Students will learn the basics of knitting: casting on, knitting, purling, and binding off. They will receive two sets of needles, a PowerPoint presentation, yarn, two darning needles, a craft bag and knitting patterns. After learning the two basic stitches, exploring how these stitches can be combined to create patterns, and examining a variety of completed projects, the students will create one or more projects. Snacks will be served! While the course is being offered

over a two week period, students may take one or the other or both sessions. No knitting experience is required.

**Title: SNAP! Circuits Advanced: Light!**

**Course Fee \$175**

**Presenter:** Christopher Aleo

**Grades:** 3-8

**Max Enrollment:** 15

**Seats available:**1

Intended as a 'sequel' to the SNAP Circuits Basics course or as a follow-up for those who took the SNAP Circuits course last summer, this course will use the brand-new SNAP Circuits 'Light' kit which makes use of technology like fiber optics and LEDs. Students can build digital circuits and connect their iPod or any MP3 player and enjoy their music as the lights change to the beat. The included strobe light has spinning patterns and will amaze with its visual effects. Students can build over 175 exciting projects. All parts are mounted on plastic modules and snap together with ease. Students will keep the kit once the course is over.
