<p>Bucks Fire use only</p> <p>Driver / Co-Driver.....</p> <p>Notes.....</p> <p>.....</p>	

General information for hirer.

Vehicle dimensions

Length 31.5ft (this length may prevent it accessing some sites where a tight turn is required)

Width 8.5ft

Height 12.5ft

The vehicle is supplied with a Fire Service driver / operator

Access and pitching the vehicle

The vehicle has limited ground clearance, so it is best used on level ground, preferably hardstanding, or firm, dry grass. It may be unable to access some sites if it has to go up or down a slope to do so.

With steps, etc, extended, the vehicle requires a space 6ft longer and 8ft wider than the dimensions given above.

If there doubts over access, please discuss these with the Fire Service IN ADVANCE.

Vehicle configuration

The vehicle can be provided in a variety of configurations to meet your needs, for instance;-

- Two 12 x 7ft exhibition spaces, divided by a central partition
- a 12 seat presentation facility (with or without 12 seats) plus 12 x 7ft exhibition space

Access to the vehicle is via –

- a nearside door
- steps through the opening nearside panels (optional – see photo below)
- wheelchair access via wheelchair lift at the rear

The vehicle has full presentation capabilities, eg DVD, VHS, computer, 2 x plasma screens (1 visible from outside the vehicle), surround sound and public address. It has it's own power supply and heating / air conditioning, lighting. We MAY be able to supply up to 4 folding chairs and 2 tables, if enough advance notice is given.

PLEASE NOTE that, while the vehicle carries a small stock of fire and road safety DVDs and videos, it DOES NOT carry a stock of general entertainment DVDs / CDs / videos. Hirers must supply these if required.

Please make the Fire Service fully aware of your requirements in advance as changing configurations requires a significant amount of work.

Exhibition space with side open and steps in use

Front presentation area (now with 50 inch plasma screen, not whiteboard shown)
