EANCOM® 2002 S3

OSTRPT

Order status report message

1. Introduction

Status

MESSAGE TYPE   : OSTRPT

REFERENCE DIRECTORY   : D.01B

EANCOM® SUBSET VERSION   : 004

Definition

A message by means of which a seller or seller's agent reports status information on an order. This message may be sent as a reply to an order status enquiry sent by a buyer or buyer's agent or a report sent at regular intervals as agreed by the parties.

Principles

The message may relate to:

- one enquiry;

- one or more orders (ORDERS), cargo/goods handling and movement (HANMOV), or instruction to despatch (INSDES) messages.

- one or more products on one or more orders.

The status can not trigger any action by the receiver of the message. For example, if the status is "ready for shipment", it can not be used to transmit despatch advice information. In this instance a DESADV message must also be sent.

The message can not be used to change anything except the status as previously reported. If information specific to the order, e.g. quantity ordered, is to be changed then in this instance an ORDRSP message must be sent.

The message may also be used to report on the status of a previously sent Cargo/Goods Handling and Movement message (HANMOV) by a logistics service provider acting on behalf of a supplier or buyer, and/or to report on the status of a previously sent Instruction to Despatch message (INSDES) exchanged between two trading partners.

4. Segments Description

Order Status Report Heading Section

UNH - M 1   - Message header

> This segment is used to head, identify and specify a message.

BGM - M 1   - Beginning of message

> This segment is used to indicate the type and function of a message and to transmit the identifying number.

DTM - M 5   - Date/time/period

> This segment is used to specify the date of the order status report message.

RFF - C 1   - Reference

> This segment is used to identify the order status enquiry message which is being responded to.

FTX - C 99   - Free text

> This segment is used to provide free form or coded text information which applies to the complete order status report message.

SG1 - M 99   - **NAD-SG2**

> A group of segments identifying the parties with associated information.

NAD - M 1   - Name and address

> This segment is used to identify the parties involved in the order status report message. Identification of the buyer, or buyer's agent, and the supplier, or supplier's agent, is mandatory in the order status report message. A logistic service provider may act as an agent of a buyer or a supplier.

SG2 - C 5   - **CTA-COM**

> A group of segments giving contact details of the specific person or department within the party identified in the NAD segment.

CTA - M 1   - Contact information

> This segment is used to identify a contact department and/or person within the party specified in the NAD.

COM - C 5   - Communication contact

> This segment is used to identify the communications number and the type of communications used for the department or person identified in the CTA segment.

Order Status Report Detail Section

SG3 - M 999   - **DOC-DTM-SG4-SG6**

> A group of segments providing details of the individual order(s).

DOC - M 1   - Document/message details

> This segment is used to identify the document(s) for which status information is being provided.

DTM - C 5   - Date/time/period

> This segment is used to specify dates relating to the references given in the previous DOC segment.

SG4 - C 99   - **STS-DTM-PCD-SG5**

> A group of segments providing status details related to the individual order.

STS - M 1   - Status

> This segment is used to provide status information related to the currently referenced document.

DTM - C 5   - Date/time/period

> This segment is used to specify dates relating to the current status.

4. Segments Description

PCD - C 1   - Percentage details

    This segment is used to specify percentage complete figures related to the current order being reported upon.

SG5 - C 99   - **NAD**

    This segment group is used to specify name and address, and location information related to the current status.

NAD - M 1   - Name and address

    This segment is used to identify any parties related to the current status being reported.

SG6 - C 999999   - **LIN-PIA-IMD-SG7-SG8-SG16**

    A group of segments providing details of the individual order(s) lines being reported.

LIN - M 1   - Line item

    This segment is used to identify a product on an order for which status information is being provided.

PIA - C 99   - Additional product id

    This segment is used to specify additional or substitutional item identification codes such as a buyer's or supplier's item number.

IMD - C 99   - Item description

    This segment is used to describe the current line item.

SG7 - C 999   - **RFF-DTM**

    A group of segments giving references related to the order line(s) and, where relevant, their dates.

RFF - M 1   - Reference

    This segment is used to provide any references related to the current line item.

DTM - C 1   - Date/time/period

    This segment is used to specify dates relating to the references given in the previous RFF segment.

SG8 - C 99   - **STS-DTM-PCD-QTY-SG9**

    A group of segments providing status details and related information for a line item.

STS - M 1   - Status

    This segment is used to provide status information related to the current line item.

