyphen present in their 9-digit zip code. |
| 11197 | Unexpected Behavior | eRx / Med History | Medication History requests will no longer fail when a patient has either the ARGS or ARGSDIR pharmacy benefit management company (PBM). |
| 11486 | Unexpected Behavior | eRx / Med History | Medication History requests will no longer display an error message for patients with an inactive PBM and successfully process the request. |
| 11492 | Unexpected Behavior | eRx / Med History | Medication History requests will now process successfully if the patient's PBM data has no start or end date. |

**Version 9 Cheat Sheet**

## Features and Fixes for SRS EHR v9.5.519 (Jupiter)

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | New Feature | Messaging | Emdeon lab results messages now give you the option of having one message per requisition or one message per test ordered. This can be configured for each individual lab for which the practice is receiving results. |
| - | Enhanced Feature | Charge Passage | When submitting a billing file, we have prioritized E&M codes to be ordered first in the PM system, followed by CPT codes. |
| 11290 | Unexpected Behavior | General | Introduced a Workstation Property within the Admin Console to address a race condition when switching too quickly within specific modules that sporadically caused gray lines throughout the application and required the user to re-login to SRS EHR. |
| 11332 | Unexpected Behavior | Messaging | Unmatched results previously had messages closed when matched to a patient/order with no forwarded message. Now, when unmatched results are matched to a patient/order, a message is sent to the appropriate person/pool as if the results had come in as matched according to the routing rules defined for that interface. |
| 11289 | Unexpected Behavior | Printing | The second and subsequent print jobs now print without errors. |

## Features and Fixes for SRS EHR v9.5.025 (Marsala)

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | New Feature | Charge Passage | SRS Integration with PM systems allowing for Outbound HL7; including the following message types: SIU, ADT, and DFT. |
| - | New Feature | CPOE | Certification for LabCorp interface via Emdeon. |
| 10982 | Enhanced Feature | Advanced Reporting | Added E-mail and Phone Number filters in the Advanced Reporting Module within the Demographics tab. |
| 10346 | Unexpected Behavior | Advanced Reporting | The Advanced Reporting Module Reminders filters are now working as expected when running a patient-reminder report. |
| 10440 | Unexpected Behavior | Communicator | Users can now select the Ask Me Later option after clicking on What Is This on a pending chart without causing a login failure. |
| 10848 | Unexpected Behavior | Communicator | Using the Chrome browser no longer results in a loop when using SRS Communicator. |
| 10933 | Unexpected Behavior | Communicator | Logging in after previous log off from SRS Communicator while using Chrome or Firefox is now permitted. |
| 11275 | Unexpected Behavior | Integration | Optimized Integration processing bandwidth and corrected error handling for HL7 files missing insurance fields. |
| 10891 | Unexpected Behavior | MU Reports | Users can now export the Drilldown Report after running the MU Report Card. |
| 10892 | Unexpected Behavior | MU Reports | Imaging Results excludes "Performed, Results Not Required" and "Performed with Adverse Event" from the numerator in the MU Reports. |

**Version 9 Cheat Sheet**
http://srssoft.com/cheatsheet

## Features and Fixes for SRS EHR v9.5.025 (Marsala) (continued)

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| 10932 | Unexpected Behavior | MU Reports | The Encounter Filter Dates within the CQM Report are now working as expected. |
| 10934 | Unexpected Behavior | MU Reports | Stratification calculations for CMS 155 have been corrected. |
| 10961 | Unexpected Behavior | Performance | Optimized SQL Server query that minimizes CPU utilization on the SQL Server, commonly known as the Primary SRS Server. |
| 10862 | Unexpected Behavior | Printing | User permissions no longer randomly change when users print from SRS EHR. |
| 10785 | Unexpected Behavior | Rx | Nightly automatic retrieval of the patients' Medication History for next day encounters now processes after the 10.6 Surescripts Pipeline update. Additionally, users no longer require a unique NPI in order to request patient Medication History. |
| 10981 | Unexpected Behavior | Rx | Corrected missing NDCs from the Rx Drug Database that affected clients on the 10.6 Surescripts Pipeline. |

