Develop Algebraic Thinking
 Grade 4-8 Teachers

BRAD FULTON

Dynamic Presenter, Educator and Author

What you will receive:

- Real-life connections and contexts that make algebra understandable to all students.
- Over a dozen practical research-based lesson plans that will help your students make sense of the same algebra concepts that often trouble high school students.
- Well over a month's worth of high-interest activities that will help students in elementary classrooms and high school algebra courses as well.
- Over 100 pages of complete lesson plans, homework masters, transparency masters, vocabulary lists, assessment ideas, teaching strategies, extension ideas and more.
- Unique and comprehensible ways to teach integers.
- Ideas for using common materials that are readily available to teach algebra concepts in new ways.
- Clever, tangible, sensible ways to help little learners and older ones solve simultaneous equations.
- Traditional and alternative methods of solving equations.
- Ways to introduce variables, exponents, word problems, combining like terms, and more.
- Important and useful research tips.
