

MCS certificated renewable energy installers in the south west

6 August 2010

This list provides details of all the renewable energy installers in the south west certificated under the Microgeneration Certification Scheme (MCS). Microgeneration refers to small scale renewable energy, with the common definition being up to 50kW for electricity and up to 45 kW for heat.

The MCS is an independent scheme supported by the government and the renewable energy industry which is designed to give protection to consumers by certifying microgeneration installers and products against a set of robust and consistent criteria and standards. It is led by a stakeholder panel, comprised of representatives from certification bodies, government departments, renewable energy trade associations and other interested parties.

The MCS replaces previous schemes, such as Clear Skies. Both the installer and the microgeneration product have to be MCS certificated for an installation to be eligible for Feed-in Tariffs (FITs), a new government financial incentive for renewable electricity which started on 1 April 2010. The consultation on the Renewable Heat Incentive (RHI), published by the previous government, proposed that the installer and the microgeneration product also have to be MCS certificated or equivalent for an installation to be eligible for the RHI. MCS certificated installers and products display the MCS approved mark. For more information about the MCS, including lists of MCS certificated microgeneration products, see www.microgenerationcertification.org.

MCS approved installer mark

This list is based on the installer details provided on the MCS website and therefore the authors cannot assume any liability for any errors or omissions in the information from that website. The list is checked, and updated if required, weekly, in line with the weekly updates to the installer information on the MCS website. This list is provided because it is not possible to create a list of just south west based installers on the MCS website. Please send details of any errors or omissions in this list to gwalton@regensw.co.uk.

This list is compiled by Regen SW (www.regensw.co.uk), the sustainable energy agency for the south west, who are working together with the Energy Saving Trust (www.energysavingtrust.org.uk) to help develop the microgeneration market in the region. Neither Regen SW nor the Energy Saving Trust recommend any individual installer nor do we accept any liability for any work done by the installers on this list.

For more information

If you want to install renewables on your house please contact the Energy Saving Trust on 0800 512 012 or visit www.energysavingtrust.org.uk.

If you want to install renewables on business premises please contact the Carbon Trust on 0800 085 2005 or visit www.carbontrust.co.uk.

If you are a south west renewable energy business please contact Gareth Walton at Regen SW on gwalton@regensw.co.uk or 01392 474329.

The most recent version of this list is available to download at www.regensw.co.uk/projects/microgeneration.

MCS certificated installers based in the south west

6.8.2010

- There are currently no MSC certificated micro-CHP installers based in the south west
- The hydro installer listed is Clear Skies registered rather than MCS certificated because the MCS standards for hydro have not been finalised yet
