Programme

Tuesday / 22 May 2012

08:30: Registration

08.30h: Morning refreshaments 09.00h: Welcome from Banu Kannu, Conference Director, TradeWinds Shipping China

09:05: Session 1

Where is China on the current maritime map of the world?

Kindly sponsored by: 1 熔盛重工

Examining China's 12th Five-Year Plan and its implications for global trade and shipping. How will the current global economic upheaval affect China's import/export status quo? How likely is a dramatic restructuring in the trade balance with China importing more than it exports? What is the energy demand and supply outlook and what are its implications for China's shipping industry? What is the outlook on consolidation in the sector – will it really be a case of "out with the small, in with the big" with smaller companies banding together to weather the storm?

Session chair:

Robert Lorenz-Meyer, Immediate Past President, BIMCO; Owner & Managing Partner, Ernst Russ

Weathering the storm

- Drivers and outlook for current overcapacity in international shipping
- What options are available to Chinese shipyards to stay in the game?
- Exploring strategies for shipping companies to survive these turbulent times

Robert Lorenz-Meyer, Immediate Past President, **BIMCO**; Owner & Managing Partner, **Ernst Russ**

The current state of Chinese shipping

Sun Licheng, President, China Classification Society (CCS)

VALE – Breaking the geographical barriers

Gurinder Singh, Director – Shipping & Distribution, **Vale**

Panelists:

Lasse Kristoffersen, President & CEO, **Torvald** Klaveness

Bjørn Højgaard, CEO, **Univan Ship Management** Jörg Beiler, Vice President and Area Chair for Greater China, **DNV**

10:30h: Morning *guan xi* & refreshment break kindly sponsored by

11:00h: Session 2

Renegotiations and charter party disputes: A new reality? dad

Kindly sponsored by: WIKBORG | REIN

The second half of 2011 will be remembered for the unusual flood of charter party disputes, unpaid bills and re-negotiations that emerged in a troubled market. As major Chinese players like COSCO "vow to continue their policy of renegotiation" (TradeWinds, Nov 2011), what does this mean for their counterparties and how can this new risk be dealt with? Does the world simply have to come to terms with China's more pragmatic approach towards contracts? As charterers from other parts of the world jump on the re-negotiation bandwagon, will this be the "new normal" and the only way to cope with the tight credit market?

- What will be the long-term impact of the recent spate of re-negotiations with reference to specific cases including major private and public Chinese shipping companies?
- Has the controversial method of arresting vessels worked or are there other innovative ways that owners can deal with increased exposure to counterparty risk?
- What is the latest from Beijing on the implementation of the tax laws that caused the earliest cases of reducing or defaulting on hire party payments?
- How else are re-negotiations entering the market? Are owners trying to delay deliveries of newbuilds?
- Have all the negotiations been done or have we only seen the start of more to come?

Session chair:

Geir Sviggum, Partner, Wikborg Rein

Coping with disputes in China

Lambros Babilis, COO, Vafias Group of Companies

Panelists:

Gerald Yee, Partner, **Ince & Co.** Anil Deshpande, CEO, **Foresight Group** Andrew Meadows, Associate, **Clyde & Co.**

12:30h: Networking lunch kindly sponsored by

13:30h: Session 3

Grasping the enormity of the LNG story in China

China's LNG demand is said to reach 31 million tons per annum by 2015 (Wood Mackenzie). How will this demand be met and what fixed and floating infrastructural developments need to take place to support this appetite? Based on current import growth, China will need more than 65 LNG carriers or "marine superfreezers" by 2015 – can domestic yards cope? Further reports of Russia requiring up to 40 LNG carriers has the market excited – will the projects these orders are dependent on come to fruition?

- What are some of the latest big LNG deals to surface in China and what do they indicate for the future of LNG?
- What are some viable LNG supply options for China?
- How will China's LNG appetite impact the demand and supply of LNG carriers?
- Updates on the LNG carrier fleet: Who's building where and who's ordering?
- Developments in small-scale LNG

Session chair:

William J. Sember, Vice President - Global Gas Development, **ABS**

Updates on the LNG carrier fleet

Alexandre Eykerman, Director – LNG, Wärtsilä Ship Power

What are some of the latest big LNG deals to surface in China and what do they indicate for the future of LNG?

John Cotzias, Sale & Purchase Director, **Intermodal** Athens

15:00h: Afternoon guan xi & refreshment break

Wednesday / 23 May 2012

15:30: Session 4

Taking the temperature: Sector updates

Session chair:

Michael Pak, SVP, Senior Equity Analyst, Clarkson **Capital Markets**

Drybulk: What are the prospects for Chinese coal imports in the context of domestic coal and power markets and current global realities?

- What is the current outlook on availability of coal from traditional suppliers like Indonesia & Australia?
- What are the current costs and logistical issues involved in bringing the coal to China?
- What factors will impact the sea-bound transport of coal?

