Thursday, April 21, 2016

Pre-session: 1:00-5:00 p.m.

Hospital Rampage Shooter

Captain Michael Prodan, BS, Special Agent in Charge, Criminal Investigative Profiler of the South Carolina Law Enforcement Division's Behavioral Science Unit. He has served with the South Carolina Law Enforcement Division - Behavioral Science Unit since 1998. Capt. Prodan is one of only 34 graduates worldwide of the FBI's Police Fellowship in Criminal Investigative Profiling and Crime Scene Analysis at the National Center for the Analysis of Violent Crime. He has also attended training with the United States Secret Service at their National Threat Assessment Center in Washington, DC. He is currently a member of the Association of Threat Assessment Professionals and has investigated, assessed and managed over 800 threatening and inappropriate communications to elected and government officials, media personalities and citizens.

Objectives: Explain the concept of targeted violence

Discuss targeted violence in a medical setting and the appropriate response by healthcare providers

Agenda:

12:30 pm Registration/Sign In

1:00 Pathways to Violence, Pre-Attack Behaviors

3:00 Violence in Medical Settings, Response by Medical Personnel

5:00-7:30 p.m.

Opening Reception with Exhibitors and Registration

Sponsored by

Friday, April 22, 2016

7:00-8:00 a.m.

Registration & Continental Breakfast

Time	TOPIC	SPEAKER
8:00-8:15 a.m.	Opening Ceremony/Welcome	
8:15-9:15 a.m.	 <p>Keynote: Bringing Emergency Nursing Together: How your professional organization represents you!</p> <p>The purpose of this session is discuss the key clinical priorities of the Emergency Nurses Association and its global impact during as seen by the 2015 ENA President, that includes care of behavioral health patients, retention of ED nurses, improving throughput, healthcare migration, violence, and the strategic pillars of ENA.</p> <p><i>Objective: Describe the clinical priorities/clinical practice issues of ENA, global healthcare issues, and the strategic planning goals for ENA.</i></p>	Matthew F. Powers, MS BSN RN MICP CEN, 2015 ENA President/Interim Executive Director, Emergency Nurses Association, Des Plaines, Ill.
9:15-10:15 a.m.	Exhibits open- Coffee Break	
10:30-11:30 a.m.		
Leadership	<p>Outsmarting Your Negative Brain</p> <p>The brain has a built in "negativity bias" and stress often reinforces this negative bias. By understanding our brains when they are stressed, participants will learn how to outsmart the negative intrusive thoughts that keep us in a fatigued state of mind.</p> <p><i>Objective: Develop initial strategies to address and overcome the stressful effects of working in emergency nursing.</i></p>	Daniel E. Doherty, MSN, RN, CEN, Staff Development Specialist Christiana Health Care Systems, Newark, DE
Clinical	<p>Differential Diagnosis</p> <p>The purpose of this session is to enable the learner to differentiate medical diagnoses with overlapping symptoms, such as DKA and HHNK, Thyroid storm versus Myxedema coma, etc. Bulleted lists, charts, mnemonics, tips, pearls and memory aids to help the nurse discern the disorders, and retain the knowledge for future identification will be provided.</p> <p><i>Objective: Predict the medical diagnosis based upon symptoms, so accurate and timely treatment can be delivered to the patient.</i></p>	Pamela D. Bartley, BSN, RN, CEN, CCRN, CPEN Nurse Educator and CEO of PDB Nurse Education, LLC, Prosperity, SC
Forensics	<p>Abuse, Accident or Anatomy: Pediatric Sexual Assault Case Reviews Part 1</p> <p>Part one of two sessions will begin with an overview of normal pediatric anogenital anatomy and sexual maturation scale categorizations, identification of pediatric genital anatomy and common ailments that are mistaken for abuse.</p> <p><i>Objective: Discuss the classification of pediatric sexual abuse findings.</i></p>	Angie Alexander, MSN, RN, CEN, SANE-A, SANE-P, AFN-BC, Forensic Program Coord., Carolinas Medical Center, Charlotte, NC

