BAH-MILCON Life Cycle Cost Analysis

In this appendix, we present the sources used for developing the inputs for the life cycle cost analysis (LCCA). The CD placed in the back inside cover contains the LCCA spreadsheet models for the five sample installation sites.

Discount and Inflation Rates				OMB A-94 Appendix C Revised January 2008. 30-year real interest rate. Assumed all costs would inflate with general inflation rates and therefore A-94 allows for use of real rates instead of nominal rates.

Mixed use occupancy				
E1-E4 occupants	204	194		Based on anticipated usage specified in the 1391
E5 occupants	42	40		
Assumptions:				
1) MILCON construction project starts in 2009 with occupancy by 2011 and the privatization scenario assumes BAH payments start in 2011.				
2) Added operating costs for custodial services, refuse collection, and pest control not identified in the DoD Facilities Pricing Guideline for FAC 7210				
3) Every 1+1 module is either fully occupied by two E1-E4's (one per bedroom) or one E5 (uses second bedroom as a living room). Analysis did not consider assigning four E1-E4's per module, or two E5's per module.				
4) Although the Facility Modernization Model uses empirical costs for program-wide budgeting purposes, the primary facility cost from the 1391 was used in lieu of empirical costs for greater accuracy.				
5) Assumes costs will inflate along with general inflation. Therefore costs were not escalated and the real discount rate identified by OMB was used.				
6) This 55-year lifecycle cost analysis does not use the O&M and Utility cost sources as specified in OSD Final Housing Privatization Life Cycle Cost Policy, dated Nov 4, 2005.

Assuming a 55 year facility life, MILCON is equal to 144% of BAH. In a privatization scenario, 100% of BAH plus a government contribution over \$19.1 million will make privatization more expensive than government provided barracks.

Sustainment & Modernization Annual Costs for Supporting Facilities for Ft Bragg Barracks, PN 64447, FY 2009 MCA Project

REFERENCE: FSM-FMM-FOM Common Reference Tables, Version 10, with FY 2008 Costs for Replacement, Sustainment, and Modernization Factor

NOTE: The Computed Replacement Cost only includes those items from the detailed supporting facilities cost estimate that have FAC's with published sustainment costs and modernization factors. This is why the "Grouped Subtotal Cost" does not equal the Front Page 1391 cost. Accordingly, this analysis is very conservative, i.e., underestimates the true sustainment & modernization costs.
