SEISMIC SUPPORT SERVICES

The Elexco Group

Since 1976

1-877-ELEXCO-1

Elexco Delivers Seismic Support

Permit agents build rapport and educate the landowners; collaborate with corporate and government entities to secure licensing; promote positive public opinion and gather information pertinent to operational success.

Elexco's operational liaisons are on-site to review permit details applicable to the day plans, provide field support throughout each day and look after any landowner issues or concerns.

Environmental and Archeological Considerations are identified,

reviewed and communicated in support of operational planning and compliance with regulations.

Damage releases are acquired releasing you and your client from liability and damage claims are mitigated using an itemized assessment structure ensuring justifiable damage reimbursement.

Our commitment is to provide a quality seismic support service that will enable a harmonious geophysical operation.

Our strength is in the diversity of our people the information technologies which support our tasks.

Elexco believes in...

EDUCATION- We educate the landowner with truth and fact so they know what to expect.

INFORMATION- We gather information that supports project safety and operational efficiency.

COMMUNICATION- We effectively communicate project information to decision makers and field crews.

Elexco's title house dispatches agents effectively providing efficient support to out teams throughout North America.

Elexco's GIS and information management systems provides dynamic tools for supporting operational planning as well as providing valuable project information to field crews.

Elexco's certified blast vibration techniques are available to provide documented measurements of peak particle velocity allowing desired source design and deterring unwarranted damage claims.
