

Every Patient Presents Unique Challenges.

We Help You Provide Unique Solutions.

With as much as you learned in school, your own ingenuity is what makes the difference on any given day. That's because finding a way to meet the needs of *all* your patients is not something that can be taught. It requires caring and creativity. It requires a team approach. We at Specialized Care Company, understand how special *you* need to be to do what you do. And we are proud to be on your team.

Our products are uniquely designed to help you provide the standard of care to every patient. Our products position and stabilize in the dental office, and provide solutions for daily oral hygiene. We design all of our products based on input from you, our customers. We salute your efforts, and value your feedback.

We create unique products that help you provide safe, comfortable care. www.specializedcare.com

Stay N Place® Pillows

The Patient's Head and Neck Must Be Supported for Good Clinical Outcomes.

The Neck Pillow supports the neck, helps keep the head tilted back, and can also be used as a shoulder roll.

The Conforming Pillow shapes itself to each patient's neck and head, and has a center cutaway for the nape of the neck.

Plastic asepsis sheaths have a hole to allow the pillow strap to pass through, and will fit pillows A through D.

No chair can accommodate all patients equally well. If the headrest is not in just the right place, the patient's head and neck may not be properly supported. The Stay N Place® Pillows provide support you need to do your job effectively, and the comfort the patient needs to sit without fidgeting.

All our pillows have a strap that attaches behind the dental chair to keep the pillow in place, even when the patient sits forward. The pillow cover is made from a fabric that resists fluids and is easily cleaned.

A. Stay N Place® Neck Pillow

SPNP-P	Neck Pillow - Pediatric	\$36.00
SPNP-A	Neck Pillow - Adult	\$42.00

B. Stay N Place® Head Cradle

SPHC-C	Head Cradle - Child	\$39.00
SPHC-U	Head Cradle	\$41.00

C. Stay N Place® Conforming Pillow

SPCP	Conforming Pillow	\$39.00
------	-------------------	---------

D. Stay N Place® Knee Pillow

SPKP-P	Knee Pillow- Pediatric	\$42.00
SPKP-A	Knee Pillow - Adult	\$46.00

E. Stay N Place® Plastic Sheaths

SH-100	Pkg of 100 sheaths for Pillows	\$21.00
--------	--------------------------------	---------

F. Stay N Place® Toe Guard

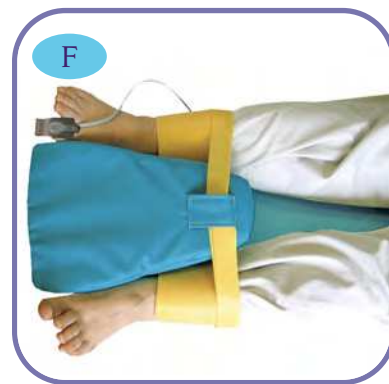

SPTG	Toe Guard	\$54.00
------	-----------	---------

The unique shape of our Head Cradle collapses against the dental chair as the patient is positioned, pushing the sides up into a "cradling" position.

The Knee Pillow makes the dental chair comfortable for all patients, and relieves pressure on the lower back.

The Toe Guard prevents the patient from using one foot to kick monitoring devices off the other foot.

Stay N Place® Booster Seat

Save Time, Save Your Back and Provide Comfort for Your Young Patients.

Do you find yourself “scooting” patients up to the top of the chair for treatment, only to have them slide back down when the chair is brought upright? Daily repetition of that scenario wreaks havoc with your back and costs time. The Stay N Place® Booster Seat gives patients an extra 5” of height, effectively solving the problem. Get one for your office - your patients will appreciate it, and so will your back! Now available in teal or cream vinyl.

Stay N Place® Booster Seat

SPBS	Stay N Place® Booster Seat (teal)	\$ 149.00
SPBSc	Stay N Place® Booster Seat (cream)	\$ 149.00

Important: Never leave patient unattended.

All of our products
are latex-free!

The Stay N Place® Booster Seat has a soft yet durable vinyl cover and a non-slip bottom for patient safety.

Stay N Place® Chair Liner

When The Dental Chair Itself Is Part Of The Problem....

The Stay N Place® Chair Liner curves in at the neck area, maximizing oral access and allowing the head to tilt back. A non-slip bottom helps it to stay in place.

