Technical notes

What does digital printing look like on *different box colours*?

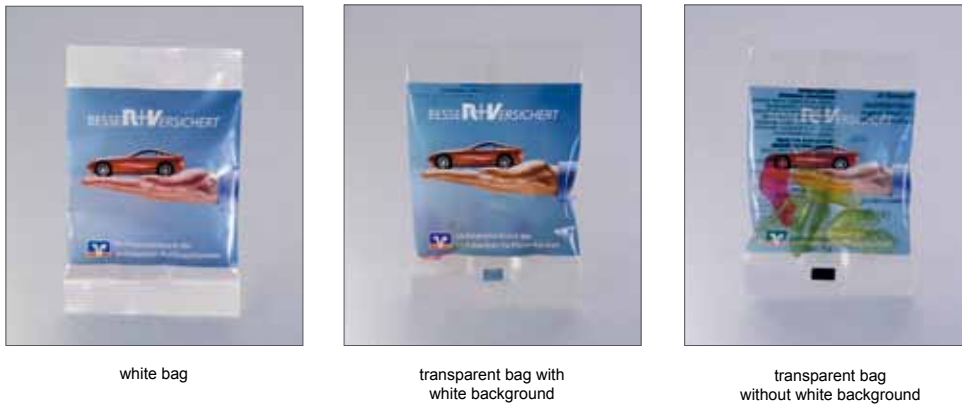

Note

In digital printing boxes can be printed right to the edge:

Motifs on white backgrounds are **not possible** on boxes in digital printing.

What does the printed text / image look like *with and without a white background* on foil?

Note

When using a transparent foil, the white background counts as an additional print colour in flexo print (does not apply to digital printing).

How is the space for *laser engraving* measured?

Looking forward to Christmas 2011

Important information

Printing methods

Digital printing:

Paper/cardboard, boxes, foil, labels

4-c designs are available at attractive prices even with small quantities. There are no register differences. The colours are always compiled from the 4-c process. Special colours in acc. with HKS, RAL or Pantone can only be approximated. Slight streaking may be visible with extensive colour designs.

Boxes: A white background to the motif, as is usual with shiny boxes, is not possible.

In these cases, transparent inks are not opaque and therefore often do not achieve the desired colour tone, but can have a very elegant effect thanks to the shining through e.g. of a shiny box. Designs that extend over the advertising space for the logo/text become unclear at the edges and break off over the sides. Slight scratches and unevenness may appear due to the material.

Foils: The sealed seams cannot be printed partly.

Flexo printing:

Foils, labels, sticky wrappers

Register differences are possible to an extent. A fine unprinted line at the sealed seam of the bag is a result of the block ends meeting. Colour rubbing on the sealed seam is also possible in whole-surface printing. Designs with extensive ink coverage should be varnished to protect them from colour rubbing (counts as an additional print colour).

Tetrahedron packaging: Due to the packaging, it could happen that the position of the printed image varies on the triangular advertising space.

Sweets: A white edge remains on the side with whole-surface printing.

With sticky wrappers: Slight blistering and the fact that the ends of the wrapper may not meet exactly cannot be excluded.

Offset printing:

Paper, cardboard

An attractive price for larger print runs. Printing of special colours in acc. with HKS and Pantone is possible.

Pad printing:

Boxes, dispensers

Register differences are possible to an extent. The double printing of individual colours may be necessary for whole-surface printing (counts as an additional print colour in each case). Slight scratches and unevenness may appear due to the material.

Laser engraving:

Matt-silver boxes

Top-quality customising even with small quantities. Laser engraving involves the matt-silver varnish being removed, exposing the shiny surface. With whole-surface lasered motifs, the cast of the box material becomes visible. Slight scratches and unevenness may appear due to the material.

Embossing:

Boxes

Elegant embossing. Extremely elaborate designs are not always possible.

Note:

Please ask for the relevant technical data sheet. Halftone motifs only after a printability check. We require a proof of the colours provided for multicoloured halftone motifs.

Colours

Depending on the material and product, colours may deviate.

With foils, boxes, dispensers etc. we work with transparent inks. Transparent inks are not opaque and therefore often do not achieve the desired colour on a non-white surface. In this case, we would recommend a white background which is charged as an additional print colour. **To avoid colour complaints, please send us a proof.**

Shelf life

The best before date specified can only be guaranteed if the product is stored correctly. In addition to taking the product-specific properties into consideration, please ensure you store the product in a dry place away from sunlight. Avoid changes in temperature particularly with products containing chocolate as this can result in a white film developing on the chocolate.

Delivery times

The approximate delivery times specified each depend on the approval of the printing copies, shape, colour(s) and sample(s). Delivery times may be longer in periods of very high demand, e.g. in the run-up to Christmas.

Manufacturer's notification on products

In accordance with EU directive 178/2002 for the improvement of food safety, we will be attaching a manufacturer's notification to our products. The end customer, dealer or agency can decide whether he himself as issuer should be specified on the product packaging or new packaging or whether the manufacturer should be named. Alternatively, a neutral manufacturer's notification can be used. If we are not provided with a manufacturer's notification, we will use the neutral manufacturer's "sweetvertising". If the end customer explicitly rejects all these specifications, the manufacturer must be released from all claims in writing.

Order quantities

Divergence of quantities up to $\pm 10\%$ is possible for technical reasons.

Distribution list

If the products are to be sent to different shipping addresses, please send us the address data as an EXCEL file. One address component per column (e.g. name/street/post code). Just ask for our template. Bills of delivery in triplicate. Depending on the work involved, additional costs may be incurred.

Information on creating printing copies

Make sure you supply us with print data 1:1 otherwise data processing costs are incurred.

Please note:

• **We do not process PDF files. Any faults would only be visible on the printed product which could mean additional expense and longer delivery times. We would therefore ask you to send us only "open" files.**

• Line drawings should have an optimum resolution of 1.200 dpi or should be vectorised; continuous-tone illustrations should have a resolution of 300 dpi.

• If data is sent by e-mail, please add the appropriate program extension (e.g. .qxd for QuarkXPress, .fh for FreeHand, .cdr for CorelDraw).

Our programs

Apple Macintosh:

- FreeHand MX
- Adobe Illustrator CS4
- PhotoShop CS4
- InDesign CS4
- QuarkXPress 7.2

Windows:

- FreeHand MX
- Adobe Illustrator CS4
- PhotoShop CS4
- InDesign CS4
- QuarkXPress 7.2
- Corel Draw X4*

Please make sure you also save any imported/embedded files (e.g. tiff, eps, bmp or jpg files), should there be any included in your document. Please change the font characters into paths to avoid the loading of other font characters. If this is not possible, send us the fonts too (only Macintosh fonts).

*Please store data as an "ai-file" in Illustrator versions 6.0 or 7.0 because we use Apple Macintosh. Due to technical reasons please use Pantone colours or CMYK (independent from your printing colours). Please change the font characters into paths to avoid the loading of other font characters. Loading of external fonts is not possible.

Data carriers (if you want to send your data by post)

- Please write your address, file name, logo and product name on the data carrier (e.g. CDs) and include a printout of the files.
 - The printout should be marked with the file name and the name of the print colour(s) (e.g. HKS, Pantone).
 - Designs based on the 4-c process require a binding colour original.
-

Always focussing on good taste!
