

CURRICULUM VITAE

FORMATO EUROPEO/EUROPEAN FORMAT

INFORMAZIONI PERSONALI/ PERSONAL INFORMATION

Nome, Cognome/Name, Surname	Jonathan E Spanier
Indirizzo/Address Via, numero civico, c.a.p., città, nazione/ House number, street name, postcode, city, country	43 Llanberis Road, Bala Cynwyd PA 19004 USA
Telefono/Telephone	+1.610.747.0439 (home), +1.215.895.2301 (office)
Fax	+1.215.895.6760
E-mail	spanier@drexel.edu
Sito web/Website	meso.materials.drexel.edu/mml
Nazionalità/Nationality	US
Luogo e data di nascita/ Place and Date of birth	Atlantic City, NJ 22 FEBURARY 1969

ESPERIENZA PROFESSIONALE/ WORK EXPERIENCE

Se dipendente CNR indicare:	N. MATRICOLA QUALIFICA LIVELLO
In ordine di data /Dates (from – to)	Associate Dean, 2011-present, College of Engineering, Drexel University, Philadelphia PA Associate Professor, 2007-present, Dept of Materials Science & Engineering, Drexel University, Philadelphia PA University Provost Fellow, 2009 Assistant Professor, 2003-2007, (same) Affiliated faculty, Department of Electrical and Computer Engineering (2005-) Affiliated faculty, Dept of Mechanical Engineering and Mechanics (2004-)
[Iniziare con le più recenti ed elencare separatamente ciascun incarico ricoperto/ Add separate entries for each relevant post occupied, starting with the most recent]	Visiting lecturer at the Technion, the Israel Institute of Technology, in 2001

Nome e indirizzo del datore di lavoro / Name and address of employer	Drexel University, 3141 Chestnut Street, Philadelphia PA 19104 USA
Tipo o settore di attività / Type of business or sector	academe
Funzione o posto occupato / Occupation or position held	Associate Professor
Principali mansioni e responsabilità /	research, teaching, supervision of postdoctoral researchers and graduate students,

Main activities and responsibilities	administration, recruiting, other duties as assigned
In ordine di data /Dates (from – to)	1994-2001
[Add separate entries for each relevant post occupied, starting with the most recent]	
Nome e indirizzo del datore di lavoro / Name and address of employer	Kulite Semiconductor Products
Tipo o settore di attività / Type of business or sector	Semiconductors
Funzione o posto occupato / Occupation or position held	Research Staff
Principali mansioni e responsabilità / Main activities and responsibilities	Research Staff on Semiconductors
In ordine di data /Dates (from – to)	1990-94
[Add separate entries for each relevant post occupied, starting with the most recent]	
Nome e indirizzo del datore di lavoro / Name and address of employer	US Naval Research Laboratory
Tipo o settore di attività / Type of business or sector	
Funzione o posto occupato / Occupation or position held	Research Engineer
Principali mansioni e responsabilità / Main activities and responsibilities	Research Engineer in the field of condensed matter

ISTRUZIONE E FORMAZIONE / EDUCATION AND TRAINING

In ordine di data /Dates (from – to)	2001-2003
[Add separate entries for each relevant course you have completed, starting with the most recent]	
Nome e tipo d'istituto di istruzione o formazione / Name and type of organisation providing education and training	Harvard University, Dept of Chemistry
Principali materie e competenze professionali apprese / Principal subjects occupational skills covered	physical chemistry
Certificato o diploma ottenuto /Title of qualification awarded	Postdoctoral Research Fellowship
Livello nella classificazione nazionale o internazionale / Level in National classification	N/A
In ordine di data /Dates (from – to)	1994-2001
[Add separate entries for each relevant course you have completed, starting with the most recent.]	
Nome e tipo d'istituto di istruzione o formazione / Name and type of organisation providing education and training	Columbia University in the City of New York
Principali materie e competenze professionali apprese / Principal	applied physics (condensed matter), with Distinction

subjects / occupational skills covered Certificato o diploma ottenuto /Title of qualification awarded	PhD
Livello nella classificazione nazionale o internazionale / Level in National classification	N/A
Certificato o diploma ottenuto /Title of qualification awarded	BA degree in Physics from Drew University in Madison, NJ

