INTRODUCTION

Congratulations on your purchase of a Sportline Personal Fitness Monitor. Please keep in mind; your watch is a sensitive technical instrument. With proper care and maintenance, it will last for many years. However, improper care and handling can cause the various sensors to be damaged and to stop functioning.

HOW TO USE THIS MANUAL

Sportline Personal Fitness Monitors have many unique features and functions. Please read all sections of this manual carefully and become fully familiar with the operation of the watch before using it in the field. Proper setup and operation will greatly enhance the watches usefulness and your enjoyment.

The manual is divided into sections outlining each of the major functions of the watch. A drawing of the watch screen that represents the starting point or other important screens for each operational process are shown adjacent to the instructions for the process; important keys are shown indicating **PRESS & HOLD** and **PRESS**.

The steps for the programming or operation are adjacent to the screen illustration. Key points and important information are shown in highlighted blocks.

ACTIVATING THE WATCH FROM POWER DOWN MODE

PLEASE NOTE: Your watch was originally shipped in Power Down Mode to conserve battery life.

To deactivate Power Down mode: **PRESS & HOLD ANY KEY** for 5 seconds (see page 21 for more information on Power Down mode).

WARNINGS & CAUTIONS

WARNING: Before starting any exercise program or performing any vigorous physical activity, we strongly suggest you visit your doctor for a complete physical and to discuss your plans.

CAUTION: Your watch is designed to be water resistant to a static pressure of 5 ATM and can be worn while showering and light swimming. However, we recommend that extensive use of the unit in the water be avoided whenever possible. Care should be taken not to press any keys while the unit is submerged as this can force moisture past the key seals and damage the unit.

CAUTION: Avoid exposing your watch to extreme conditions for a prolonged period of time.

CAUTION: Avoid rough usage or severe impacts to your watch.

DO NOT use hand cream as it will insulate the signal between the skin and sensor contacts.

DO NOT use the fingertips where the skin is dry and thick. For those with extremely dry skin, moisten fingers and wrist with tap water or a conductive gel.

CLEAN the Back Cover occasionally by using a damp cloth. Then wipe dry to remove any residual grease.

CLEAN your skin and fingers with soap and water for a better signal transmission.

AVOID doing awkward motions during measurement. It may create inaccurate heart rate readings.

CARE & MAINTENANCE

- **NEVER** attempt to disassemble or service your unit.
- **DO NOT** expose the unit to extreme heat, shocks, magnetic fields, electrical noise, strong vibration or long-term exposure to direct sunlight.
- **DO NOT** drop or step on the watch.
- **TO CLEAN THE UNIT:** wipe with a lightly moistened cloth. Apply mild soap to the area if there are stubborn stains or marks. Do not expose the unit to strong chemicals such as gasoline, cleaning solvents, acetone, alcohol or insect repellents, as they may damage the unit's seal, case and/or finish.
- **STORE** the unit in a dry place when you are not using it.

CUSTOMER SUPPORT

If you have questions, comments or need assistance with your Sportline Duo 1010 Heart Rate Watch, you may contact Customer Support by calling **1-866-694-4575**.

WATCH FUNCTIONS

TIME

- Time/Day/Date/Month
- 12- or 24-hour format
- Daily Alarm

HEART RATE

- Finger-Touch or Chest Strap Transmitter HR acquisition
- 4 user-selected HR Zones
- 3 user-selected Activity Levels
- HR Zone Alert
- Calorie Consumption
- Fat Burn Measurement
- HR Zone Memory Recall

CHRONOGRAPH

- 1/100 second resolution
- 9 hours, 59 minutes, 59.99 seconds
- 25 laps
- Lap/Split Memory Recall

TIMER

- 1-second resolution
- Range: 9 hours, 59 minutes, 59.99 seconds
- Audible alarm

OTHER

- EL Backlight System

KEYS AND THEIR FUNCTIONS

KEYS AND THEIR FUNCTIONS

MODE/SET KEY (MODE in instructions)

- Scroll through operating modes
- **PRESS & HOLD:** Enter/Exit the programming sequence
- Set values being adjusted in programming sequence

START/STOP KEY (S/S)