DTM - C 5   - Date/time/period

    This segment is used to specify dates relating to the current status.

PCD - C 1   - Percentage details

    This segment is used to specify percentage complete figures related to the status of the current line item.

QTY - C 1   - Quantity

    This segment is used to specify quantities related to the current status.

SG9 - C 99   - **NAD**

    A group of segments identifying the parties with associated information, relevant to the line item only.

NAD - M 1   - Name and address

    This segment is used to identify any parties related to the status being provided.

SG16 - C 99   - **SCC-SG17**

    A group of segments specifying the delivery schedules and related locations, quantities and dates/times of a specific delivery.

4. Segments Description

SCC - M 1   - Scheduling conditions

> This segment is used to indicate any delivery schedules for the current line item. As the SCC segment (SG16) is the trigger of the following segment group, its use is mandatory, if one of the following segments (SG17) shall be used.

SG17 - C 99   - **LOC-DTM-QTY**

> A group of segments providing quantity details and related dates/times of a specific delivery.

LOC - M 1   - Place/location identification

> This segment is used to identify locations related to the quantity specified in the QTY segment. As the LOC segment is the trigger of this segment group, its use is mandatory, if one of the following segments shall be used.

DTM - C 5   - Date/time/period

> This segment is used to specify any dates and or times related to the segment group.

QTY - C 1   - Quantity

> This segment is used to specify quantities related to the current location.

Order Status Report Summary Section

UNT - M 1   - Message trailer

> This segment is a mandatory UN/EDIFACT segment. It must always be the last segment in the message.

5. Segments Layout

This section describes each segment used in the EANCOM® Order status report message. The original EDIFACT segment layout is listed. The appropriate comments relevant to the EANCOM® subset are indicated.

Notes:

1. The segments are presented in the sequence in which they appear in the message. The segment or segment group tag is followed by the (M)andatory / (C)onditional indicator, the maximum number of occurrences and the segment description.

2. Reading from left to right, in column one, the data element tags and descriptions are shown, followed by in the second column the EDIFACT status (M or C), the field format, and the picture of the data elements. These first pieces of information constitute the original EDIFACT segment layout.

    Following the EDIFACT information, EANCOM® specific information is provided in the third, fourth, and fifth columns. In the third column a status indicator for the use of (C)onditional EDIFACT data elements (see 2.1 through 2.3 below), in the fourth column the restricted indicator (see point 3 on the following page), and the fifth column notes and code values used for specific data elements in the message.

2.1 (M)andatory data elements in EDIFACT segments retain their status in EANCOM®.

2.2 Additionally, there are five types of status for data elements with a (C)onditional EDIFACT status, whether for simple, component or composite data elements. These are listed below and can be identified when relevant by the following abbreviations:

- REQUIRED   **R**   Indicates that the entity is required and must be sent.

- ADVISED   **A**   Indicates that the entity is advised or recommended.

- DEPENDENT   **D**   Indicates that the entity must be sent in certain conditions, as defined by the relevant explanatory note.

- OPTIONAL   **O**   Indicates that the entity is optional and may be sent at the discretion of the user.

- NOT USED   **N**   Indicates that the entity is not used and should be omitted.

2.3 If a composite is flagged as **N, NOT USED**, all data elements within that composite will have blank status indicators assigned to them.

3. Status indicators detailed in the fourth column which directly relate to the code values detailed in the fifth **column** may have two values:

- RESTRICTED   *****   A data element marked with an asterisk (*) in the fourth column indicates that the listed codes in column five are the only codes available for use with this data element, in this segment, in this message.

- OPEN   All data elements where coded representation of data is possible and a restricted set of code values is not indicated are open (no asterisk in fourth column). The available codes are listed in the EANCOM® Data Elements and Code Sets Directory. Code values may be given as examples or there may be a note on the format or type of code to be used.

4. Different colours are used for the code values in the segment details: restricted codes are in red and open codes in blue.

5. Segments Layout

Segment number: 1

UNH	- M	1 - Message header

Function:

To head, identify and specify a message.