ATTIVITA' DI RICERCA / RESEARCH ACTIVITIES

Attuali campi di ricerca / Research sectors	Nanoscience & nanotechnology, electronic and photonic materials, oxides and functional materials
	Professor Spanier applies a variety of experimental methods, including variable-temperature and multi-channel scanning proximal probes, Raman scattering spectroscopy, and high-resolution electron and ion-beam microscopy and nano-fabrication.
	Current research interests include the synthesis of, and collective electronic, optical and functional properties in individual single- and multi-component inorganic nanostructures, and in thin-film materials and devices.
Recenti attività scientifiche/ Recent Scientific Activities.	Electronic transport, laser spectroscopy, device fabrication, characterization, nanomaterials and thin-film growth.
	Investigation of the electronic and optoelectronic properties of nanostructured and ultra thin film semiconductor materials, particularly core-shell III-V nanowires, multifunctional materials and complex oxide thin films. Materials and ecologically-friendly process design, growth and structural and property characterization of chalcogenide nanowires, oxide perovskite and complex oxide perovskite thin films, particularly for solar energy conversion. Professor Spanier uses expertise in variable-temperature transport and nanodevice fabrication to investigate novel tunable non-linear (negative differential resistance) carrier transport in core-shell nanowires; scanning/proximal probe microscopy; uses photoluminescence, photocurrent and inelastic light (Raman and Brillouin) scattering spectroscopy techniques to study electronic and optoelectronic properties and local electronic structure and defects. Developing new low-cost and low vacuum atomic layer deposition methods for producing oxide perovskite thin films of exceptionally high quality.

ULTERIORI INFORMAZIONI / ADDITIONAL INFORMATION

Professor Spanier is the recipient of the prestigious US Presidential Early Career Award for Scientists and Engineers (PECASE), presented at the White House, and the US Army Research Office Young Investigator Award, an ONR Summer Faculty Fellowship, the Outstanding Alumni Award in the Sciences, Drew University, the Outstanding Research Award in MSE, the TMS Young Faculty Award Honorable Mention, and other honors (please refer to meso.materials.drexel.edu for full biography).

Professor Spanier was a co-chair of the E-MRS Centennial Meeting session in Warsaw celebrating the birth of C. V. Raman. He will be Co-Chair of an upcoming MRS Spring Symposium in 2014 in San Francisco on the topic of Semiconductor Nanowires.

Professor Spanier and his collaborators are inventors of new semiconducting ferroelectric materials for solar energy conversion, of new atomic layer deposition technology for producing heteroepitaxial perovskite oxides with coherency of atomic planes across the substrate-thin film interface, and nonlinear nanoscale devices for tuning negative differential resistance and device phase, at room temperature, based on semiconductor nanowires.

Professor Spanier currently serves as Associate Dean of the College of Engineering, leading in strategic planning and in the core instrumentation facilities for materials characterization and micro/nano-fabrication. He leads an international faculty and student mobility program (US Dept of Education and EU ATLANTIS) Engineers as Global Leaders in Energy Sustainability, with the Universidad Politecnica de Madrid and the Politecnico di Milano.

His work is currently supported by the National Science Foundation (NSF), the US Army Research Office (ARO), the Defense Advanced Research Projects Agency (DARPA), the MITRE Corporation, Air Products Corporation, Structured Materials Industries, Inc., and the Department of Health of the Commonwealth of Pennsylvania.

Professor Spanier is a member of the American Physical Society, the American Chemical Society and the Materials Research Society.

