Scope

PCIC Europe is the premier European forum for the exchange of experience in the practical application of electricity and instrumentation in the petroleum, chemical and pharmaceutical industries, including all upstream and downstream activities.

The 4th PCIC Europe will be organised in Paris June 13 – 15, 2007. The conference program will include plenary presentations as well as presentations on specific topics in the field of electrical and instrumentation technology.

Experts from

- users
- engineering companies and manufacturers
- regulators and insurance institutions
- the European Commission and other international organizations

will present contributions with the intention to inform attendees about their experience and recent progress.

The PCIC Europe conference is a means for senior engineers to provide helpful information for younger engineers to stimulate the knowledge transfer from generation to generation. New solutions to achieve benefit concerning safety and costs will be presented.

Topics

1. Safety in the Workplace (Electrical Safety, Safety Instrumented Systems, SIL, EMC)"
2. Experiences from Users with Regulations and Standards (e.g. Machinery Directives, ATEX Directives)
3. Electrical and Instrumentation (E&I) Engineering Practices
4. Equipment, Systems and Components
5. Operation, Maintenance, Repair, Asset Management and Qualification of Personnel

Conference fee (Registration starts on February 15, 2007)

Registration before April 30, 2007	€ 550.–
Registration after April 30, 2007	€ 590.–
