### COMFORT RATING SYSTEM

Developed as a guide for determining relative thermal insulation values.

Activity levels, body metabolism, exposure time, age and other variables may affect your Comfort Rating preference. Comfort Rating values may be reduced over time as normal wear on materials and components occurs.

#### WATERPROOF

With FWP, an advanced waterproof / breathable system, you can rest assured that you will stay warm and dry.

**ONE YEAR GUARANTEE**

HydroBarrier waterproofing system, brought to you exclusively by Katahdin Gear, begins with durable, waterproof outer shells and strengthens the integrity of the barrier by sealing the seams and/or inserting a waterproof membrane.

**GUARANTEED WATERPROOF SEAT FOR ONE YEAR**

Fabric coating developed for all-weather performance protection against the product of consoltex elements. Hydroflex® coated fabrics are waterproof, breathable, washable and wind resistant.

REISSA®, a functional fabric with a breathable membrane. It is an advanced textile with a highly developed polyurethane resin coating or membrane. This technology makes it possible for an extremely thin waterproof coating that is lightweight for wearing comfort, yet extremely durable to outdoor sports conditions.

HIPORA®, developed by Kolon, has created a moisture permeable, water resistant and breathable glove insert made of a polyurethane coating that shuts out moisture from the outside, but allows moisture or warm steam from the body out.

#### INSULATION

Thermore® Thermal insulation features a low density construction which is engineered to trap massive amounts of air – the most effective thermal insulator; maximizing the wearer's comfort in any circumstances.

This product consists of 7 oz. of insulation per square yard. It is made of high memory supple polyester fibers that are quilted to either a nylon or fleece inner liner that retains its thickness and performance after many wash/dry/cycles.

Designed to be compact and soft, yet resilient and refluflable, providing softer insulation that conforms to body shape for greater comfort. The DuPont patented blend of four-hole fibers allow Hollofil II to provide greater warmth without added weight.

Thermolite® Active Fiber Technology provides thin insulation for high activity, movement and warmth. Special thermal bonded fibers provide exceptional softness and a high level of warmth at minimal weight, while remaining extremely flexible and durable.

A combination of 5.5 oz. of polyester felt, 5 oz. of Airlock and a layer of Mylar.

#### OUTER SHELL

Airguard is a durable, yet soft and lightweight fabric that is easy to care for and keeps its shape even after repeated washing. It is 20% lighter than normal Polyamide 6 and Polyamide 6.6, and 52% lighter than polyester. It's unique air hole feature keeps you warm in the winter and cool in the summer.

This waterproof fabric has a very supple feel and look, but with a great tearing resistance. The 70 Denier thread is manufactured by DuPont® and the fabric is manufactured in North America.

#### VENTILATION

IVS or an Integrated Ventilation System is the only system that combines superior water resistance and maximum breathability. It has infinite adjustability allowing the wearer precise airflow control to adjust to the changing temperatures throughout the day allowing fresh dry air to exchange with humid air to keep the garment warm and dry.

CORDURA® by Dupont® – is a high-performance, super-durable fabric that is perfect for your outerwear, activewear, luggage and equipment. Cordura is resistant to abrasions, tears and scuffs and is two times more durable than standard nylon.

DENIER - the weight of a thread used to weave a fabric (ie - a thread with the length of 1000 yards, weighing 400 grams is considered 400 Denier)

COATING - Polyurethane coating is typically used on nylons for outdoor recreation. It is applied to the backside of fabrics to make them waterproof.