When patients become fearful at the very sight of the dental chair, or when their body shape does not fit well in the chair, the Stay N Place® Chair Liner can help. It looks like a mattress (a familiar item), and has a buttery-soft vinyl cover. The soft filling displaces as the patient settles in, filling the space between the patient's body and the chair. The result? Patients are comfortable, and more likely to provide the cooperation you need. Now available in teal or cream vinyl. This item is often used in combination with the Rainbow® Stabilizing Wrap (see page 13.)

Stay N Place® Chair Liner

Stay N Place® Head & Neck Rest

Using the Patient's Chair? Be Sure The Head and Neck are Supported.

When the patient remains in his or her own chair during dental treatment, the Stay N Place® Head & Neck Rest provides support for the patient's head as it is tilted back.

The Stay N Place® Head & Neck Rest is placed behind the patient and held in place with straps behind the chair. The bottom of the device can be brought forward (away from the back of the chair) to achieve more of an angle.

This low-tech device is a real multi-tasker. It can be for in-office as well for off-site care. All of the pillows can be re-positioned for patient comfort, and any of the pillows can be removed for a particular patient. It may be cleaned with the same disinfectant used for your dental chairs. Available in teal or cream vinyl.

The handy carrying case (at the right) can be purchased separately.

Here's How It Works:

- 1** Position the Head & Neck Rest behind the patient.

- 2** Adjust the pillows for comfort, and secure the straps behind the chair.

- 3** Patient is supported for dental care without being moved from her chair.

Stay N Place® Head & Neck Rest

Stay N Place® Lap Board

Improving the Knee-to-Knee Technique for Infant Oral Exams.

Many professionals use the knee-to-knee technique for infant oral exams, however this can require awkwardly close positioning, vis-a-vis the baby's caregiver. Our lap board allows the dentist and the caregiver to maintain a comfortable distance, while providing proper support for the baby. It consists of a rigid platform, layered with foam and upholstered in soft, durable vinyl. It is easy to clean, and has a non-slip bottom for safety.

- Safe, rigid construction
- Firm, cushioned side rails
- Hygienic
- Professional-looking

Available in teal or cream.

The Stay N Place® Lap Board provides a rigid surface for the child, while allowing distance between the adults.

Stay N Place® Lap Board

RK-K Bd	Stay N Place® Knee-to-Knee Board (teal)	23"L x 15" W	\$ 102.00

SH-100/RL	Package of 100 Sheaths		\$ 29.00

Stay N Place® Lap Cushion

Lap Cushion Can Be Held Behind the Child During "Tilt Back".

As the name suggests, the Stay N Place® Lap Cushion, has a cushiony design so it can flex with the baby. It can be held behind the child as he is tilted back into the lap of the dentist, thus increasing the sense of security. Parents really appreciate the memory foam "feel". Use the sheaths listed below, or wipe down and dry with a soft cloth or paper towel.

Stay N Place® Lap Cushion

R-LAP	Stay N Place® Lap Cushion	23"L x 15" W	\$ 85.00

Stay N Place® Airway Positioners

Is "Chin-Up" a Challenge?

RAP-2: 19" long x 10.5" wide x 3" tall at the chest area.

Available in teal or cream.

RAP-3: 17" long x 11.5" wide x 3" tall at the chest area.

There are two **Stay N Place® Airway Positioners** that help to assure a "chin up" position by supporting the patient's upper torso.

The **RAP-2** has two head/neck cradles and a wedge-shaped pillow to lift the chest area. These vinyl-covered pillows can be re-positioned to accommodate a range of patients.

The **RAP-3** has a consistent degree of compression, especially important for sedation. Parents like it because it has the "feel" of a memory foam. It comes with a removable disk that decreases the amount of head tilt for smaller patients.

Stay N Place® Airway Positioner (includes head strap)

RAP-2	Stay N Place® Airway Positioner (teal)	\$ 99.00
RAP-2c	Stay N Place® Airway Positioner (cream)	\$ 99.00
RAP-3	Stay N Place® Airway Positioner	\$ 67.00
SH-100/R2	100 Protective Sheaths for all RAP styles	\$ 31.00

Open Wide® Re-Usable Mouth Prop

Allows the Clinician to Maintain Control.

The Wraparound handle on the Open Wide® Re-Usable Mouth Prop allows the clinician to control the prop and the patient's mandible at the same time.

If your patient can not maintain a reliably open mouth, you might use a mouth prop for safety. But those very patients are likely to use the tongue to dislodge the prop. Our unique mouth prop allows the clinician to maintain control with a handle that wraps to the outside of the cheek. The handle allows you to maneuver as needed, yet it curves away from the mouth, so it will not block oral access. It is made from a crush-resistant plastic and is over-molded with a soft, latex-free material for patient comfort.

