Baden Perfection Footballs

Baden Perfection™ Series D1 Leather Football

Premium Grade Horween® Leather:

For those seeking the performance of traditional leather, the Perfection™ D1(F7000L) features the optimum part of the cowhide – the area around the spine and shoulders.

Spiral Zone™ Radius

Pure tight spirals...They don't just look good; they are proven to be more aerodynamic in flight. Baden's design team is immersed in the science of a tight spiral, your quarterback simply throws naturally and the likely result is a beautiful and aerodynamically efficient spiral.

QB Seam™

The Baden Perfection™ is constructed with rigid seams so that a quarterback's middle and index fingers – which are not placed on the laces in the standard throwing grip – have a slight "trigger" edge from which to apply greater torque and achieve faster-rotating spirals.

Grip-Tech™ Lace

The Baden lace has been designed with precisely the optimal thickness, height and spacing. Additionally, as competitors use slick composite material for their laces, Baden's exclusive textured material provides the best grip under wet conditions.

Five-Ply Liner

Maintaining size and shape is the job of the internal liner, sewn just inside the cover material. In an industry-standard elongation test, Baden's new proprietary liner tested 63% stronger than the liner used by the leading competitor.

Size

Whether your quarterback is a tall pocket-passer with large hands or a shorter mobile athlete with small hands, extensive surveys indicate quarterbacks prefer a smaller football. Baden's official football is made to the absolute minimum specs allowed.

SureGrip™ Stripes & Graphics

Baden's exclusive SureGrip™ stripes and graphic treatment produces a specially formulated, tackified, pebbled surface that ensures a consistent, reliable grip in all playing conditions.

F7000L

Baden Perfection™ Advanced Microfiber Football

Has all of the same features of the Perfection Leather except an Advanced Microfiber cover. When durability is of greatest concern and performance cannot be compromised, the Perfection™ F700M is in a category by itself. Whereas composite footballs shed water much like a raincoat and are therefore slick like a raincoat when moist or wet, the F700M features Baden's breathable Moisture Management System™ that performs vastly superior to composite footballs in both controlled water tests and in game competition. Play a game in a monsoon, the next day your Perfection™ F700M is literally like new.

Jugs Football Passing Machine

The JUGS Football Machine throws perfect passes, punts and kickoffs to any precise spot on your field. Your players can practice catching perfect spirals or end-over-end kicks at any speed or distance you choose from 5 yards to 80 yards. The JUGS Football Machine can help you in these areas:

- Running backs, tight ends and wide receivers need constant practice catching the football. With JUGS, these players catch more passes in a week than they normally would in an entire season.
- Defensive backs and linebackers can be given practice on a variety of reaction and zone-coverage drills in a short period of time, without having to take your best quarterback away from where you really need him to be - with the offense.
- On punt and kick-offs return team drills, you don't have to waste anytime with JUGS doing the kicking.
- Put JUGS on short legs, and your punter and field goal kicker can get hours of perfect snaps.

WILSON FOOTBALLS

Certain models have limited availability, check with your RB sales rep for our full line of Wilson footballs. Prices are subject to change without notice. For up to date prices, call your RB Sales or Customer Service Representatives. 972-930-9730

Wilson GST™ 1003 Gameball

Wilson, the leader in game footballs, now takes the next step in Game Football Technology... The Wilson GST™ Game Ball combines the proven features of the 1005 with exciting new technological improvements.

Accurate Control Lacing System (ACL™)

Accurate Control Lacing System is the most advanced football lace ever introduced. We've replaced traditional laces with thick, pebbled composite leather laces. This provides a softer, more grippable feel which translates to better control.

Exclusive Grip Stripes™

Exclusive Grip Stripes™ ensure that no matter where you grip the ball - even if it's on the stripes - you'll always have control.

Deep Channels

Wilson combines the unique panel shape of our neoprene lining with the seams of the ball and the 1005 Pattern to create deep channels. This makes the Wilson GST™ game ball the most grippable football available. But don't take our word for it...just ask Bob Ladouceur the Head Coach of De Las Salle High School, the #1 ranked high school team in the nation "We've used the Wilson GST™ the entire 2001 season and our players love it!"