## Features and Fixes for SRS EHR v9.4.019 (Olive)

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | New Feature | eRx / EPCS | Electronic Prescribing of Controlled Substances (EPCS) for NY State only. |
| 10353 | Unexpected Behavior | Aged Message Report | Users can sign off on Secure messages sent from a Communicator portal account to SRS EHR. |
| 10738 | Unexpected Behavior | AMC Report | Not Performed Statuses are no longer included in the numerator for the AMC Image Results measure. |
| 10695 | Unexpected Behavior | Communicator | Patients using the SRS Communicator portal can now respond to a non-provider-initiated secure message. |
| 10696 | Unexpected Behavior | Communicator | The Communicator temporary password now prints out the correct encounter location or the practice default contained in the SRS EHR Admin Module. |
| 10724 | Unexpected Behavior | CPOE | Special instructions are no longer truncating after 250 characters. |
| 10892 | Unexpected Behavior | CPOE | Radiology Orders without valid results are correctly calculated and not included in the Imaging Results Menu Measure. |
| 10776 | Unexpected Behavior | Direct | Unmatched Direct Messages no longer results in an error message when attempting to match to a patient chart. |
| 10723 | Unexpected Behavior | Document Management | Printing no longer randomly overwrites/removes a user's SRS printing permissions. |
| 10725 | Unexpected Behavior | Dx App | Corrected the ICD10 drilldown options font from being too light in the Diagnosis Web Application. |
| 10721 | Unexpected Behavior | EDS | Users can now proceed with login to an Emergency Document Server if the Primary SRS Server is unavailable. |
| 10688 | Unexpected Behavior | Emdeon Labs | Unmatched Emdeon lab results do not receive an error message when attempting to match to a patient chart. |

**Version 9 Cheat Sheet**

http://srssoft.com/cheatsheet

## Features and Fixes for SRS EHR v9.4.019 (Olive) (continued)

| TTID | Type | Functional Area | Summary |
|------|------|----------------|---------|
| 10722 | Unexpected Behavior | Immunizations | Updated VIS dates for various immunizations. |
| 10687 | Unexpected Behavior | Labs | Viewing lab results via message center no longer results in error message under specific data conditions. |
| 10707 | Unexpected Behavior | Labs | Lab Order Matching no longer results in error message under specific data conditions. |
| 10769 | Enhanced Feature | Labs | Service Facility and Report Status are now required fields when manually entering a lab result. |

## Features and Fixes for SRS EHR v9.3.025 (Gold)

| TTID | Type | Functional Area | Summary |
|------|------|----------------|---------|
| 10488 | Unexpected Behavior | AMC / Labs | The denominator and numerator for the MU CPOE measure now increments after adding a result via a manual lab entry. |
| 10326 | Unexpected Behavior | Document Management | Corrected issue with users being unable to print a specified page range from a multi-page document. |
| 9983 | Unexpected Behavior | Forms | Forms can now be edited when patients have results in the Lab Management Module without an ordering provider. |
| 10561 | Unexpected Behavior | Radiology | SRS Bi-Directional Radiology for Non-MedStrat interfaces (i.e., Viztek, Merge, Sectra, etc.) now displays the Image Result within SRS EHR. |
| 10562 | Unexpected Behavior | Radiology | SRS Bi-Directional Radiology for Non-MedStrat interfaces (i.e. Viztek, Merge, Sectra, etc.) now automatically matches patient's Image Results. |
| 10567 | Unexpected Behavior | Source of Payment | Corrected issue with saving patient's demographics as the Source of Payment for Medicare SOP Code 1. |
| 8205 | Unexpected Behavior | Source of Payment | Within the patient's demographics the user can now click Save without having a Source of Payment selected. |
| 10595 | Unexpected Behavior | CPOE | The CPOE / Orders and Results App now displays the History screen without an error message. |
| 10579 | Unexpected Behavior | CPOE Labs | The Emdeon Lab Results interface displays without a 404 Error. |
| 10596 | Unexpected Behavior | CPOE Labs | Users can now save manually entered Lab Results. |
| 9423 | Unexpected Behavior | CPOE Labs | Lab Reports results now display the correct page number in the footer of the page and include the corresponding Performing Lab Information at the bottom of the result. |

