## GUIDELINES FOR FUSIBLE LINK FIRE RATED DOOR LOUVER INSTALLATION

### 1. PRELIMINARY

- A. Prior to installation of a Fusible Link Fire Rated Door Louver, specific guidelines must be met.
  - a. Installations must be authorized by the owner or agent / owner representative *and the on-site management* prior to its installation.
  - b. Owner and/or agent/owner representative must fill out the Construction Application and provide a copy to the on-site management office. The Construction Application must include your contractor/handyman's information along with specs/drawings of the work to be completed.
  - c. Prior to installation the owner of the unit must obtain a permit from City and County Planning and Permitting Office. Their office number is (808) 768-8000 and fax is (808) 527-6743. A copy of the permit must be submitted to the onsite office which will be kept on file and used for fire inspections.
  - d. Fire Rating must be 20/45/60/90 minute.

### 2. PLACEMENT

- A. Fusible Link Fire Rated Door Louver must be installed in the lower center portion of the unit door. Maximum height and width cannot exceed 18" X 18".
