

Physical Activity Readiness Questionnaire (PAR-Q)

For most people, physical activity should not pose any problem or hazard. PAR-Q is designed to identify the small number for whom physical activity might be inappropriate or those who should have medical advice concerning the type of activity most suitable for them. Common sense is the best guide in answering these few questions.

If this is being completed on behalf of a cadet then the questions and responses should be from the perspective of the cadet. It is the responsibility of the parent/guardian to provide accurate information and to seek medical guidance if required.
