Medical Aromatherapy

Drainage, Detoxification and Organ Support

Medical Aromatherapy is the scientific and empirical application of plant essential oils to clinical pathologies. The AMD™ Method is the first systematic essential oil treatment system that arranges essential oil synergies into categories that address the fundamental imbalances of the body: terrain modification (detoxification and organ drainage), somatic and psycho-emotional. The AMD™ Method is based on the Endobiogenic system, Traditional Chinese medicine principles, the doctrine of signatures, and contemporary scientific research.

In this seminar you will learn:

- The principles of *Medical Aromatherapy*
- The concept of *Terrain*
- How to recognize and treat *organ toxicity and congestion*
- Key *meridian points* for essential oil application

Leave this seminar ready to use the AMD™ method to treat toxicity, organ dysfunction musculo-skeletal disorders, chronic pain, insomnia, panic attacks, depression, pediatric problems, and provide supportive treatments during cancer.

This seminar is open to all MD's, DO's, NP's, ND's, DC's, and LAc's.

Health is not the absence of disease...it is a vibrant balance between body, mind and spirit