Ralph Leszczynski, Head of Research, **Banchero Costa**

Should cargo interests become ship owners' interests?

 Taking a look at the Valemax vessels and their implications for global trade, Chinese shipping interests and the way forward

Wang Chunlin, Executive Director,

Pacific Basin Shipping

Updates on China's tanker story

- Has Chinese demand for tankers grown as expected when Teekay first entered the Chinese market?
- . Is the 'Chinese ships only' rule still in place? What are the implications?
- . How will this market evolve over the next few vears?

Matthew Blake, Director - Business Investment, **Teekay Shipping**

Panelists: Tim Huxley, CEO, Wah Kwong Maritime Transport Şadan Kaptanoğlu, Owner, Kaptanoğlu Shipping Group Sam Chambers, Owner, SinoShip

17:30 Presentation of the "Shipping China Executive of the Year" Award, kindly sponsored by

19:00h: 8th TradeWinds Shipping China Huangpu **River Cruise Dinner** kindly sponsored by ClassNK

Please note capacity onboard the Oriental Pearl 2 is strictly limited to 120 pax so RSVP by emailing <u>nicola.tippetts@nhstevents.com</u> to avoid disappointment.

09:45h: Morning refreshments (open to SinoShip LNG Business Breakfast participants & TradeWinds Shipping China participants)

10:00h: Session 5

Is the clock ticking for China's shipyards?

Kindly sponsored by:

China fleetingly took top spot as the world's leading shipbuilding nation in 2010 but dropped to a dismal third of that shipbuilding volume in 2011. The record shows that 6 out of the top 10 Chinese shipyards had no orders in Q3 of 2011 (Global and China Shipbuilding Industry Report, 2010-2011).

- Is the yards' loss an owner's gain? Which owners are out there with enough liquidity to snap up lowcost newbuilds coming out of struggling yards?
- Will any cooling off in Chinese shipbuilding have a significant impact on the current market overcapacity? When will these effects be felt?
- Is diversification into less conventional vessel types the answer for Chinese yards struggling to find new orders?
- How does the future fleet profile look? Is it bigger and better or just plain bigger?
- How can challenges of skilled labour be met? What are some training and retention tools that have been successful?
- How can Chinese shipbuilders re-establish themselves in a market with plummeting prices? Is building in green values going to allow them to put the prices up?

Session chair: Giosuè Vezzuto, General Manager – Asia, RINA

Challenges for 2012 onwards

- The demand for oil continues to increase
- Speed of recovery
- The industry dilemma, when to build?

John Payne, Group Business Development Director, Hallin Marine

Perspectives from a Chinese yard Simon Liang, Chairman & CEO,

Sinopacific Shipbuilding Group

Cooperating across borders

While shipbuilding is often presented as a zero sum game played between the East Asian powerhouses of China, Korea and Japan - the boundaries are less clear than we may think. Given the problems faced by both the Chinese and Japanese maritime industries is greater cooperation across borders a possible solution to the problems faced by the shipbuilding industry? Yasushi Nakamura, Executive Vice President,

ClassNK

Panelists: Hsu Chih-Chien, President, Eddie Steamship / Courage Marine Dimitris Koukas, Managing Director, **Optima Shipbrokers**

11:00h: Morning guan xi & refreshment break kindly sponsored by

Taking technology and innovation from rhetoric to reality

Kindly sponsored by:

With the national drive towards the "greening" of China, the move towards more efficient vessels and more technologically advanced yards fits in nicely with the memo on the environment from Beijing. How are Chinese yards and owners responding to the global shift towards better, more fuel-efficient and cost-effective vessels and operation?

- Case studies of Chinese yards leading the innovation campaign
- Using the increase in Chinese coastal trade to boost technology R&D
- · Will China's yards be able to overtake South Korea and Japan when it comes to innovation and technological improvements?
- Examining Chinese owners and operators who have stepped up to the plate with efficient and environmentally conscious operations

Session chair:

James de Vroome, Executive Director, SpecTec

Changes in the maritime industry

James de Vroome, Executive Director, SpecTec

Simultaneously improving profitability and reducing emissions

Jack Zhu, Managing Consultant, FutureShip - a GL company

Charting China's progress in technology and innovation

Wan Xiaoyue, General Manager – Safety Certification and Management, China Classification Society (CCS)

Marine engine efficiency enhancement & GHG abatement

• Overview and progress achieved by the TCC Group in the field of maritime sustainability Vinay Patwardhan, Director of Group Planning &

Development, Tai Chong Cheang Group (TCC)

Panelists:

Surindar Singh, Naval Architect-Consultant, **Bernhard Schulte Shipmanagement** Jaakko Eskola, Group Vice President and Head, Wärtsilä Ship Power

12:30h: Networking lunch kindly sponsored by **REDFOUR**. MSS

Ship finance - is it a broken record?

