

Assignment 3.4

Environmental Impacts Associated with Participation in Two Outdoor and Adventurous Activities

Pupil's Name : _____

Unit Tutor : _____

School : _____

Assignment Setting Date : _____

Assignment Collection Date : _____

Final Assignment Collection Date : _____

Learning Outcomes

Know environmental impacts associated with participation in outdoor and adventurous activities.

Assessment Criteria

- Describe environmental impacts associated with participation in two outdoor and adventurous activities (P4)
- Explain the environmental impacts associated with participation in two outdoor and adventurous activities, identifying precautions and actions that can be taken, or used, to reduce them (M3)
- Explain precautions and actions that can be taken, or used, to reduce the environmental impacts associated with participation in two outdoor and adventurous activities (D2)

Scenario

Our school is working towards attaining a 'Green School' award. To win this award, we must make sure that the school does as little harm to the environment as possible. As we go out to take part in outdoor activities with the school we need to consider what the effect is on the environment, and what can we do to look after our environment while enjoying the activities.

Task

Create a Power Point presentation that is eye catching and interesting about how two outdoor activities can effect the environment, and what we can do to reduce the effects.

Guidelines

Your presentation should be about a variation of environmental impacts. For example:

- erosion
- pollution
- wildlife disturbance
- construction of facilities

Then suggest a precaution that can be taken to reduce each effect.

Use your log book to remember what you learned in every practical session.