 6. "Optical Properties of Nanoscale and Nanoparticle Oxide Materials," Technion, Israel Inst. of Technology, Haifa, Israel, May 31, 2001.
 5. "Optical and Electrochemical Studies and Novel Applications of Porous SiC," Technion, May 24, 2001.
 4. "Optical and Electrochemical Properties of Nanoscale Materials," Dept. of Materials Science, Northwestern Univ., Evanston, IL, April, 2001.
 3. "Optical and Electrochemical Properties of Nanoscale Materials," Dept. of Physics, Univ. of Pennsylvania, Condensed Matter Groups, Phila., PA, April, 2001.
 2. "Optical and Electrochemical Properties of Nanoscale Materials," Harvard University Park Group, Cambridge MA, April, 2001.

1. "Properties of Luminescent Nanoporous Silicon Carbide," Dept. of Physics, Drew University, Madison, NJ, Nov. 11, 1997.

Selected contributed lectures/presentations

30. "Carrier transport in MOVPE-grown GaAs and core-shell GaAs/AlGaAs nanowires," poster presented by Guannan Chen, M11.55, MRS Fall Meeting, 2009.
29. "Finite curvature mediated ferroelectricity in co-axial nanowires," poster presented by PhD student Stephen Nonnenmann, presentation M16.33, MRS Fall Meeting, 2009.
28. "Co@CoO@Au core-multishell nanocrystals," poster presented by PhD student Stephanie Johnson.
27. "Photoluminescence spectroscopy of a 2D electron-hole gas heterostructure," talk presented by PhD student Eric Gallo, Presentation O5.5, MRS Fall Meeting, 2009.
26. "Electron beam induced current microscopy of Ge nanowires," talk presented by PhD student T.McGuckin, Presentation O6.4, MRS Fall Meeting, 2009.
25. "Characterization of monolithic and compositionally graded multilayer BST thin films," poster presentation at the XVIII International Materials Research Congress, Cancun Mexico 8/2009
24. "Ferroelectricity in ultrathin oxide perovskite nano-shells," contributed presentation at the Villa Conference on Complex Oxide Heterostructures, St. Thomas, US VI
23. "Atomic layer deposition of ferroelectric oxide perovskite thin films," poster presentation at the Villa Conference on Complex Oxide Heterostructures, St. Thomas US VI
22. "Finite curvature-driven giant ferroelectric response in co-axial cylindrical nanostructures," poster presentation at the Fall MRS Meeting Boston MA December, 2008.
21. "Instability and Transport of Metal Catalyst in the Growth of Silicon Nanostructures," Abstract No. L7.18, Materials Research Society Fall Meeting, Boston, MA, Nov. 29, 2006.
20. "Growth and characterisation of magnetron sputtered alumina – zirconia thin films", D. H. Trinh, M. Ottosson, M. Beckers, M. Collin, I. Reineck, S.S. Nonnenmann, J.E. Spanier, L. Hultman, H. Höglberg, The 53rd Annual American Vacuum Society Symposium, San Francisco, Nov., 2006.
19. "Local Density of States in Nanoscale Systems Measured by Electrostatic Force Microscopy," APS March Meeting, Baltimore, MD, Abstract No. U31.00012, March 2006.
18. "Adsorbate-Induced Ferroelectricity in Nanostructures," APS March Meeting, Baltimore, MD, Abstract No. G37.00001, March 14, 2006.
17. "Enhanced Raman Scattering from Individual Semiconductor Nanocones and Nanowires," APS March Meeting, Baltimore, MD, Abstract No. D31.00001, March 13, 2006.
16. "Synthesis and Characterization of Diamond-Hexagonal Si and Ge Nanocones," (poster), Materials Research Society (MRS) Fall Meeting, Boston, MA, Abstract No. P3.15, 2005.
15. "Ferroelectricity in Nanowires: Finite-Size Scaling and Screening," 2005 Workshop on the Fundamental Physics of Ferroelectrics, Williamsburg, VA, February 7, 2005.
14. "Acquisition of a Zyvex L100 nanomanipulation device for biological, electronic, and optoelectronic samples and devices." Design, Service and Manufacturing Research and Grantees Conference, January 2005.
13. "First-order Raman scattering from the MAX phases," MRS Fall Meeting, Boston MA, Abstract No. FF4.9, November 30, 2004.
12. "Ferroelectricity in Individual Barium Titanate Nanowires," MRS Fall Meeting, Boston, MA, Abstract N12.10, Dec. 4, 2003.
11. "Ferroelectric phase transition of individual barium titanate nanowires," APS March Meeting, Austin, TX Abstract A19.014, March 3, 2003.