A unique through-hole can be used, if desired, to hold a saliva ejector in place - no need for a second set of hands.

The **Tab** mouth prop has a handle that is smaller and more streamlined, so there's more clearance when needed. It has a hole in the tab to allow floss to be threaded through for retrieval purposes.

Both styles can be autoclaved repeatedly without getting "gummy."

See page 9 for the Open Wide® Mouth Rest (disposable.)

Latex-free!

Shown are sizes Large (green), Medium (blue) and Small (purple) with **Wraparound** handle.

Surround® Toothbrush

Cleans Lingual, Facial and Occlusal Surfaces at the Same Time.

All of our products
are latex-free!

Caregivers who brush the teeth of another person often report that lack of cooperation gets in the way of doing a thorough job. The Surround® Toothbrush has **3 bristle pads** to clean all surfaces at the same time. This means that more tooth surface can be cleaned in the time allowed. The handle is longer than most - to keep fingers out of harm's way. The full length of the Surround Toothbrush - including the head - is covered with a soft, rubber-like material to **help protect the oral environment** if the person moves unexpectedly during brushing, or falls with the brush in the mouth. The head and neck will **bend, not break** if the user bites down on the toothbrush. The soft, end-rounded bristles and **heart-shaped, compact head** make brushing safe and comfortable.

Orthodontic patients also benefit from using this brush, because the angled bristles clean better under the appliance.

Surround® Toothbrush Regular		Price/Pkg.	Price Per Brush	Savings vs Single
STB-1	Single Toothbrush	\$ 5.00	\$5.00	N/A
STB-3	3 Pack	\$ 13.00	\$4.34	13%
STB-6	6 Pack	\$ 23.00	\$3.84	23%
STB-12	Dozen Pack	\$ 42.00	\$3.50	30%
STB-72	6 Dozen	\$ 234.00	\$3.25	35%
STB-144	12 Dozen	\$ 447.00	\$3.10	38%

All Surround® Toothbrushes come in a poly bag with a reusable brush cover.

Also available in a Toddler size!

The **Toddler Size Surround® Toothbrush** features a fun, easy-to-hold handle to appeal to youngsters. The **3-bristle pad design** helps guide the brushing action of new brushers, so they learn. Just like its older sibling, the toddler size has a soft, tactile coating to reduce oral trauma if the child falls with the brush in the mouth.

Surround® Toothbrush Toddler		Price/Pkg.	Price Per Brush	Savings vs Single
STBC-1	Single Toddler Toothbrush	\$ 4.50	\$4.50	N/A
STBC-3	3 Pack - Toddler	\$ 11.75	\$3.92	13%

Open Wide® Mouth Rest

Patient Friendly Mouth Rest with Handle for Control.

Our Open Wide® Mouth Rest is useful in your office, as well as being helpful to parents and caregivers at home. It is an inexpensive option when patients lack the cooperation or motor control to keep the mouth reliably open. It has a handle to allow the user to maintain control. Yet it is comfortable and patient-friendly. It is made from a special, high-density foam that is difficult to bite through, with a rigid wooden core to add stability. Although it is "disposable" in the dental office, it can be cleaned in hot water and re-used for the same person at home.

The Thick Mouth Rest has 40% more foam..

Open Wide® Mouth Rest

Rainbow® Elbow & Knee Stabilizers

"Robot Arms" Keep Elbows & Knees in Straight Out Position.

When your patient is pre-cooperative, but the situation does not warrant full stabilization, the Rainbow® Elbow & Knee Stabilizers are often the perfect answer.

"Robot Arms" (as some of our customers call them) start out as a flat sheet and are formed into a cylinder around the arms or legs. The cylinder prevents the elbows and knees from bending, so sudden, unexpected movements are controlled, thus making it safer for all involved. These stabilizers are easy to apply and to remove, and are non-threatening for patients and parents.

The Elbow and Knee Stabilizers are also useful as an additional level of security inside the "Rainbow Wrap" when a patient is particularly agitated.

One set of stabilizers can be used on *either* elbows or knees. Where one size works on a patient's elbows, the next size up usually works on the same patient's knees. Size EKS-5L is meant for tall, thin patients (without developed biceps or thighs). Sizes EKS-6 and EKS-7 are trapezoidal shape (wider on top) for bulkier biceps or thighs.