Schutt ION4D ION2030

The ION 4D™ is unlike any helmet that's ever been designed before. The sleek, aggressive styling of the shell includes the Schutt Energy Wedge faceguard attachment system. The faceguard is integrated right into the shell and is stronger and more durable than classic faceguards! The ION 4D also features the next generation, Thermoplastic Urethane Cushioning (TPU). TPU is superior to older, traditional foam padding. The TPU cushions eliminate any break-in period and make it the most comfortable helmet you'll ever wear – right out of the box!

Most Comfortable Helmet Ever Made

Next generation TPU cushions are softer and less rigid; that allows them to exactly follow the curve of the helmet and shape of your head.

No long, painful break-in period. 2-piece inflatable comfort and fit liner gives you a custom fit and an unbelievably comfortable helmet.

DRYZ moisture-managing front pad, wicks away moisture from the forehead, reduces helmet slippage and is washable.

New Hi Performance Shapes

TPU sports newly re-designed protective hemispheres, as well as softer and less rigid cushions. Cushion shapes are curved to exactly follow the contour of the helmet shell and the shape of your head with more open design to increase air circulation.

Increased Protective Hemispheres

The new hemisphere shape allows us to fit more hemispheres into the same amount of space; more hemis = better helmet performance. New hemisphere is more spring-like and allows greater air circulation around the helmet.

TPU Cushioning System

TPU is a military proven technology that Schutt Sports brought to the football helmet in 2004. TPU is the next generation, improving on the design of the protective hemispheres, adding more hemispheres into the same amount of space and curving the shape of the cushions.

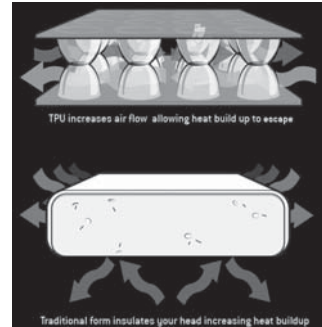

TPU helps the ION 4D™ eliminate the long, painful break-in period of traditional football helmets. Won't take a compression set like older, traditional foam padding and won't break – even after thousands of impacts.

The open design of the new TPU cushions allows more air to circulate around the helmet, reducing heat and evaporating excess moisture. Resistant to mold, mildew, fungus and bacteria.

Game's Best Performing Helmet

When you put together design, comfort, durability and cushioning, the ION 4D™ offers unmatched helmet performance! The pioneering Energy Wedge integrated faceguard design – never before seen on the field!

TPU – cushioning material that's superior to older, traditional foam padding. Sleek, aggressive shell design with increased air circulation. Exceeds NOCSAE testing standards and performs well in the new Biokinetics RAM test protocol.

Faceguard Design

Energy Wedge Attachment System. The faceguard has always been attached to the shell – but not anymore! The Energy Wedge attachment system integrates the faceguard right into the design of the helmet shell, making it stronger and more durable. The pioneering design produces an incredibly wide panoramic field of vision with nothing to get in the way.

Strength Through Integration

Faceguard on the ION 4D™ is part of the helmet - integrated right into the shell! Easier to attach and detach than traditional faceguards. Continuous weld joints, modular shapes and flat wire connectors.

Reduces Force of Impacts

Pioneering faceguard design means a better performing piece of equipment. Integrated Energy Wedges dissipate more of the force of impacts to the faceguard.

\$299⁹⁵
RB Price

Molded or standard painted colors only. Includes Faceguard

Schutt AiR® XP 7890

What takes an ordinary football player and elevates him to an elite athlete? A dedicated leader? Commitment. An unyielding determination that he WILL be the best. Schutt Sports is the dedicated leader of the football helmet and football protective padding industry. We commit football's best development resources to making the world's most advanced helmets, shoulder pads and protective gear. We are committed to sending football players onto the field with the protection, comfort and the customized fit they demand.

The best football helmet line in the world features both adult and youth helmets. At the adult level, our DNA™ football helmets are the most advanced helmets in the market: SKYDEX® padding system, SUREFIT™ airliner and those sleek dart-shaped ventilation holes. We've extended the DNA™ football product line into the youth helmet market, with the Schutt® football DNA™ Recruit. Same great helmet wrapped up in a kid-sized package.

