About TERI : The Energy and Resources Institute

A dynamic and flexible not-for-profit organization with a global vision and a local focus, TERI is deeply committed to every aspect of sustainable development. **From biotechnology to global climate change and from schoolchildren to heads of state**—no sphere of human endeavour is unfamiliar to TERI. Headed by **Dr R K Pachauri**, also chairman of the Intergovernmental Panel on Climate Change (IPCC) and **joint winner of the Nobel Peace Prize in 2007**, TERI is a research institute, a think-tank, a consulting firm, as well as a publisher of quality books on energy, environment, and sustainable development.

About the books

The unique point of the entire range is the fact that most of the series are **printed on recycled paper**. The books are targeted at children aged 3–16 years and **supplement the environmental education curriculum being followed in schools across India and the world**. These beautifully illustrated and attractively designed books conform to the lexile range required for disseminating important information to young minds and have a higher recall value than most others. And what is more, the book series is the first of its kind published by an Indian publisher.

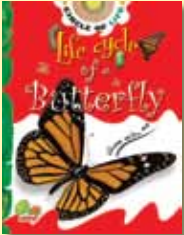

CIRCLE OF LIFE :

₹ 75 each

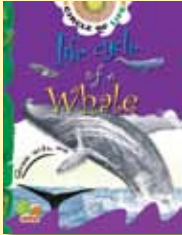

Size 180x240 mm, Paperback

Age 5-9 years

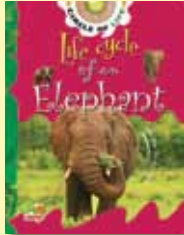

How does a bunch of tiny eggs change into a beautiful butterfly? What happens to a tadpole's tail when it grows into a frog? How does a baby whale drink its mother's milk to grow big and strong? Who looks after the elephant calf? When does a joey leave its mother's pouch? There's a lot of love, care, and magic in nature's circle of life. Read on...
