Medical Histories and Medical Emergencies in the Dental Office:
Vital Signs for the Dental Team
An Interactive, Hands-On Workshop

The population is aging, bringing older and more medically complex patients to the dental office. The chances of encountering a serious medical emergency are greatly increased.

The average general dental practice that doesn't offer advanced sedation services is often unprepared to respond to an unexpected medical emergency. *Every* member of the dental team must be fully versed in all procedures and the use of emergency equipment.

While having basic knowledge is important, motivating the team to be confidently prepared is the key. This course is designed to empower the general practice members to incorporate a medical emergency Action Plan into their standard of care. Prevention and treatment of emergencies will be covered, with emphasis on team synergy. This course is excellent for all members of the dental team.

This interactive program offers an upbeat and often humorous approach to a serious topic. It offers many pearls and practical hints that will be put to use the very next day.

All participants are asked to bring in their own emergency medical drugs and equipment.

At the conclusion of this course, attendees will be able to:

- *Analyze and utilize a "Medical History Questionnaire"*
- *Incorporate current blood pressure guidelines in evaluating treatment risk*
- *List the items important to have in a medical emergency kit*

7:30 – 8:00 am Registration & Morning Beverages with Light Snacks

8:00 – 12:00 noon **Medical Histories and Medical Emergencies in the Dental Office: *Vital Signs for the Dental Team***