11:45-12:45 p.m.		
Leadership	ED Vision 2080: How a Fictional ED Designed for the Year 2080 Applies to Current ED Design The purpose of this session to push the participants to “think WAY outside the box” regarding how Emergency Departments might be designed in the year 2080, 60 years in the future, and how these high-tech/high-touch solutions may provide an insight into how EDs should be designed today to incorporate cutting edge technologies while still supporting the human factors that make each project a success. <i>Objective: describe how futuristic operational and design concepts are shaping today’s ED designs.</i>	John Huddy, BA, AIA, NCARB President and Senior ED Designer Huddy HealthCare Solutions, LLC Fort Mill, SC
Clinical	Reefer Madness We will explore the history of the cultivation, use and effects of marijuana throughout various cultures and societies of the world. There will a discussion regarding the most current statistics regarding the frequency and prevalence of use of a variety of substances in a non-medicinal manner and the implications for the emergency department nurse. <i>Objective: Discuss the health risks of cannabis, opioid and alcohol use and abuse.</i>	Andrew A. Galvin, ENP-BC, ACNP-BC, CEN Emergency & Acute Care Nurse Practitioner, ApolloMD, Blacksburg, VA
Forensics	Abuse, Accident or Anatomy: Pediatric Sexual Assault Case Reviews Part 2 In the second part of this series, we will examine forensic photography of patients and identify pattern injuries, common ailments that mimic abuse, normal exam findings, and intentional infliction of abuse. <i>Objective: Review cases of genital injuries, maltreatment and medical conditions that mimic sexual assault.</i>	Angie Alexander, MSN, RN, CEN, SANE-A, SANE-P, AFN-BC
12:45-1:45 p.m. Lunch with Exhibitors		
2:00-3:00 p.m.		
Leadership	Putting the ED on Auto Pilot The purpose of this activity is to understand the opportunity emerging real time technologies have to transform the patient experience and staff workflow by reducing waste, integrating systems, and provide a means to effectively alert staff to critical conditions and safety events. <i>Objective: Identify two ways in which new technologies can impact workflow.</i>	Mary Jagim, MS, RN, CEN, FAEN, CNO, Infinite Leap, Moorehead, MN
Clinical	Sepsis Sepsis is a leading cause of in-hospital mortality. Admission to the ICU with sepsis has mortality 6 times higher than STEMI and 5 times higher than stroke. The ability to improve outcomes from sepsis relies on early and accurate identification and adherence to Surviving Sepsis Campaign guidelines. The purpose of this session is to enable the learner to more accurately recognize and treat sepsis. <i>Objective: Summarize the current treatment recommends for sepsis.</i>	Colt F. Shope, BSN, RN, Sepsis Coordinator, Greenville Health System Greenville, SC
Forensics	Pediatric Rashes Due to the decrease in vaccination rates nationwide, pediatric illnesses, such as measles, are increasing. Pediatric patients have the potential to be evaluated at the Emergency Department. Emergency Department RNs and staff should have a clear understanding of rashes and disease processes in order to provide the best patient care. The purpose of this activity/session is to enable the learner to enable the learner to correctly identify pediatric rashes, their pathophysiology, and treatment. <i>Objective: Discuss appropriate treatment for rashes, including any special considerations while in the ER.</i>	Rebecca Biersbach, DNP, FNP-C, Family Nurse Practitioner at Wythe Physician Practices-Family Care at Fort Chiswell, VA
3:15-4:15 p.m.		
Leadership	Kickstarting Conversation: Building Trust & Respect Quickly When you only have minutes to connect and make a difference. This session is designed to coach even the best communicator on how to begin an interaction. <i>Objective: Practice communication techniques to build trust and respect.</i>	Charles “Chuck” Lamothe Jr. Med, BSN, RN, WakeMed Rehab Admissions & Referral Development, President, Charles Arman Edutainment & Consulting, Raleigh, NC

Clinical	Bring Out Your Dead Join in on a discussion about a variety of communicable diseases that have been associated with pandemic outbreaks throughout recorded history such as plague, influenza and malaria. There will be a brief discussion regarding some of the more recently reported outbreaks of Ebola and its resultant “media frenzy”. The pathophysiology and clinical signs and symptoms of specific infectious illnesses such as plague, influenza and Ebola will be reviewed as well as the current recommended treatment options. <i>Objective: Describe various communicable diseases that resulted in pandemic outbreaks throughout recorded history and their impact on society and medicine.</i>	Andrew A. Galvin, ENP-BC, ACNP-BC, CEN
Forensics	Gunshot Wounds Knowledge of wound patterns, atypical wounding patterns and being able to recognize the limitations of wound pattern analysis is important for accurate documentation and reporting for forensic nurses. The purpose of this exercise is to improve knowledge of gunshot wound that might be seen in forensic nursing. <i>Objective: Identify the limitations of wound interpretation related to gunshot wounds.</i>	James Fulcher, MD, Medical Examiner, Pathology Associates, Greenville, SC

4:30-5:30 p.m.