Much has been discussed about the size and value of the current orderbook that remains unfunded - what are the likely outcomes of this gaping deficit? With the constant refrain of "too many ships, not enough funding" being heard throughout the industry, what are some actual solutions and how can owners and lenders work together, rather than against each other, to lift the sector out of the current doldrums? What role are Chinese shipping banks playing in the global ship financing arena?

- . How will the Eurozone debt crisis, in real terms, affect global funding?
- The blame game: Owners vs. banks, is it a neverending vicious cycle?
- Is it a viable solution for shipping banks to reinvest their portfolio run-off?
- Should Chinese banks join up with more experienced European counterparts in co-financing and co-operative deals?
- With the current low lending capacity, will owners walk away from deals causing a much-needed reduction in fleet growth?
- What is the likely fate for unfunded vessels on order at Chinese shipyards?
- Is Chinese funding being controlled centrally and are they merely finding money for Chinese newbuildings?

Session chair:

Vidar Andersen, Head – Shanghai Branch, DNB

How can the shipping industry survive this winter? Perspectives from a financial institution

George Diao, Director, International Far Eastern Leasing

Financing via Chinese banks Anil Deshpande, CEO, Foresight Group

Leasing schemes for ship finance from the perspective of a Chinese export credit agency Simon Liu, Deputy Director – Leasing Insurance

Division, China Export & Credit Insurance Corp., Sinosure

Panelists:

Antoine Gustin, MD & Head – Export Finance, **BNP Paribas – Beijing**

15:00h: Afternoon guan xi & refreshment break kindly sponsored by ABS

15:30h: Session 8

China's offshore: the only bright spot?

Kindly sponsored by: MANAGING RIS

- How sound are the factors underpinning global offshore investment?
- Are we facing an "offshore fabrication bubble" (Martin Stopford, Clarksons)
- How will the offshore fleet develop and are China's yards ready to build to newer and more demanding specifications?
- Which are the most successful offshore players in China and how did they get there?
- What are some safety and environmental concerns that have surfaced since Deepwater Horizon and are Chinese offshore operators equipped for new standards?
- What is the current level of seismic activity in China & the region: where is the current E&P going on? How is this impacting vessel deployment decisions from owners
- Updates on the growth and development in the rig-building sector

Session chair: David Wu, President, Grenland Group Asia

Building OSVs for the international market Tan Ruifeng, President,

Guangdong Yuexin Ocean Engineering

Are Chinese offshore operators equipped for new standards? Dealing with safety and environmental concerns since Deepwater Horizon

Carl Arne Carlsen, Senior Vice President, Mobil Offshore Units, DNV

Panelists:

Richard D. Pride, President & COO, ABS Greater **China Division**

Zhang Guoqiang, Assistant General Manager & Director of Shipbuilding & Offshore Engineering Business Dept., Wuchang Shipbuilding Industry

17:00h: Official close of 8th TradeWinds Shipping China

17:30h: Farewell networking reception

Need to bring your A-game to China?

A limited number of sponsorship opportunities are still available for this conference - contact gregory.whitehead@nhstevents.com if you need further information. Join our exclusive list of sponsors who are benefitting from a targeted email, web, brochure and press marketing campaign. Leave YOUR mark on the Chinese shipping market.

What else is happening during the week of the 8th TradeWinds Shipping China?

Maximise those miles by choosing from other maritime activities happening in the same week.

21 May 2012: 09.00h - 20.00h A day of golf with Rongsheng By invitation only

21 May 2012: 13.00h - 17.00h Oil Spill Response: An expert technical workshop Contact banu.kannu@nhstevents.com

23 May 2012: 08.00h - 09.45h

SinoShip LNG Business Breakfast By invitation only

23 – 25 May 2012:

China International Marine, Port & Shipbuilding Fair – CIMPS Europort www.china-ship.com/en

(Programme may be subject to change.)

Registering online is fast, easy and secure: <u>http://www.nhstevents.com/events</u>.

Alternatively, complete this form and return either by fax to +44 207 504 3746 or scan and email to info@nhstevents.com. For more information, please call +86 186 2136 0996 / +44 207 029 4163.

□ I would like to register for the TradeWinds Shipping China 2012

□ Full rate – Non-TradeWinds subscribers – €1295

□ TradeWinds subscriber rate – €695

□ I would like an annual subscription to TradeWinds for €790 and to register for the

TradeWinds Shipping China at the subscriber rate of €695 – total package €1485

Hotel accommodation: a number of rooms are available at a group discount at the Kerry Hotel Pudong, Shanghai for registered participants. For further information and to make a reservation please email <u>nicola.tippetts@nhstevents.com</u>.

Personal details
