ANTEPARTUM & INTRAPARTUM MANAGEMENT

June 11-13, 2009

The Stanford Court
A Renaissance Hotel
San Francisco, California

Course Description

Presented by the University of California, San Francisco School of Medicine, this course stresses antepartum and intrapartum assessment and clinical management in obstetrics. On the first day, various aspects of prenatal diagnosis, genetics, antepartum conditions and maternal complications are covered. The second day is largely devoted to the recent 2008 recommendations fetal heart rate interpretation, and management of fetal heart rate patterns. The third day continues with discussions of potential complications of pregnancy and their management.

The course is appropriate for physicians, midwives, obstetrical nurses and trainees. The faculty instructors are internationally known through their clinical and basic research, scholarly articles and texts. The faculty are highly qualified, certified by their respective specialties, and the majority are qualified or eligible for the subspecialty division of Maternal Fetal Medicine of the American Board of Obstetrics and Gynecology.

Educational Objectives

Upon completion of this course, participants should be able to:

- Discuss ectopic pregnancy and management
- Manage and treat selected maternal medical complications of pregnancy
- Explain implications and management of complications such as preterm birth, operative delivery and placenta accreta
- Describe the most recent advances and recommendations for obstetrical emergencies
- Analyze the 2008 NICHD guidelines for interpretation of fetal heart rate patterns
