

Water Usage Chart DP365B | DP365M

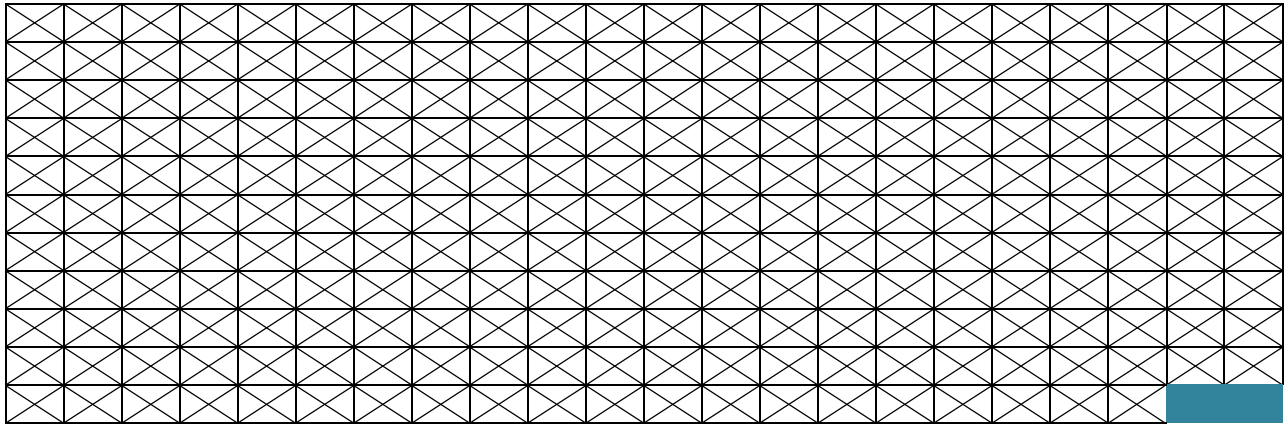

The DentaPure DP365 water treatment cartridge will treat 240 liters of water or be used for 240 working days. If desired, the chart below maybe used to track your water consumption.

Instructions:

Each full square represents a full day's work or one liter of water.

Check off the day or water consumption each time you use your dental unit.

When the chart is full it is time to replace your DentaPure cartridge.

If you do not track your water consumption you **MUST** change your DP365 cartridge every 365 calendar days.
