# Heat Type Labels Report
Report Definitions

This report displays labels for Energy applicants who had a residence with a selected heat type and for a selected APC tree and intake date range.   The client need not have received assistance for this heat type in the past.

**Generation of Data:**

- Dynamically – pulled from the database after it has been entered into OPUS
- Manually – this data is written or typed on the form after it has been printed.
- By Calculation – values using other values from the database.