10. "Size-Dependent Properties of CeO_{2-y} Nanoparticles as Studied by Raman Scattering," Nanostructured Materials: Present Science and Future Technology, MRSEC/IGERT Symposium at Columbia Univ., New York, June 22, 2001.
9. "Size-Dependent Properties of Nanoparticle CeO_{2-y}," Nanoscience: Underlying Physical Concepts and Phenomena, Arthur M. Sackler Colloquia, National Academy of Sciences, Washington, DC, May 18, 2001.
8. "Application of Electrochemical Impedance Spectroscopy to the Study of *n* and *p*-type SiC Electrodes During Anodic Dissolution," 197th Meeting of the Electrochem. Soc., Toronto, Canada, Abstract 1302, May 17, 2000.
7. "Raman Scattering From Vapor Phase Epitaxial Growth of SiC on Porous 6H-SiC," 197th Meeting of the Electrochem. Soc., Toronto, Canada, Abstract 422, May 16, 2000.
6. "Mean-field Dielectric Function Modeling of Porous SiC Using a Statistical Approach," MRS Fall Meeting, 7. Boston, MA, Abstract F5.32, Dec. 1, 1998.
5. "Low Pressure Chemical Vapor Deposition Patterned Oxide Film Deposition in Mechanically Masked Systems," MRS Fall Meeting, Boston, MA, Abstract OO12.9, Dec. 2, 1998.
4. "Infrared Reflection Spectroscopy of As-Anodized and Passivated 6H and 4H Porous SiC," Porous Semiconductors: Science & Technology, Mallorca, Spain, Abstract O-44, March 17, 1998.
3. "Optical Properties of As-Anodized and Passivated 6H and 4H Porous SiC," MRS Fall Meeting, Boston, MA, Abstract H12.2, Dec. 3, 1997.
2. "Effects of Nanocrystalline Structure and Passivation on the Photoluminescent Properties of Porous SiC," MRS Fall Meeting, Boston, MA, Abstract Q20.28, Dec. 5, 1996.
1. "Experimental Investigation of Enhancements in Scattered Pressure Field of Fluid-Loaded Shell with Periodic Structure," 125th Meeting of the Acoustical Society of America, Ottawa, Canada, Abstract 5aSA10, May, 1993.

TRATTAMENTO DEI DATI PERSONALI, INFORMATIVA E CONSENSO

Il D.Lgs. 30/6/2003, n. 196 "*Codice in materia di protezione dei dati personali*" regola il trattamento dei dati personali, con particolare riferimento alla riservatezza, all'identità personale e al diritto di protezione dei dati personali; l'interessato deve essere previamente informato del trattamento.

La norma in considerazione intende come "trattamento" qualunque operazione o complesso di operazioni concernenti la raccolta, la registrazione, l'organizzazione, la conservazione, la consultazione, l'elaborazione, la modifica, la selezione, l'estrazione, il raffronto, l'utilizzo, l'interconnessione, il blocco, la comunicazione, la diffusione, la cancellazione e la distruzione di dati, anche se non registrati in una banca dati.

In relazione a quanto riportato, autorizzo il CNR al trattamento dei dati contenuti nel presente *curriculum vitae* e nella documentazione della quale fa parte integrante, sollevandolo da ogni responsabilità e autorizzandolo alla pubblicazione, nel sito web del CNR, della relazione inerente alle proprie ricerche svolte durante il soggiorno finanziato dal CNR nell'ambito del Programma STM. Inoltre acconsento all'aggiornamento delle informazioni intranet che mi riguardano sia relative le pubblicazioni sia alle ricerche svolte.

Si, acconsento