## Features and Fixes for SRS EHR v9.3.023 Cloud

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | New Feature | CQM / QRDA | Implemented the QRDA Download PowerTab, which provides a link to open/save the file required for electronic reporting. |
| - | Enhanced Feature | CQM / QRDA | Enhanced and updated the Clinical Quality Measures (CQM) Report interface to an asynchronous report delivery system. This provides the ability for the user to complete other tasks while the report is being processed. An e-mail notification is sent when the final report is ready. |
| - | Enhanced Feature | CQM / QRDA | Enhanced user interface for the CQM / CDS Admin PowerTab facilitating the ability to electronically report on PQRS. |

## Features and Fixes for SRS EHR v9.2.083 (Silver)

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | New Feature | CQM / QRDA | Implemented QRDA functionality to facilitate the ability to electronically report on PQRS. |
| 10230 | Unexpected Behavior | CCDA / Smoking | Smoking Status within the CCDA was utilizing an incorrect encounter start time, causing CQM calculations to be off. |
| 10460 | Unexpected Behavior | CCDA | If a patient encounter did not have a start and stop time, the encounter was not considered for CQMs. |
| 10461 | Unexpected Behavior | CCDA | Corrected how the Current Meds Documented checkbox start time is determined and aggregated to the numerator for the measure. |
| 10348 | Unexpected Behavior | CPOE | Patient Health Insurance data is now included on the order. |
| 10372 | Unexpected Behavior | CQM | Corrected CQM/CDS PowerTab when more than 25 providers were selected. |
| 10410 | Unexpected Behavior | CQM | Improved quality of CQM cloud platform to mitigate risk of error stacks being thrown when a CQM report is generated from a client environment. |
| 10466 | Unexpected Behavior | CQM | Corrected error in a doctor's CQM report or error stack when entering the CQM/CDS PowerTab if a provider's Shared ID had a trailing space. |
| 10378 | Unexpected Behavior | DDE | File generation for various exported file types (i.e., Communicator or CQM) experienced long delays. |
| 10503 | Unexpected Behavior | Forms | Improved performance and eliminated time-outs when the v9 Family History Interoperability Dashboard App was used. |
| 10356 | Unexpected Behavior | Radiology | Radiology orders were not being generated if the patient did not have a referring provider. |
| 10473 | Unexpected Behavior | TOC | Corrected patient matching for Direct Messaging when client used legacy Lab Management Module. |

**Version 9 Cheat Sheet**

http://srssoft.com/cheatsheet

# Features and Fixes for SRS EHR v9.2.071

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | New Feature | CQM | Officially certified on 39 CQM measures. |
| - | New Feature | CPOE | Lab Compendium and Categorization implemented for use with CPOE, Labs, and AMC Reports. |
| 10190 | Unexpected Behavior | AMC Report | AMC – Clinical Summary numerator did not get incremented when user had portal access. |
| 8530 | Unexpected Behavior | Care Team | Care Team – Providers added from Demographics were not saved under Care Team unless the page was refreshed. |
| 9070 | Unexpected Behavior | Clinical Summary | Procedures did not display on the Clinical Summary. |
| 10191 | Enhanced Feature | Clinical Summary | Increased font size on the printed copy of the Clinical Summary to improve legibility. |
| 10022 | Unexpected Behavior | CPOE | Order Tracking – Matched results text on lab results was cut off when using 1280 x 1024 resolution. |
| 9591 | Unexpected Behavior | CPOE | Order Tracking – Did not resize correctly when opened in a smaller SRS window and then maximized. |
| 9045 | Unexpected Behavior | CPOE | The Historical Orders window did not resize automatically according to available Interoperability Dashboard screen real estate. |
| 9495 | Unexpected Behavior | CPOE | Lab Results – Edit Order Details screen did not resize. |
| 8233 | Unexpected Behavior | CPOE | CPOE – Orders Entry screen did not resize if Appointments panel was expanded to the right. |
| 10057 | Unexpected Behavior | CQM Report | CMS 68 – When patient had multiple encounters and fulfilled the numerator for each encounter, the CQM report only counted 1 of the encounters in the numerator. |
| 9459 | Unexpected Behavior | Dx App | Error stack occurred when clicking the Diagnosis refresh icon more than once on the Interoperability Dashboard. |
| 10286 | Unexpected Behavior | Dx App | Diagnosis note was lost when refreshing a diagnosis. |
| 10338 | Unexpected Behavior | Dx App | User could not add ICD9/10 codes that contained a double quote within the diagnosis description. (i.e., 361.32). |
| 9983 | Unexpected Behavior | Forms | Forms Chart.xml failed when patient had LMM results with NULL or unexpected data. |
| 10324 | Unexpected Behavior | Rx Module | RX Drug DB update failed when SQL replication was configured. |
| 10194 | Unexpected Behavior | SOP App | MEDICARE (1) did not appear when searched. |
| 10193 | Unexpected Behavior | Vitals App | Vitals – Post-screening plan checkbox did not appear when BMI was outside normal range. |