Our lineup of Football Schutt® shoulder pads goes beyond the simple function of protective gear. We've designed our advanced football shoulder pads to help players control both heat and moisture, as well as provide a custom fit and enhanced range of motion.

Our range of football chin straps and football faceguards are the industry standard. The new Fusion chin strap combines the best football hard cup with the best football soft cup chin strap. Schutt® Sports offers football's most advanced football faceguards, featuring over 100 combinations in titanium, carbon steel and stainless steel for both varsity and youth players.

AiR XP™ packs the world's most advanced cushioning system - Thermoplastic Urethane Cushioning™ (TPU) - into the classic shell many players prefer.

TPU takes protection to the next level by incorporating a new 3-dimensional form which allows it to conform to the shell more closely, virtually eliminating a break in period. TPU contains more hemisphere which means the protection is even BETTER than before. TPU does not break down like traditional foam, even after thousands of impacts. TPU is resistant to bacteria, mold and mildew. SUREFIT™ Air Liner System features two parts: the lateral air liner and the crown air liner. Together, the two parts provide a complete custom fit and unsurpassed comfort.

Treated with Ultra-Fresh® anti microbial system.

Schutt Youth DNA Recruit

Another dynamic helmet designed for the youth market, the DNA™ Recruit® from Schutt Sports is an affordable alternative for the youth through junior high football player. The DNA™ Recruit® showcases the sleek, aerodynamic shell of the DNA™, which the players love, but also features the advanced level of protection parents desire. That same spherical shape helps turn aside some of the biggest hits, changing the helmet-to-helmet collisions into more glancing blows.

See those unique dart-shaped holes on the helmet crown? Yea, they look cool but they're also a functional ventilation system, circulating air to keep you cool.

That's the kind of heritage the DNA™ Recruit® brings to the field, which means it's the perfect choice for any coach or parent looking for an affordable, premium helmet.

Visors

Under Armour Visor

Protect your eyes with the Under Armour Football Visor. This visor is cast from APVX, a material that is 10% lighter and has better impact resistance, higher definition, and more visual clarity than traditional polycarbonate visors. The casting process ensures resistance to stress cracking. Scratch-resistant and anti-fog coatings provide better performance and increased durability.

9901
 Color: Clear **\$44⁹⁵**

Oakley Visor

Dodging 240 lb. linebackers while running a sub-4.4 40 demands the best in optical clarity. That's why 11-time National Champion USC chooses Oakley football shields with **HIGH DEFINITION OPTICS® (HDO®)** technology. From high school to the pros, Oakley is the football shield brand of choice.

Using **HIGH DEFINITION OPTICS® (HDO®)** technology, Oakley football shields eliminate the distortion found in the industry's first-generation polycarbonate visors. Oakley uses **PLUTONITE®**, a proprietary synthetic that sets a new standard for durability. Whether it's helmet-to-helmet collision, eye gouging or wind blow debris, **PLUTONITE®** offers the highest level of protection. But it's not just the material that makes Oakley shields better. It's the geometry.

AFR lens treatment comes standard with all Oakley football shields, which translates to anti-fog performance and improved scratch resistance. Optional lens tints allow the player to precisely tune light transmission for game conditions, offering yet another competitive advantage with Oakley technology.

McDavid Cowboy Collar

A favorite among players on nearly all major college and pro teams. The McDavid Cowboy Collar is an advanced neck roll system that incorporates a molded collar of resilient closed-cell polyethylene foam and a padded vest into one product. When worn with regular shoulder pads, the Cowboy Collar helps absorb shock by engaging the sides and back of the helmet, instead of the bottom of the helmet like traditional neck rolls. This reduces restriction and produces a cantilever effect rather than the fulcrum effect found with some neck rolls.

- Protects against "stinger" and "burner" syndrome shoulder injuries far better than traditional neck rolls.