- Accesses Alarm in Time mode
- Turn Alarm ON or OFF in Alarm mode
- Start/Stop Countdown Timer
- Start/Stop Chronograph
- Start new Lap in Heart Rate/Chronograph mode
- Increase setting values being adjusted in programming sequence

LAP/RESET KEY (R) (RESET in instructions)

- **PRESS & HOLD:** Reset Chronograph or Countdown Timer
- Decrease setting values being adjusted in programming sequence
- Scrolls through sub modes in Heart Rate mode
- **PRESS & HOLD:** In Time of Day to activate Heart Rate Lock

LIGHT KEY

- Activates (EL) backlight system

HEART RATE SENSORS

- Acquires Finger Touch Heart Rate

ACQUIRING HEART RATE

ACQUIRING HEART RATE: FINGER TOUCH

Heart rate may be acquired from any operating mode (not in any Setting Sequence).

1. With the watch attached to your wrist, **TOUCH & HOLD** the **HEART RATE SENSOR** (anywhere on the metal top plate) with one finger.

NOTE: If **HEART Rate Sensor** is accidentally touched, the watch will automatically attempt to acquire heart rate. If no heart rate is detected, watch will resume operating mode in approximately 10 seconds. This will not interfere with any timing functions in progress.

NOTE: You may exit Heart Rate mode at any time by Pressing the Mode, Start/Stop or Reset key.

2. Continue Touching & Holding until heart rate displays.
3. Once Heart Rate is acquired, **RELEASE THE SENSORS**. Heart Rate will continue to display for a period of approximately 10 seconds.

HEART RATE LOCK

To deactivate Finger Touch Heart Rate (when you don't want to accidentally acquire heart rate):

1. In Time mode, **PRESS & HOLD** the **RESET** key. The lock icon (🔒) will appear in the upper left of the display.
2. To unlock, **PRESS & HOLD** the **RESET** key for 2 seconds in Time mode. The lock icon will disappear.

ACQUIRING HEART RATE

ACQUIRING HEART RATE WEARING THE CHEST STRAP TRANSMITTER

The Chest Strap Transmitter provides constant heart rate information throughout the duration of your workout. To ensure a proper heart rate display, the chest transmitter must be properly adjusted. Snap the plastic tabs at the end of the elastic belt into the holes at the end of the transmitter and adjust the strap so that the transmitter fits tightly below the pectoral muscles, as shown in the drawing.

To acquire Heart Rate with the Chest Strap Transmitter:

1. Scroll to Heart Rate/Chronograph mode by **PRESSING** the **MODE** key.
2. Start the Chronograph by **PRESSING** the **START/STOP** key. The monitor will acquire heart rate in approximately 10 seconds.

NOTE: In dry and cold climates it may take a few minutes for a layer of perspiration to form between the chest strap and the skin. Moistening the electrodes with saliva or ECG conductive gel can speed up this process.

3. To Stop chronograph, **PRESS & HOLD** the **START/STOP** button for 2 seconds.

MAIN OPERATING MODES

The Sportline Duo 1010 Heart Rate Watch has 4 main operating modes: Time, Heart Rate/Chronograph, Memory and Countdown Timer. Scroll through modes by **PRESSING** the **MODE** key. You may acquire Finger Touch Heart Rate by **TOUCHING & HOLDING** both the upper and lower Heart Rate Sensors in any operating mode. The watch also has 8 Heart Rate sub modes (see following page).

NOTE: You may access Alarm mode by Pressing & Holding the Start/Stop key in Time Mode

MAIN OPERATING MODES

The Sportline Duo 1010 Heart Rate Watch has 8 Heart Rate sub modes. Scroll through sub modes by **PRESSING** the **RESET** key in Heart Rate/Chronograph mode. If Chest Strap Transmitter is used, lower line will display current heart rate. If heart rate is being acquired through Finger Touch, lower line will display last heart rate reading.

SETTING THE WATCH FUNCTIONS

SETTING TIME AND USER PROFILE

In this Programming Sequence, you will program the watch's Time & Calendar functions as well as set your User Profile. This sequence must be completed to ensure accuracy of the watch's functions.

