Description & Purpose:

PTI would like to announce that the packing method for die sale products packed by 3'' trays would be changed for improvement. The detailed description of change is shown as below:

Item	Before change	After change
Material:	Tape	Clamp
Surface resistance:	$>10^{11}$	10^5 to 10^{11}
ESD Sensitive:	Insulative	Dissipative

PTI reserves the right to ship the products with either version packing method after the change effective date until the inventory with earlier version has been depleted.

PTI Approval:
