Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the College of American Pathologists (CAP) and Michigan Society of Pathologists. The College of American Pathologists is accredited by the ACCME to provide continuing medical education for physicians.

CME Designation

The CAP designates this live educational activity for a maximum of 5 AMA PRA Category 1 Credits™. Physicians should claim only credit commensurate with the extent of their participation in the activity.

Mission Statement

To provide opportunity for increased knowledge and continued education to Society members, as well as colleagues working in the field of pathology and related medical areas.

Distinguished Presenter

Bruce Smoller, MD

- Executive Vice President of the United States and Canadian Academy of Pathology
- Consultant dermatopathologist to the University of Arkansas and Georgia Health Sciences University.

Meeting Objectives

Dermatopathology – it’s not just skin-deep! Maintaining our relevance in the future Dr. Bruce Smoller

Upon completion of this activity, participants should be able to:

- Participants will be able to describe the genetic aberrations seen in cutaneous melanoma and to understand the purpose to including such information in pathology reports.
- Participants will be able to distinguish mycosis fungoides from the most common histologic stimulants based upon clinical histories and histologic findings.
- Participants will be able to identify systemic diseases that might be diagnosed based upon dermatologic findings seen in cutaneous biopsies.

“Dermatopathology in Community Practice- Non-Melanocytic Lesion Case Studies“

Adrian Ormsby, MD - Division Head Surgical Pathology, Henry Ford Health Systems
Min Lee, MD - Senior Staff Dermatopathologist, Henry Ford Health Systems

- Upon completion of this session, participants are expected to identify common tissue injury patterns of various inflammatory dermatoses with their differential diagnoses.
- Review common neoplastic skin lesions encountered in private practice
- Understand histologic criteria and morphology of common neoplastic lesions
- Understand the differential diagnosis of common neoplastic skin lesions encountered in private practice and community practice.