SETTING TIME AND DATE

1. In Time mode, **PRESS & HOLD** the **MODE** key to enter the programming sequence. The variable being adjusted will flash on and off.
2. Reset Seconds to zero (00) by **PRESSING** the **START/STOP (S/S)** or **RESET (R)** key. Advance to Set Minutes by **PRESSING** the **MODE** key.
3. Adjust Minutes by **PRESSING START/STOP** (to increase) or **RESET** (to decrease). Set Minutes and advance to Set Hour by **PRESSING** the **MODE** key.
4. Adjust Hour by **PRESSING S/S** or **R**. Set Hour and advance to Set Year by **PRESSING** the **MODE** key.
5. Adjust Year by **PRESSING S/S** or **R**. Set by **PRESSING** the **MODE** key.
6. Adjust Month by **PRESSING S/S** or **R**. Set by **PRESSING** the **MODE** key.
7. Adjust Day by **PRESSING S/S** or **R**. Set by **PRESSING** the **MODE** key.
8. Adjust 12/24-hour format by **PRESSING S/S** or **R**. Set Format by **PRESSING** the **MODE** key.
10. Turn Hourly Chime ON or OFF by **PRESSING S/S** or **R**. Set by **PRESSING** the **MODE** key.
11. Turn Key Beep ON or OFF by **PRESSING S/S** or **R**. Set by **PRESSING** the **MODE** key.

ADJUST: S/S OR R

SET: MODE

SETTING THE WATCH FUNCTIONS

SETTING USER PROFILE

The Sportline Duo 1010 Heart Rate Watch uses an advanced algorithm based on your User Profile to estimate your maximum heart rate and calculate other heart rate information. To ensure accuracy of the watch's advanced functions, this information must be programmed in the Programming Sequence.

12. Select Gender (M=male, F=female) by **PRESSING** the **START/STOP (S/S)** or **RESET (R)** key. Set Gender by **PRESSING** the **MODE** key.
13. Adjust Year of Birth (BIRTH in upper line of display) by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the **MODE** key.
14. Select Height Units (IN=inches, CM=centimeters) by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the Mode key.
15. Adjust Height by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the **MODE** key.
16. Select Weight Units (LB=pounds, KG=kilograms) by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the **MODE** key.
17. Adjust Weight by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the **MODE** key.
18. **PRESS & HOLD** the **MODE** key to exit the Programming Sequence & resume Operating mode.

NOTE: It is recommended to program your Heart Rate Zone before using the watch during exercise (See page 14 "Setting Target Heart Rate Zone").

ADJUST: S/S OR R

SET: MODE

SETTING THE WATCH FUNCTIONS

HEART RATE TARGET ZONES

The Sportline Duo 1010 Heart Rate Watch allows you to select from 3 preset Heart Rate Target Zones (Aerobic, Fat Burn and Health) and 1 user-defined Target Zone. The watch tracks time IN, ABOVE and BELOW Target Zone during exercise.

SELECTING YOUR TARGET HEART RATE ZONE

Losing weight and managing to keep it off is a lot easier when you exercise in your target heart rate zone. To determine your target heart rate zone, first subtract your age from 220. That's an estimate of your maximum heart rate. To get the most out of any exercise program, you should target 50% to 85% of your maximum heart rate depending on your fitness level and objectives.

HEALTH ZONE: 50% - 65% OF MAXIMUM HEART RATE.

This zone is ideal for fitness beginners on a low to moderate intensity program. Exercising in this zone reduces blood pressure and cholesterol.

FAT BURNING ZONE: 65% - 75% OF MAXIMUM HEART RATE.

Exercising in this zone strengthens the cardiovascular system and nearly all the calories burned are from fats.

AEROBIC ZONE: 75% - 85% OF MAXIMUM HEART RATE.

Reaching this zone requires more intense aerobic activity and is perfect for fitness enthusiasts working to burn maximum calories from fat and carbohydrates. Cardiovascular strengthening, increased metabolism and elevated caloric burn are the primary benefits.

SETTING THE WATCH FUNCTIONS

SETTING HEART RATE TARGET ZONES

The monitor automatically calculates your Maximum Heart Rate from your User Profile and uses this information to display Heart Rate Zones.

NOTE: This information must be programmed prior to selecting Target Zone. See page 12.

1. In Heart Rate/Chronograph mode, **PRESS & HOLD** the **MODE** key to enter the Programming Sequence.
2. Select Target Zone (Health, Fat-B=Fat Burn, AROBIC=Aerobic, USR=User Defined) by **PRESSING** the **START/STOP (S/S)** or **RESET (R)** key. Set Target Zone by **PRESSING** the **MODE** key.
3. Select Zone Alarms ON or OFF by **PRESSING** the **S/S** or **R** key. Set Zone Alarms by **PRESSING** the **MODE** key.
NOTE: Zone Alarm is an audible signal that sounds when you are above or below your selected Target Heart Rate Zone.
4. Adjust Target Zone Lower Limit (ZONE-L in display) by **PRESSING S/S** or **R** key. Set by **PRESSING** the **MODE** key.
5. Adjust Target Zone Upper Limit (ZONE-U in display) by **PRESSING S/S** or **R** key. Set by **PRESSING** the **MODE** key.
NOTE: While the watch allows you to manually adjust Zone Limits, it is recommended to leave them on factory defaults unless consulted by a certified trainer or physician.
6. Select Activity Level (ACt in display) (estimated personal activity level – high= very active, etc.) by **PRESSING S/S** or **R** key. Set by **PRESSING** the **MODE** key.
7. **PRESS & HOLD** the **MODE** key to exit the Programming Sequence and return to Heart Rate/Chronograph mode.

ADJUST: S/S or R

SET: MODE

SETTING THE WATCH FUNCTIONS

SETTING DAILY ALARM

The Sportline Duo 1010 Heart Rate Watch features a Daily Alarm. To set Alarm:

1. To access Daily Alarm, **PRESS & HOLD** the **START/STOP (S/S)** key in Time mode.
2. Turn Alarm ON or Off by **PRESSING** the **START/STOP (S/S)** or **RESET (R)** key. Set by **PRESSING** the **MODE** key.
3. Adjust Hour by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the **MODE** key.
4. Adjust Minutes by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the **MODE** key.
5. **PRESS & HOLD** the **MODE** key to exit the Programming Sequence and return to Time mode.

ADJUST: S/S or R

SET: MODE

SETTING THE WATCH FUNCTIONS

SETTING THE COUNTDOWN TIMER

The Sportline Duo 1010 Heart Rate Watch is equipped with a 10-hour Countdown Timer. To set Timer:

1. **PRESS & HOLD** the **MODE** key in Timer mode.
2. Adjust Hours by **PRESSING** the **START/STOP (S/S)** or **RESET (R)** key. Set by **PRESSING** the **MODE** key.
3. Adjust Minutes by **PRESSING** the **S/S** or **R** key. Set by **PRESSING** the **MODE** key.
4. **PRESS & HOLD** the **MODE** key to exit the Programming Sequence and return to Timer mode.

OPERATING THE COUNTDOWN TIMER

To operate the Timer:

1. To **START** timing, **PRESS** the **START/STOP (S/S)** key.
2. To **STOP** timing, **PRESS** the **S/S** key.
3. To **RESET** the Timer, **PRESS** the **RESET (R)** key.

START/STOP
TIMING: S/S

RESET: R

ADJUST: S/S or R

SET: MODE

OPERATING THE WATCH

OPERATING HEART RATE/CHRONOGRAPH MODE

The Sportline Duo 1010 Heart Rate Watch is equipped with a 10-hour, 25-lap Chronograph. This is the primary Heart Rate mode which tracks and displays all heart rate information. Chronograph time is displayed in the upper display line. Heart Rate information is displayed in the lower display line. The following table shows the watch's display icons and their meaning:

symbol	what it means
 ZONE	Heart Rate is below selected Target Zone
ZONE 	Heart Rate is above selected Target Zone
 ZONE	Heart Rate is in selected Target Zone
MAX	Maximum Heart Rate for workout
AVG	Average Heart Rate for workout

symbol	what it means
	Heart Rate is being detected
%	Heart Rate as a percentage of calculated Maximum Heart Rate
	Hourly Chime is activated
	Daily Alarm is activated
	Low Battery warning

OPERATING THE WATCH

OPERATING HEART RATE/CHRONOGRAPH MODE (CONTINUED)

The monitor is equipped with a 10-hour, 25-lap Chronograph. Resolution is 1/100 second for the first 59 minutes 59.99 seconds and 1 second after that. To operate the Chronograph:

1. To START timing, **PRESS** the **START/STOP (S/S)** key.
2. To time a lap, **PRESS** the **S/S** key. Split time will display for period of 10 seconds and timing will resume (to review Chronograph data, see Page 20 "Chronograph Memory").
3. To STOP timing, **PRESS & HOLD** the **S/S** key for 2 seconds.
4. To RESET the Chronograph, **PRESS & HOLD** the **RESET (R)** key.

