

PERMISSION SLIP FOR HEALTH SCREENINGS

Health Screenings are performed in compliance with Kentucky Health Law and are to maintain your child's permanent school health records. Each year these screenings are given according to the grade level requirements.

Example: Children in grade 1 are screened in vision, hearing, height and weight. Children in grade 6 are screened in height, weight and scoliosis.

In addition to these screenings, we will offer speech articulation screenings at no cost. These screenings are for Pre-K, Kindergarten, and 1st grade and also for those students who are referred by teachers or parents.

I give my child, _____, homeroom: _____, permission to be screened in the required areas at St. Martha's Health Fair each year from grades Pre-K through the 8th grade.

Please note we **must have this form returned in order for your child to be screened.

Parent Signature _____ Date _____

Thank you,

The Health Committee
