

Picture Box Toy Sculpture

Name: _____

This project involves creating **12 images** based on **1 theme** (Portraits, Landscapes, Still life etc.) in a picture frames and then when the paper is assembled it becomes a **Picture Box Toy Sculpture**.

STEP ONE: CHOOSE a theme for your **Picture Box Toy Sculpture**. (12 images) **RESEARCH** on-line different subject matter for source material to work from for your chosen theme.

STEP TWO: DRAW in your **3** different conceptual sketches of different **12 images** **Picture Box Toy Sculpture** themes. Consider the elements and principles of design: Line, Shape, Colour.

Have your sketches approved by the teacher before starting your sculpture. **WRITE** your **Artistic Statement Template** to document your artistic process.

STEP THREE: CREATE your chosen subject matter theme on the thicker paper and **SCAN** into the computer your work.

STEP FOUR: COPY your designs over the templates and then **PRINT** and **COLOUR** your work.

STEP FIVE: ASSEMBLE your **Picture Box Toy Sculpture** with glue and/or tape.

STEP SIX: REFLECT: Answer the following questions using the elements and principles of design:

1. What part of your finished project did you find most successful and why?
2. What part of your finished project did you find least successful and why?
3. If you had to do this project, what part would you change or improve on and why?

A1. The Creative Process: apply the creative process to create a variety of artworks, individually and/or collaboratively;

A1.1 use various strategies, individually and/or collaboratively, to generate, explore, and elaborate on ideas and to develop and revise detailed plans for the creation of art works that address a variety of creative challenges (e.g., use brainstorming, concept webs, and/or groups discussions to formulate original ideas for thematic works and/or works of personal expression; use research and discussions with a partner to explore and elaborate on ideas; use diagrams, notes, and/or outlines to help them formulate detailed plans for the art work; revise their plans on the basis of reflection)

A1.2 apply the appropriate stages of the creative process to produce and revise two- and three-dimensional art works using a variety of traditional and contemporary media (e.g., explore, experiment with, and refine their use of a variety of media; choose a medium/media

- appropriate for their planned art work; reflect on the effectiveness of preliminary versions of their work; revise their art work on the basis of reflection and useful feedback)
- A1.3 document their use of each stage of the creative process, as well as varied and extensive research, in a portfolio that includes art works created for a variety of purposes (e.g., ensure that their portfolio includes evidence of idea generation and elaboration, research, investigation, planning, exploration, experimentation, and revision; include a variety of works created for different purposes), and review and reflect on the contents of their portfolio to determine how effectively they have used the creative process
- A2. The Elements and Principles of Design: apply the elements and principles of design to create art works for the purpose of self-expression and to communicate ideas, information, and/or messages;
- A2.1 explore how elements and principle of design can be used to convey emotion and enhance personal expression, and use a combination of these elements and principles to create two- and three-dimensional art works that express personal feelings and communicate specific emotions to an audience (e.g., explore how variations in line, value, form, proportion, and emphasis can be used to convey various emotions; adapt their findings to enhance expression in their art work)
- A3. Production and Presentation: produce art works, using a variety of media/materials and traditional and emerging technologies, tools, and techniques, and demonstrate an understanding of a variety of ways of presenting their works and the works of others.
- A3.2 explore a range of traditional and current materials, technologies, techniques, and tools used by visual artists (e.g., Claude Monet's use of optical colour mixing; Andy Warhol's use of silkscreens; George Segal's use of plaster bandage; Jean-Paul Riopelle's use of a palette knife for impasto application of paint; Daphne Odjig's use of interconnecting black lines), and adapt and apply them to create original art works
- B1. The Critical Analysis Process: demonstrate an understanding of the critical analysis process by examining, interpreting, evaluating, and reflecting on various art works;
- B1.1 analyse their initial response to art works (e.g., describe their initial reaction to an art work and determine which specific aspects of the work and their personal experience led to their reaction)
- B1.2 deconstruct the visual content and the use of elements and principles of design in their own art work and the work of others (e.g., identify individual elements and principles and aspects of the visual content in an art work, interpret their function, and analyse how the artist has manipulated them to create impact, emphasis, mood, movement, and meaning; compare The Abduction of the Daughters of Leucippus by Peter Paul Rubens to the cover of a contemporary comic book about an action hero, with reference to the artists' use of colour, line, shape, value, balance, and emphasis)
- B1.3 explain, with reference to particular works, both historical and contemporary (e.g., J. M. W. Turner's Rain, Steam, and Speed: The Great Western Railway; Maya Lin's Vietnam Veterans Memorial), how knowledge of an art work's cultural and historical context, achieved through research, has clarified and enriched their understanding of the work's intent and meaning
- B1.4 describe and reflect on the qualities of their own art works and the works of others, and evaluate the effectiveness of these works, using a variety of criteria
- B2. Art, Society, and Values: demonstrate an understanding of how art works reflect the societies in which they were created, and how they can affect both social and personal values;
- B2.1 analyse the function and social impact of different kinds of art works in both past and present societies (e.g., the use of art works for ritualistic and religious purposes; for social and/or political commentary; as propaganda; as symbols of economic or social power; to commemorate people and/or historical events; to instruct)
- B2.2 explain, on the basis of research, ways in which various art works are a response to and a reflection of the societies in which they were created
- B2.3 reflect on and explain how creating and analysing art works has affected their personal identity and values and/or changed their perceptions of society and social issues (e.g., with reference to their emotional awareness and their ability to express themselves; their awareness of stereotypes; their understanding of the meaning of objects and symbols associated with a variety of cultural groups; their awareness of and relationship to their physical environment; their position on social issues such as censorship, discrimination, inequality)
- C1. Terminology: demonstrate an understanding of, and use correct terminology when referring to, elements, principles, and other components related to visual arts;
- C1.1 demonstrate an understanding of the elements and principles of design, and use terminology related to these elements and principles correctly and appropriately when creating or analysing art works (e.g., when describing how they have used elements and principles in a sculpture to convey a sense of movement)
- C1.3 using appropriate terminology, explain the creative process and describe in detail the critical analysis process, with particular reference to the role of deconstruction in the latter process
- C2. Conventions and Techniques: demonstrate an understanding of conventions and techniques used in the creation of visual art works;
- C2.1 demonstrate an understanding of a wide variety of techniques that artists use to achieve a range of specific effects (e.g., techniques used to create the illusion of depth and perspective and to create texture on different surfaces; the use of additive and subtractive sculpture, layering, positive and negative space, and relief to create effects)
- C2.2 demonstrate an understanding of a variety of conventions used in visual arts (e.g., allegory, expressive exaggeration, juxtaposition, synectics; conventions associated with heroic, narrative, naturalistic, propaganda, realistic, and satirical art), and explain how they are used in different types of art works
- C3. Responsible Practices: demonstrate an understanding of responsible practices in visual Arts.