NOTE: To view heart rate data in Memory, DO NOT RESET THE CHRONOGRAPH.

**START TIMING/
TIME A LAP: S/S**

RESET: R

OPERATING THE WATCH

HEART RATE SUB MODES

The Sportline Duo 1010 Heart Rate Watch has 8 Heart Rate sub modes that feature detailed heart rate feedback. Scroll through sub modes by **PRESSING** the **RESET** key in Heart Rate/Chronograph mode. If Chest Strap Transmitter is used, lower line will display current heart rate. If heart rate is being acquired through Finger Touch, lower line will display last heart rate reading.

OPERATING THE WATCH

CHRONOGRAPH MEMORY

The monitor has a Memory mode that allows you to view detailed lap feedback from your last workout.

NOTE: Chronograph must not be reset to view exercise data.

1. Scroll to Memory Mode by **PRESSING** the **MODE** key.
2. First screen displays total time for workout, average heart rate for workout and number of laps.
3. Scroll through individual lap data (lap time and average heart rate for lap) by **PRESSING** the **START/STOP (S/S)** or **RESET (R)** key.

OPERATING THE WATCH

VIEWING THE BACKLIGHT SYSTEM

The monitor is equipped with an electroluminescent (EL) Backlight System for viewing the display in low light conditions. To operate the Backlight System:

1. **PRESS** the **EL** key. Backlight will illuminate for approximately 5 seconds.
2. **AUTO BACKLIGHT: PRESS & HOLD** the **LIGHT** key. The light icon (☼) will be visible in upper right of display. The backlight will illuminate on any key press.

NOTE: Excessive use of Backlight System may significantly reduce battery life.

RESET/POWER DOWN

Reset/Power Down allows you to conserve battery life by deactivating the unit when the monitor is not being used for long periods of time. To activate Power Down mode:

1. In Time mode, **PRESS & HOLD** the **MODE, START/STOP & RESET** keys for 5 seconds.

NOTE: Time/Date, User Profiles and Memory files will be reset to defaults.

2. To resume normal operation, **PRESS & HOLD ANY KEY** for 5 seconds.

NOTE: Time/Date and User Profiles will need be reprogrammed.

OPERATING THE WATCH

TIME

- AM, PM, hour, minute, second
- 12/24 hour format
- Calendar: month, date, day display with auto leap year adjustment

ALARM

- Daily alarms
- Alarm duration: 30 seconds

CHRONOGRAPH

- Resolution: 1/100 second
- Measuring range: 9 hours, 59 minutes, 59.99 seconds
- 25 Lap
- Split times display

HEART RATE

- Range: 40-240 beats per minute
- 4 Heart Rate Target Zones
- Height setting range: 11" - 8' 4" (28 - 254cm)
- Weight setting range: 22 - 484 lbs (10-220 kg)
- Calorie Tracking Range: 0-9999
- Fat Burn range: 0 - 9999 gr

COUNTDOWN TIMER

- Resolution: 1 second
- Measuring Range: 9 hours, 59 minutes, 59.99 seconds

OTHER

- Electroluminescent (EL) backlight
- Water resistant up to 50 meters
- Battery: CR 2032 (X2)

REPLACING THE WATCH BATTERY

The Sportline Duo 1010 Heart Rate Watch uses a single CR2032 lithium battery.

BATTERY REPLACEMENT WILL BE REQUIRED FROM TIME TO TIME, AND SHOULD OCCUR WHEN:

1. The display fades in part or completely
2. The heart rate function will not activate
3. Backlight System does not operate
4. The battery icon is visible

To replace the battery of your Sportline Duo 1010 Heart Rate Watch, we recommend you take it to a watch repair service center or certified jeweler. This will ensure that the water resistance will be retained after battery replacement.

