Sustainable Streets

New Neighbourhood Application Form

What is Sustainable Streets?

Do you want to be part of a neighbourhood where people know each other by name, swap produce over the back fence and share knowledge and skills for a cleaner environment? These are just some of the benefits of the Sustainable Streets program.

Sustainable Streets is where enthusiastic residents in the same neighbourhood share practical ways to reduce their footprint and save money on living costs through shared learning activities, such as bush regeneration, green cleaning, household water and energy efficiency, organic gardening and ethical shopping workshops.

Benefits of Sustainable Streets

Save money on energy and water bills

Discover new sustainable living tips

💑 Share knowledge and skills in the community

How was Sustainable Streets developed?

Sustainable Streets is a local adaptation of a national program that has over 200 communities across Australia!

The program has been delivered locally in Mullumbimby, South Golden Beach and Brunswick Heads. With a little help from Council, residents in these neighbourhoods have dramatically reduced their energy and water costs, made new friendships and created some inspiring projects for their communities, including planting fruit trees in the street and installing roadside wildlife signs.

Is your neighbourhood interested?

Byron Shire Council has assisted neighbourhoods across the Shire to deliver the Sustainable Streets program.

If you think your neighbourhood is keen to participate, **complete and return this application form**.
