2 Introduction

In March 2010, the LISS panel completed a questionnaire on family and household. The survey was not repeated. The questionnaire was presented to 9,058 panel members, of which 6,081 fully completed the questionnaire (response percentage 67.1%).

This questionnaire is part of a third wave of longitudinal panel survey delivering a broad range of social core information about the panel members.

3 Codebook

This codebook contains the questionnaire as administered to the LISS panel.

- The variable names are printed in **bold** and correspond to the names in the dataset.
- The questionnaire routing is printed in *italics* for each variable concerned.
- Open: answer box; no limit to the length of the answer.
- String: answer box allowing a maximum number of characters (standard is 255).
- The range within which a respondent could provide an answer for numerical variables is printed in the codebook in *italics* if this range was not visible to the respondent. If there were no limits to the range within which an answer could be provided, this is indicated in the codebook as 'integer'.
- The so-called 'fills' (variable text) are presented between straight brackets [].
- Variables in between curly brackets are not part of the data set, however the corresponding questions or pieces of text were part of the questionnaire.

[Questions cf10c218 through cf10c237 applied to one of the children living at home, in the age range of 5 through 18 years. With children living at home, to and including 14 years old, preference was given to one of these children. The variable cf10c001 represents the child chosen in the questionnaire. This number matches the variables cf10c053 through cf10c067. If the value at cf10c001 is 2' for instance, this means that the child with the year of birth entered at cf10c054 was chosen.]

cf10c217 staying at home with the child when unwell

The questions cf10c218 through cf10c237 concern a randomly chosen child. In principle, these questions were asked about the child that was randomly chosen in wave 1. This was a child living at home between the age of 5 and 18 years old. If this child did not satisfy the criteria anymore, another child born between 1995 (cf10c037 - cf10c051>1994) and 2005 (cf10c037 - cf10c051<2006) was chosen. If there were no children left that satisfied these criteria, it was checked whether there were children living at home (cf10c083 - cf10c097=1) born between 1992 (cf10c037 - cf10c051>1991) and 1994 (cf09b037 - cf09b051<1995). If so, one of these children was chosen at random and the questions were applied to this child.