CUSTOMER SUPPORT

If you have questions, comments or need assistance with your Sportline Duo 1010 Heart Rate Watch, you may contact Customer Support by calling 1-866-694-4575.

REPLACING THE CHEST TRANSMITTER BATTERY

The Sportline Duo 1010 Heart Rate Watch features a wireless heart rate transmitter, powered by a CR2032 3v Lithium battery. Under normal conditions you can expect to get approximately 300-400 hours of heart rate transmitter use with a fresh battery. To replace the battery:

1. Using a coin, turn the battery door counter clockwise until the door comes free of the watch.
2. Take care not to damage the O-ring seal for the battery compartment and carefully remove the old battery.
3. Place a new battery in the battery compartment with the positive (+) side toward the battery door.
4. Place the battery door over the opening and tighten it down by using a coin and turning in a clockwise direction.
5. If the O-ring has been damaged, replace it before reinstalling the battery door. Most jewelers and watch shops should have replacement O-ring seals.

NOTE: Extreme care should be taken when replacing the battery to ensure the unit remains fully water resistant. Failure to properly replace the battery and correctly seal the unit may cause the unit to become damaged and may void the warranty.

BATTERY SAFETY INFORMATION

▲CAUTION – BATTERY SAFETY INFORMATION

- Non-rechargeable batteries are not to be recharged
- Rechargeable batteries must be removed before recharging
- Rechargeable batteries should only be recharged under adult supervision
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries
- Exhausted batteries are to be removed
- Do not mix old and new batteries
- Do not dispose of batteries in fire; batteries may explode or leak
- Do not dispose of product in fire; batteries may explode or leak
- If this product will not be used for an extended period of time, remove the batteries from the product
- The supply terminals are not to be short-circuited
- Batteries are to be inserted with correct polarity
- Clean the battery contacts and also those of the product prior to battery installation
- As always, dispose of batteries in an eco-friendly manner

The purpose of the crossed-out wheeled bin symbol is to remind us that most electrical products, and batteries, contain trace elements (including Mercury – Hg, Cadmium – Cd and Lead – Pb) which could be harmful to our environment and therefore our health. We must all be careful to dispose of them responsibly in a specifically designated way – either using a collection scheme or into the correctly labelled civic amenity (NOT into general waste) – this will help your local authority to arrange to recycle or dispose of them in the appropriate manner.

TROUBLE SHOOTING

POTENTIAL CAUSES FOR NO HEART RATE READING OR LONG RESPONSE TIME:

CAUSE: DRY SKIN

SOLUTION: Apply conductive gel thoroughly to chest area (for Chest-Strap measurement) or finger (for Finger-Touch measurement). Tap water may help if conductive gel is not available.

CAUSE: CHEST STRAP IS NOT CONTACTING WITH SKIN

SOLUTION: Make sure the chest strap is firmly over the chest and the Watch is securely on wrist.

CAUSE: MUSCLE TREMORS CAUSED BY PRESSING ON SENSORS TOO HARD (FINGER TOUCH)

SOLUTION: Decrease finger pressure on the Sensor Pads.

CAUSE: DEAD SKIN ON WRIST, FINGER OR CHEST.

SOLUTION: Rub off excessive dead skin with a towel

CAUSE: A THIN LAYER OF BODY GREASE INSULATES THE ECG SIGNAL PREVENTING THE CHEST STRAP OR WATCH FROM DETECTING ECG HEART RATE

SOLUTION: Wipe chest / wrist and the back of Chest Strap/ watch with a tissue or soft towel.

CAUSE: HAIRY SKIN

SOLUTION: Apply conductive gel to chest area or wrist.

CAUSE: LOW BATTERY

SOLUTION: Replace the battery in watch/transmitter and try again.

CAUSE: ELECTRICAL FIELD INTERFERENCE FROM RF DEVICES (CHEST-STRAP MEASUREMENT) SUCH AS OVERHEAD POWER LINES, ETC.

SOLUTION: Leave the area where RF source potentially exist.

FCC COMPLIANCE

The device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the transmitting equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio technician for help.