Leadership	Motivational Strategies for Change Gain a better understanding of change in this dynamic presentation. Explore the different types of change, how to remain fearless in the face of change and how to motivate others to change. <i>Objective: Explore the different types of change motivational strategies for change.</i>	Charles “Chuck” Lamothe Jr. Med, BSN, RN
Clinical	Pesticides, Are You Exposed? Billions of pounds of pesticides are used in the U.S. yearly, with 33% of those being organophosphates. Emergency nurses need to be able to Recognize and appropriate respond to the subtle signs of a chemical exposure. <i>Objective: Identify the immediate actions to protect your patients and yourself from contamination and prevent further sequelae.</i>	Pamela D. Bartley, BSN, RN, CEN, CCRN, CPEN
Forensics	Pediatric Psych: “Not just ADHD” Mental health disorders are increasing, and more children are being treated with psychiatric medications. The medications used have potentially serious side effects. Emergency nurses need to have a better understanding of these medications and mental health disorders in pediatrics. <i>Objective: Discuss the use of pharmacologic management of these disorders and potentially serious side effects.</i>	Rebecca Biersbach, DNP, FNP-C

7:00-10:00 p.m. “Feeling Groovy” Party

Get your Groove On; pull on your bell bottoms, peace necklaces, or polyester! Join us for dinner, dancing, and jail break with a donation to the ENA Foundation. 1960’s attire encouraged. Guest tickets available (sorry no children allowed at this event)

Saturday, April 23

7:15-8:15 a.m. Registration/Continental Breakfast

8:15-9:15 a.m.

Plenary	Battlefield to Bedside: Trauma Lessons Learned from Iraq and Afghanistan We will discuss the science and applicability of some of the most valuable lessons learned during the conflicts in Iraq and Afghanistan, and their applicability to civilian trauma systems. <i>Objective: Discuss the importance of integrating a comprehensive trauma system into a civilian emergency medical system.</i>	Joseph Kotora, DO, MPH, Board Certified Emergency Physician, Camp Lejeune, NC
---------	--	---

9:20-10:20 a.m.		
Plenary	Human Trafficking: Would you know it if you saw it? The purpose of this session is to bring awareness of human trafficking in the US and to enable the learner to recognize signs of a human trafficking, how to screen for HT and then what to do when they have identified a victim. <i>Objective: Describe signs and red flags for trafficked victims and traffickers and the nurses' role in reporting.</i>	Investigator Shannon Piller, Greenville County Sheriff's Office, Greenville, SC
10:35-11:35 a.m.		
Leadership	There's an App for That: Medical information right at your fingertips The growth and use of mobile devices to access the information is changing the information-seeking behaviors of stretcherside nurses. This session will look at issues and consideration that nurses should make when accessing information on mobile devices. This is the one and only session where participants will be encouraged to play on their phones. <i>Objective: Identify 5 mobile medical applications that can be utilized in your work environment.</i>	Kevin McFarlane, MSN, RN, CEN,CPEN Nurse Manager New Mexico VA Medical Center, Albuquerque, NM
Clinical	To Clot or Not to Clot: The Challenges of Patients on Anti-Coagulants ED Nurses are now encountering many patients on newer anti-coagulants that are not easily reversed which makes treating patients, especially those bleeding, challenging and often requires extra vigilance with monitoring learner to gain an understanding of the different anti-coagulant drugs, their mechanism on the clotting cascade, how they impact patient care and treatments for reversal <i>Objective: Discuss the challenges to caring for patients taking anti-coagulants</i>	Cathie Osika Landreth, MS, RN, CCRN, CEN Clinical Practice Specialist Emergency Services, Greenville Health System Greenville, SC
Forensic	A Review of Forensic Issues for SANE This session will present a review of select nursing and forensic issues confronting the practice of the Sexual Assault Nurse Examiner. Issues such as injury identification, use of alternate light sources, use of toluidine blue dye and interpretation for the medical and legal setting will be discussed. <i>Objective: Discuss use of the literature in supporting or refuting the interpretation of examination findings in the medical and legal setting.</i>	Debbie Flowers, MSN, CPNP-PC, SANE-A, SANE-P Clinical Assistant Professor-Program Coordinator/Nurse Consultant UNC-CH Department of Pediatrics – NC Child Medical Evaluation Program, Chapel Hill, NC
11:45-12:45 p.m.	Lunch and networking sessions	
1:00-2:00 p.m.		
Leadership	Tailoring Quality Initiatives The purpose of this session is to enable the learner understand differences between inpatient initiatives and the most effective way to work with hospital leaders to tailor those initiatives for the ED setting. The presenter will discuss three successful projects and how to implement them in your department. <i>Objective: Discuss the role of a safety rounder in the ED in order to identify and mitigate potential harm.</i>	Ron Kraus, MSN, RN, CEN, ACNS-BC, Clinical Nurse Specialist, Indiana University Health Methodist Hospital, IN
Clinical	Why do We Need to Transfer this Stroke Patient? Indications for Advance Care at Comprehensive Stroke Centers The purpose of this activity/session is to enable the learner to understand the expanding role of neuro endovascular intervention and other neuro surgical and non-surgical treatments available to patients at Comprehensive Stroke Centers that improve out comes in the Acute Stroke patient. <i>Objective: Discuss the role of Neuro Endovascular intervention in the Acute Ischemic Stroke (AIS) patient.</i>	Ray Bennett, BSN, RN, SCRn, CEN, CFRN, CTRN, NREMT-P, Stroke Center Coordinator, Robert Wood Johnson University Hospital, Burlington, NJ
Forensic	Management of the Patient in Police Custody <i>Address the most common and most dangerous situations that emergency medicine health care practitioners see for patients under arrest or in police custody. Specific attention will focus on the topics of excited delirium, hospital-associated shootings, novel drugs of abuse, patients presenting with injuries from less than lethal weapons</i> <i>Objective: Identify and mitigate general dangers/areas of concern regarding patients in police custody.</i>	Joseph Kotora, DO, MPH