COWBOY COLLAR SIZING

Neck Size	Collar Size
14 1/2" - 16 1/2"	Regular
16 1/2" - 20"	Large

Mueller Collar-The Cool One™

Mueller Collar does not trap heat like conventional collars. The collar bolts directly to the shoulder pads versus being tied which prevents the collar from "floating." The Mueller Collar is positioned closer to the helmet than other collars. One size fits most.

320301
\$49⁹⁵
 RB Price

TAG Cloth Neck Roll

Cloth neck Roll with velcro and grommet attachment. Eyelets to securely fit the collar to the top of the shoulder pads. Helps to prevent excessive strain on the neck that contributes to stingers and other spinal and nervous system injuries.

Mueller Knee Braces

Hg80® Hinged Knee Brace

MUELLER-exclusive HYDRACINN™ fabric is the moisture-wicking catalyst for maintaining superior support with heat management. Base sleeve is made of antimicrobial fabric that is uniquely breathable, extremely soft to the touch with flatlock seams, and features a conforming hourglass design. Upper strapping system locks brace in position. Outer mesh shell with bidirectional stretch fabric fastens on the sides then comfortably locks across the quadriceps. Patented Triaxial Hinges provide maximum protection with near-normal knee motion.

evoSHIELD Rib Guard System

Moisture wicking compression shirt has 2 hidden rib pockets. evoSHIELDS are taken out of the foil pack, placed in the pockets of the shirt, worn for 20 minutes, and then permanently form to your ribs. The evoshields cover the ribs for unmatched comfort and performance. Unlike traditional bulky foam and stiff plastic pads that absorb impact, evoSHIELD permanently forms to your body and disperses impact.

- The worlds first CUSTOM-FORMING Rib protection shirt Carbon Color
- Great for any contact sport/activity.
- Promotes self-confidence and performance by reducing fear of injury.
- Ergonomically designed evoSHIELDS follow the ribcage to allow natural athletic movement.
- evoShields are made of thin, lightweight, composite material and are covered in a breathable mesh top and soft polymer backing.
- Performance tested.
- Offers maximum impact dispersion.

Fisher Brute Sleds

Expandable: Individual components allow stations to be added as the need arises. Basic sleds can start with 2 man capability and expanded as you desire. A 5 man sled can be easily broken down to a 2 and a 3 man sled.

Construction

Main Frame: Tough, durable and guaranteed for 5 years. All metal surfaces are powder coated to prevent rust.

Live Action Springs: Flat leaf springs deflect to absorb the shock and bounce back to provide realism in drills.

Skids: Sled skids are formed, not cut and welded. A 30 degree angle assures you of a smooth transition over grass without chewing up the turf.

Pad Construction and Options: Each Brute sled pad's core is built from high density, 100 lb., impact resistant foam. Durable, 18 oz. vinyl covers are then double and triple stitched to withstand harsh weather and years of hard use. Man, round & cone pad styles are available for the Brute sled.

9000CP Coach's Platform: This optional platform has a 36" tall, 2" O.D. hand rail and a sturdy, 30" x 30" steel diamond plate base for an excellent non-slip surface. The platform allows an up front view of drills and gives the feel of impact.

Schutt XP Protection Shirt

Clinical Studies have shown a 75/25 fabric (mix of Nylon/Spandex®) actually helps an athlete's muscles recover faster. It also affects the buildup of lactic acid in the muscles. The XP is 75/25, with more benefits than any other protective shirt. The breathable mesh fabric allows excess sweat to wick away from the body. The XP Protective Shirt looks like a classic compression shirt but features state-of-the-art technology: an anatomical design that offers extra protection, including gel protection over the AC joint (which no other protective shirt offers).

Officials Wear

Cliff Keen Short Sleeve Officials Shirt

Made especially with officials in mind, this new shirt is knit from the finest blend of natural and performance yarns. Lightweight EZ-Care ULTRA-Mesh™ fabric keeps you cool and maintains its shape, even during the warmest games. Shrink, wrinkle, and stain resistant for a durable, long life. Feels like soft cotton against the skin. Vibrant black and Optic white stripes. Fortified with our woven fabric technology; it wicks moisture from the body, increasing comfort and providing an intangible performance advantage. This is the ideal shirt for those warm, early-season contests.
