

Blacksmithing 10

Saturday, April 14, 2012 10 a.m. - 2 p.m.

Learn to shape iron with hammer and anvil!

Blacksmithing is an ancient skill considered a lost art today. With the return of this workshop you can learn the basics of heating, shaping, and bending metal, while working on a reproduction of an early 19th century travelling forge, similar to those used by the U.S. Army during the War of 1812!

This is a beginners-only hands-on workshop. Participants will learn and practice basic heating and hammering techniques, building and controlling their fire, and shaping and tempering metal. All will have the opportunity to create a piece of their own and take it home! Cost is \$45 dollars per person, \$40 for OHS members, and includes all required materials and supplies. Workshop size is limited to the first 6 people registered and everyone must sign a safety-waiver in order to participate.

NOTE: Workshop is conducted outdoors. Please dress for the weather.

WHAT WE SUPPLY: WHAT YOU NEED:

- Safety glasses.
- Take-home booklet of information.
- Blacksmithing tools & equipment.
- Fuel for forge.
- Stock iron.

- Must be 16 years or older. Minors must be accompanied by a parent or guardian. (No charge for chaperones)