**Version 9 Cheat Sheet**
http://srssoft.com/cheatsheet

# Features and Fixes for SRS EHR v9.1.576

| TTID | Type | Functional Area | Summary |
|------|------|-----------------|---------|
| - | New Feature | CPOE | Certification for Quest Laboratories interface via Emdeon |
| - | Enhanced Feature | Forms | Improved system performance for platforms that use Group Tagging. |
| 10248 | Unexpected Behavior | AMC Report | Providers were not receiving credit for VDT Measure A after indicating patient consent for SRS Communicator. |
| 10211 | Unexpected Behavior | DB Performance | Large HIPAA Audit trail database tables introduced latency when logging into SRS EHR. |
| 10212 | Unexpected Behavior | Dx App | Having 2 Diagnosis Super Favorites with the same ICD9 and ICD10 codes caused an SRS App Error. |
| 9969 | Enhanced Feature | Forms | Improved the performance of generating the Chart.xml forms data file. |

**Version 9 Cheat Sheet**
http://srssoft.com/cheatsheet

# Features and Fixes for SRS EHR v9.1.566

| TTID | Type | Functional Area | Summary |
|---|---|---|---|
| - | Enhanced Feature | CDS | Cloud-based Clinical Decision Support rules. |
| - | New Feature | Communicator | SRS Communicator Patient Portal Enrollment Security. |
| - | New Feature | CPOE | Manual Lab Order Entry. |
| - | New Feature | CPOE | Lab Results – Matched, Unmatched, Solicited, and Unsolicited. |
| - | New Feature | CPOE | CPOE Future and Completed. |
| - | New Feature | CPOE | Historical Lab Order Entry. |
| - | New Feature | CPOE | Lab Order Tracking. |
| - | New Feature | CPOE | Emdeon Integration. |
| - | New Feature | CPOE | Emdeon Retrieval. |
| - | New Feature | CPOE | Radiology Orders and Results integration with HL7-compliant PACs systems. |
| - | Enhanced Feature | CQM Report | Cloud-based CQM reporting. |
| - | New Feature | Interoperability Dashboard | Rx Decline Interoperability Dashboard web application. |
| - | New Feature | Interoperability Dashboard | Consolidated Allergies Interoperability Dashboard web application. |
| 9878 | Unexpected Behavior | Communicator | SRS Communicator messages inbound could not be defaulted to a pool. |
| 10179 | Unexpected Behavior | Clinical Summary | Clinical Summary displayed incorrect data due to race condition. |
| 9842 | Unexpected Behavior | Dx App | Diagnosis Super Favorites caused the web application to fail on load. |
| 9972 | Enhanced Feature | Forms | User profile setting introduced to control the creation of the Chart.xml file, among other forms supporting data files. |
| 9990 | Enhanced Feature | Intake Manager | Intake Manager respects the SkipChart.xml user profile setting. |
| 9876 | Unexpected Behavior | Intake Manager | Missing health insurance plan type caused Intake Manager printing to fail. |
| 9951 | Enhanced Feature | Interoperability Dashboard | Improved the performance of the Interoperability Dashboard loading. |