2:15-3:15 p.m.		
Leadership	Social Media, Thanks for Sharing In this presentation we will discuss the exponentially growing numbers of social media outlets that can be a potential landmine for today's emergency nurses and discuss the changes in online behaviors; what professionals young and old should do to help protect not only their reputations, but also the reputation of the industry as a whole. <i>Objective: Discuss how to use social media to create a professional image and digital footprint.</i>	Kevin McFarlane, MSN, RN, CEN, CPEN
Clinical	Alphabet Soup of Stroke Assessment in the Care of the Acute Stroke Patient The purpose of this session is to enable the learner to improve their ability to effectively use various stroke assessment scales and techniques to perform a detailed assessment of the Acute Stroke patient" <i>Objective: Modify Stroke assessment tools and scales to assess challenging and/or complicated patients.</i>	Ray Bennett, BSN, RN, SCRNP, CEN, CFRN, CTRN, NREMT-P
Forensic	The importance of the Nursing Role in Evaluating Caregiver-Fabricated Illness (aka Munchausen Syndrome by Proxy, Medical Child Abuse) This session will examine the nursing role in the evaluation of children who are suspected of being subjected to caregivers seeking medical care for children through exaggeration, fabrication and inducing symptoms of illness. This type of child abuse is harmful to children and can result in significant increased morbidity and mortality. <i>Objective: Describe the process for reporting concerns to the local child welfare agency when concerns for Caregiver-Fabricated Illness are occurring.</i>	Debbie Flowers, MSN, CPNP-PC, SANE-A, SANE-P
3:30-4:30 p.m. Closing Session: Stress and Resilience of Emergency Nurses Involved in Trauma Care Patricia K Howard, PhD, RN, CEN, CPEN, NE-BC, FAEN, FAAN, Enterprise Director Emergency Services UK HealthCare, Lexington, KY and 2005 President of ENA. In this closing session we will explore the stress and resilience experienced by emergency nurses following the trauma care of traumatically injured patients. <i>Objective: Synthesize signs of resilience experienced by emergency nurses.</i>		
4:30-5:00 p.m. Closing Announcements, Door Prizes		

Please note, we love our children, however, we do not permit children to attend the lectures or attend social functions where alcohol is served. Please contact the hotel to make arrangements for child care services as needed.

Weather in Greenville, SC: We expect the temperature to range from the mid-50's to mid-70's degrees in April.