Rainbow® Elbow & Knee Stabilizers (packaged in pairs)

Code	Size	Usage Guide	Price
EKS Individual Sizes			
Yellow & Blue			
EKS-1	10" x 6" (for 6.5" circumference limbs)	Age 1-2	\$ 22.00

The Rainbow® Stabilizing System

Unpredictable Patient Movements Put Everyone at Risk.

An unavoidable reality in dentistry is that sharp instruments are used in a small, highly vascularized area. When safe behavior is not assured for a given appointment, you owe it to your patient and to your practice to use appropriate safety equipment. The **Rainbow® Stabilizing System** is the **only** system designed specifically for the dental environment. This state-of-the-art protective device consists of a colorful, breathable mesh wrap and vinyl-covered padded board to increase both patient comfort and caregiver acceptance.

What size to buy?

Up to this approx. weight/age:

35 Pounds	(1-4 years old)
60 Pounds	(5-8 years old)
145 Pounds	(9-12 years old)
185 Pounds	(Adol/Adults)
250 Pounds	(Adol/Adults)

Recommendation

Small Board - Small Wrap
Medium Board - Medium Wrap
Large Board - Large Wrap
Large Board - X-Large wrap
Large Board - XX-Large wrap

See pages 12-15 for more details.

Now also available in a neutral "cream" vinyl, to blend with a wide variety of office decors.

Rainbow® Board

The **Rainbow® Board** is padded for patient comfort, with a buttery-soft, yet durable vinyl cover. It is available as a **Hinged Board** or a **Straight Board**. The Hinged Board conforms to the dental chair, allows the patient to be in a more upright position, and folds for easy storage.

The head portion of the board is lower than the rest of the board, allowing for a natural tilting back of the head.

The optional Rainbow® Head Tilt keeps the upper torso lifted, and the head in "chin-up" position. See page 14.

The optional Rainbow® Knee Support relieves pressure on the lower back and keeps patient positioned. See page 14.

Rainbow® Boards

Height	Width	Rainbow® Board	Code/Teal	Price/Teal	Code/Cream	Price/Cream
3 Feet	10"	Small Board	RBS	\$122.00	RBSc	\$122.00
4 Feet	11"	Medium Hinged Board	RBHM	\$150.00	RBHMc	\$150.00
4 Feet	11"	Medium Straight Board	RBM	\$150.00	RBMc	\$150.00
5 Feet	15"	Large Hinged Board	RBHL	\$220.00	RBHLc	\$220.00
5 Feet	15"	Large Straight Board	RBL	\$220.00	RBLc	\$220.00

Important:

Always use a safety belt with any stabilizing device for the safety of your patient. Remember to check any state or facility regulations on the use of stabilizers. Never leave the patient unattended.

Shown are an example of the medium hinged board, and an example of the small straight board, in our classic "teal" color. The photo at the far right shows the "cream" color vinyl.

* Knee Stabilizer Belt Not Required for Small Wrap

Rainbow® Head Stabilizer

The **Rainbow® Head Stabilizer** is a comprehensive head-control device, minimizing both up and down and side-to-side movements. It secures to the board with screws for reliable stability. Adjustable side panels accommodate a wide range of patients and tilt in at a slight angle for a snug fit. The thick side cushions allow for a bit of pressure, while maintaining patient comfort. The new, narrower head strap is edge-banded for patient comfort.

For "cream" color, please add a "c" to the codes at the right.

Accessories for Your Rainbow® System

The Rainbow® Head Tilt keeps the upper torso lifted, and the head in a “chin-up” position. The Knee Support relieves pressure on the lower back and helps keep the patient positioned. Both items have a non-slip bottom.

Both are available in a teal or cream vinyl.

Rainbow System Bags neatly store board, wrap, belts, etc. They are made of a tough canvas-like fabric for long-lasting protection, with carry straps as shown.

Rainbow® Head Tilt & Knee Support

RHT-S/M	Rainbow® Head Tilt - Small/Med (teal)	\$ 45.00
RHT-L	Rainbow® Head Tilt - Large (teal)	\$ 48.00
RKS	Rainbow® Knee/Support - One Size (teal)	\$ 48.00
RHT-S/Mc	Rainbow® Head Tilt - Small/Med (cream)	\$ 45.00
RHT-Lc	Rainbow® Head Tilt - Large (cream)	\$ 48.00
RKSc	Rainbow® Knee/Support - One Size (cream)	\$ 48.00

Rainbow® System Bags

RST-S	Rainbow® System Bag for Small System	\$ 44.00
RST-M	Rainbow® System Bag for Medium System	\$ 55.00
RST-L	Rainbow® System Bag for Large System	\$ 60.00
RST-H	Rainbow® System Bag for Hinged Systems	\$ 49.00

Replacement Items

The Rainbow® Knee Belt is used to control unsafe kicking movements. The Rainbow Wide Safety Belt serves a similar purpose, and is used around the dental chair.

