## HI PAA Federal Regulation Healthcare and Health Plan Professional Compliance Form

Oral and written communication that occurs in conjunction with healthcare activities may involve information about patients, their families, friends, or caregivers. Under the HIPAA Privacy Rules, the discussion, transmission, or narration of protected patient health information in any form is forbidden except as a necessary part of treatment, payment, or medical center operations.

As an employee of Surgical Exchange, you have the responsibility to protect all patients' medical information so that it is not improperly used or disclosed, in accordance with federal and state law.

- As healthcare providers, all personnel serve as advocates for the patient.
- All personnel will adhere to the Patient Bill of Rights and understand that all information about patient health information must be kept private and confidential by limiting all information to persons who are authorized to receive it.
- Personnel are expected to report the following events to the manager of the nursing unit or designee:
  1. Any action, order, or treatment that in the professional judgment of the individual appears to be potentially harmful to the patient.
  2. Patient complaints regarding their care or treatment.
- Personnel are expected to adhere to the following guidelines regarding the confidentiality of patient information:
  1. Do not access or use patient information that is not required for your work responsibilities.
  2. Only disclose or access information when permitted or required to do so by law.

**The Health Insurance Portability and Accountability Act (HIPAA) is a federal regulation that was established to ensure professional and ethical standards and requires each employee to adhere to the principles of safeguarding the confidentiality, availability, and integrity of all patient health information. Your signature is assurance that you, as an employee of Surgical Exchange, understand these principles and the HIPAA Federal Regulation, and will maintain knowledge and access of all patient health history and information accordingly.**

## Planning and Implementing Age Appropriate Care Proficiency Checklist

**OBJECTIVE:** The caregiver will demonstrate the knowledge and skill required to plan and implement Age Appropriate Care.

**NAME:** \_\_\_\_\_

**ADDRESS:** \_\_\_\_\_

**TITLE:** \_\_\_\_\_

**INSTRUCTIONS:** Check appropriate column for every item below. Each step requires a correct demonstration or explanation.

SKILLS	CORRECT	INCORRECT	COMMENT
1. Obtains information related to Age Appropriate needs.			
2. Interprets information with consideration for the age of the patient.			
a. Patient placement			
b. Use of equipment reflecting both age and care of patient			
c. Use of outpatient based on physical abilities			
d. Family support			
e. Educating both patients and the family about religious and cultural practices			
f. Safety of the patient			
3. Develop plan of care reflecting both the patient's age and needs.			
a. Implement plan			
b. Document plan of care

## Orientation Skills Post-Test

Name: \_\_\_\_\_

Date: \_\_\_\_\_

*Circle the correct answer:*

1. **Code Triage** signals Disaster Plan activation.

True                  False

2. **Universal/Standard Precautions** assume that all blood and body fluids are potentially infectious.

True                  False

3. The overhead announcement for "fire danger" is **Code Red**.

True                  False

4. **Waterless hand cleansing** is an effective alternative to soap and water.

True                  False

5. **Code Pink** is the code for infant abduction.

True                  False

6. What do the letters **R.A.C.E.** stand for?

- a. Remove – Aim – Contain – Extinguish
- b. Rescue – Alarm – Confine – Extinguish
- c. Run – Alarm – Call – Evacuate

7. What should you do if you have an injury or illness at work?

- a. Notify supervisor, manager, or whomever they designate.
- b. Fill out appropriate forms.
- c. Go to Employee Health (if after hours, the ED) with completed forms.
- d. All of the above.

8. **Hand washing** should be done:

- a. Before and after each patient contact
- b. After using the bathroom
- c. Before eating
- d. After sneezing or coughing
- e. All of the above

9. To protect yourself from injury when performing heavy work, lift with your \_\_\_\_\_ and not your \_\_\_\_\_.

- a. Shoulders, arms
- b. Back, legs

## Policy for Elimination of Artificial Nails

In consultation with our Infectious Disease specialists and public health authorities, the Southern California Quality Committee approved a *Standardized Hand Hygiene Policy* in the interest of improving the quality of care. This policy calls for the elimination of artificial nails for all healthcare workers engaged in direct, hands-on patient care. This includes all physicians, nurses, and other staff who come into physical contact with patients in the course of their work. This policy is in response to mounting evidence that artificial nails have been linked to the transmission of infection and supports our commitment to prevent healthcare-acquired infections.

In compliance with this policy, the use of artificial nails has been eliminated across the continuum of care (inpatient, outpatient, and home care) throughout the organizations with which Surgical Exchange is affiliated. All employees who provide direct patient care are expected to be in compliance with the Standardized Hand Hygiene Policy as a condition of continued employment.

I have been informed of the Standardized Hand Hygiene Policy and the requirement to eliminate artificial nails for all persons who provide direct patient care.
