

WORK ORDER FORM

1. Please complete this form, sign + date and include the original signed copy along with your slide.
2. Once we receive your slide, our billing department will contact you to confirm and for payment prior to beginning custom work.
3. Once custom work is completed, we will contact you prior to shipping.

Ship your slide to:

Design Dynamic
35175 Pashal Place
Wildomar, CA 92595

We suggest you insure your slide for it's replacement value and add tracking.

Please be sure to let us know before you ship us your slide.

Please pack your slide well to insure it is not damaged during shipment to us.

CUSTOMER NOTES:

Warranty & Customer Agreement

- Please do not ship your lower (the pistol grip) section which is an FFL item. Internal parts can remain if you cannot remove them yourself (we will remove prior to machining and re-install before returning to you unless otherwise requested).
- We must receive your slide within 2 weeks of placing your order to lock-in any special pricing quoted you.
- In the event your slide is damaged during custom work or if you are not absolutely blown-away with the work complete, Design Dynamic will exchange your factory slide with our a comparable custom billet slide cut design of the same size and model. We guarantee the quality of our custom billet slides to be that of factory or better.
- Design Dynamic cannot guarantee a set amount of time for custom work completion (lead-times can run up to 4 weeks not including Cerakote--please inquire current lead-times), however, we make every effort to complete your work order as soon as possible and will try to inform you if extended lead-time may occur. We perform work on a first-come, first-serve basis.
- You are aware and understand that any custom work performed on your slide may void your factory's warrantee.
- You understand that in order to achieve a certain cut design--any existing serial number(s) and/or factory lettering may be cut over or eliminated. We make our best effort to smooth out any remnants of factory serrations/lettering by sometimes facing down a very small amount (usually less than 0.25mm) of material from the sides/top of your slide.
- Please pack your slide well during shipment to us. Design Dynamic will not be held responsible for damage or missing components during shipment. We suggest you insure your slide during shipping.

By signing this work order, you acknowledge your understanding of the above.