Rainbow® Knee Belt, and Rainbow® Wide Safety Belt

RKB-M	Medium Knee Belt (2-sided Velcro®, 6”w by 40”L)	\$ 19.00
RKB-L	Large Knee Belt (2-sided Velcro®, 9”w by 43”L)	\$ 29.00
RKB-XL	X-Large Knee Belt (2-sided Velcro®, 9”w by 55”L)	\$ 35.00
RKB-XXL	XX-Large Knee Belt (2-sided Velcro®, 9”w by 58”L)	\$ 37.00
RWSB	Rainbow Wide Safety Belt (4”w by 60”L)	\$ 22.00

Replacement Laundry Panels (3 to a Pack)

RLP3-S/M	Laundry Panels for Small and Medium Wraps	\$ 10.00
RLP3-L	Laundry Panels for Large Wraps	\$ 11.00
RLP3-XL/XXL	Laundry Panels for XL and XXL Wraps	\$ 16.00

Rainbow® Replacement Wristlets

RWC/PR	One pair wristlets	\$ 9.00
--------	--------------------	---------

The Laundry Panel is a light-weight material to place over the Velcro Hook during laundering to prevent the hook from grabbing lint and from catching on other items.

One pair of wristlets comes with your wrap. They are listed here as extras, or replacements, because they do tend to get lost, somehow.

Note: Purchase of a Rainbow® Wrap* includes a Knee Belt, a pair of Wristlets, a Laundry Panel and a Wrap Storage Bag. (*The small wrap does not need and does not come with a Knee Belt.)

Patient Education Materials

The Protective Stabilization Model is a miniature stabilizing system, complete with “patient”. It helps you demonstrate how the patient remains safely swaddled in the Rainbow® System during treatment. It will quickly become an integral part of your informed consent procedure, especially when there is a language barrier.

Riley and the Hugging Blanket is a 12-page illustrated book about a patient who gets upset at the dental office, despite attempts at bravery. The “Hugging Blanket” is explained to Riley, who accepts its use. Over time, Riley learns to relax, and the Hugging Blanket is no longer needed. Riley is very proud!

Protective Stabilization Model

PSM	Protective Stabilization Model	\$ 49.00
HB-Pkg	Educational Package, includes 1 PSM & 3 Riley and the Hugging Blanket Books	\$ 59.00

Riley and the Hugging Blanket Child's Book

HBK-1	Riley and the Hugging Blanket Book - Single Copy	\$ 5.00
HBK-3	Riley and the Hugging Blanket Book - 3 Pack	\$ 12.00

Please specify if you want the Spanish version - same prices as English.

**“Riley” Book

in Spanish!**

DVD Training Programs for Staff/Parents

Protective Stabilization in the Dental Office: An Introduction for Dental Professionals is a 19-minute DVD that reviews the rationale for non-chemical stabilization, and demonstrates the use of specific devices during actual patient visits. *The Introduction for Parents and Guardians* is a 9-minute DVD that explains the need for safety devices, and demonstrates several common types. Its delivers a consistent message, freeing up your staff to focus on individual questions or concerns.

DVD Programs for Staff and for Parents

PS/Prof	DVD: Intro for Professionals (19 minutes)	\$ 29.00
PS/Parent	DVD: Intro for Parents (9 minutes)	\$ 29.00
PS/Combo	2-DVD set, including DVD for Parents and Professionals	\$ 49.00

The D-Termined Program of Repetitive Tasking and Familiarization provides guidance for dental professionals who wish to accommodate patients with autistic disorders.

Dr. David Tesini uses actual patient visits to demonstrate how he helps a great majority of patients with autism learn cooperation skills. Many of these patients have gone on to be treated without any special supports.

Thanks to the NLM Family Foundation, we are able to make this program available for a nominal charge.

D-Termined Program

DTP	D-Termined Program DVD (45 minutes)	\$ 9.00

The Challenges of Your Practice

Pediatric patients, and those with physical and emotional needs often require extra supports for a successful appointment.

Patients who lack cooperation skills in the office may also pose a problem for parents during daily oral hygiene.

Patients who exhibit sudden, unsafe movements during treatment could cause injury to themselves and to staff.
