Description & Purpose:

Pericom is announcing the PT7C5027Cx's die revision will be upgraded from "Y" to "V" increasing the power supply metal line width to enhance the device's current handling capability under electrical overstress (EOS) events. There is no any specification change to the datasheet on the new revision.

This change does not affect product's form, fit, function, and reliability.

PTI reserves the right to ship either version manufactured after the change effective date until the inventory on the earlier version has been depleted.

Please refer datasheet at www.pti.com.cn for other detail or contact your local Pericom sale representative if you need additional information.

PTI Approval:

Quality Manager: Li Hua
