

The Netherlands

The Netherlands is a small, densely populated country, lying mainly in Western Europe. The European part of the Netherlands borders Germany to the east, Belgium to the south, and the North Sea to the northwest, sharing maritime borders with Belgium, the United Kingdom and Germany. The four largest and most important cities in the Netherlands are Amsterdam, The Hague, Rotterdam and Utrecht. The port of Rotterdam is the largest port in Europe.

Rotterdam

Rotterdam is the second-largest city in the Netherlands and one of the largest ports in the world. Starting as a dam constructed in 1270 on the Rotte River, Rotterdam has grown into a major international commercial centre. Its strategic location at the Rhine-Meuse-Scheldt delta on the North Sea and at the heart of a massive rail, road, air and inland waterway distribution system extending throughout Europe is the reason that Rotterdam is often called the "Gateway to Europe".

Mainport Hotel

Mainport is the most luxurious and modern hotel in Rotterdam. This brand new 5 star hotel offers guests a true experience. From the Spa Heaven with a traditional Hamam, to stylish cocktail parties, top class meetings and international conferences. Mainport is not just a hotel, it's a lifestyle. Message from the organisers

On behalf of the organising committee we would like to welcome you to the 12th International Symposium of Ultrasound for Regional Anesthesia and Pain Medicine held at the luxerious Mainport Hotel Rotterdam, The Netherlands.

ISURA (International Symposium of Ultrasound for Regional Anesthesia and Pain Medicine) is the largest meeting completely dedicated to the application of ultrasound for regional anesthesia and pain medicine. We are organizing the 12th ISURA in Rotterdam, a beautiful city on the Maas (Meuse) river, which was recently rated as the best city in Europe to live in (Urbanism Award).

As ultrasound is becoming an important tool in the perioperative areas as well as pain management, we assemble a very exciting program to cover various facets of the use of ultrasound, including the use in gastric scanning, airway management, transthoracic echocardiography, guidance for regional anesthesia, and the application in the chronic pain management.

New this year are topics on how to apply ultrasound to diagnose complications from regional anesthesia such as pneumothorax, diaphragmatic paresis and urinary retention, controversy/update in ultrasound, and group master class of 8 regional anesthesia techniques for all audience with the use of advanced audiovisual support.

Please join us in Rotterdam for a rewarding educational experience in September-October 2015.

Sincerely,

Philip Peng