		EDIFACT	EAN	*	Description
0062	Message reference number	M an..14	M		Senders unique message reference. Sequence number of messages in the interchange. DE 0062 in UNT will have the same value. Generated by the sender.
S009	MESSAGE IDENTIFIER	M	M		
0065	Message type	M an..6	M	*	OSTRPT = Order status report message
0052	Message version number	M an..3	M	*	D = Draft version/UN/EDIFACT Directory
0054	Message release number	M an..3	M	*	01B = Release 2001 - B
0051	Controlling agency	M an..2	M	*	UN = UN/CEFACT
0057	Association assigned code	C an..6	R	*	EAN004 = EAN version control number (EAN Code) Indicates that the message is the EANCOM version 004 of the Order Status Report message.
0068	Common access reference	C an..35	N		
S010	STATUS OF THE TRANSFER	C	N		
0070	Sequence of transfers	M n..2			
0073	First and last transfer	C a1			

Segment Notes:

This segment is used to head, identify and specify a message.
DE's 0065, 0052, and 0054: Indicate that the message is a UNSM Order Status Report message based on the D.01B directory.

Example:
UNH+1+OSTRPT:D:01B:UN:EAN004'

5. Segments Layout

Segment number: 2

BGM	- M	1 - Beginning of message				
Function:						
To indicate the type and function of a message and to transmit the identifying number.						
		EDIFACT	EAN	*	Description	
C002	DOCUMENT/MESSAGE NAME	C	R			
1001	Document name code	C an..3	R	*	348 = Order status report	
1131	Code list identification code	C an..17	N			
3055	Code list responsible agency code	C an..3	N			
1000	Document name	C an..35	O			
C106	DOCUMENT/MESSAGE IDENTIFICATION	C	R			
1004	Document identifier	C an..35	R		Order status report number assigned by document sender. It is recommended that the length of the document number be restricted to a maximum of 17 characters.	
1056	Version identifier	C an..9	N			
1060	Revision identifier	C an..6	N			
1225	Message function code	C an..3	R	*	9 = Original	
4343	Response type code	C an..3	N			
Segment Notes:						
This segment is used to indicate the type and function of a message and to transmit the identifying number. Example: BGM+348+PS841+9'						

5. Segments Layout

Segment number: 3

DTM	- M	5 - Date/time/period				

Function:

To specify date, and/or time, or period.

		EDIFACT	EAN	*	Description	
C507	DATE/TIME/PERIOD	M	**M**			
2005	Date or time or period function code qualifier	M an..3	**M**	*	137 = Document/message date/time	
2380	Date or time or period value	C an..35	**R**			
2379	Date or time or period format code	C an..3	**R**		102 = CCYYMMDD 203 = CCYYMMDDHHMM	

Segment Notes:

This segment is used to specify the date of the order status report message.
DE 2005: Identification of the 'Document/message date/time' (code value 137) is mandatory in an EANCOM message.

Example:
DTM+137:20021008:102'

5. Segments Layout

Segment number: 4

RFF	- C	1 - Reference				
Function:						
To specify a reference.						
		EDIFACT	EAN	*	Description	
C506	REFERENCE	M	**M**			
1153	Reference code qualifier	M an..3	**M**	*	OSE = Order status enquiry (EAN Code) SDR = Split delivery reference number (EAN Code) ASI = Proof of delivery reference number HN = Handling and movement reference number (EAN Code) IDR = Instruction to despatch reference number (EAN Code)	
1154	Reference identifier	C an..70	**R**			
1156	Document line identifier	C an..6	**N**			
4000	Reference version identifier	C an..35	**N**			
1060	Revision identifier	C an..6	**N**			
Segment Notes:						
This segment is used to identify the order status enquiry message which is being responded to. Example: RFF+OSE:12844'						

5. Segments Layout

Segment number: 5

FTX	- C	99 - Free text				
Function:						
To provide free form or coded text information.						
			EDIFACT	EAN	*	Description
4451	Text subject code qualifier		M an..3	**M**		AAI = General information ZZZ = Mutually defined
4453	Free text function code		C an..3	**O**	*	1 = Text for subsequent use
C107	TEXT REFERENCE		C	**D**		This composite is only used when trading partners have agreed to use mutually defined code values.
4441	Free text value code		M an..17	**M**		001 = Reference to standard text between trading partners.
1131	Code list identification code		C an..17	**O**		
3055	Code list responsible agency code		C an..3	**D**		91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent
C108	TEXT LITERAL		C	**D**		This data element is only used when non coded free text has been provided in data element C108.
4440	Free text value		M an..512	**M**		
4440	Free text value		C an..512	**O**		
4440	Free text value		C an..512	**O**		
4440	Free text value		C an..512	**O**		
4440	Free text value		C an..512	**O**		
3453	Language name code		C an..3	**O**		ISO 639 two alpha code
4447	Free text format code		C an..3	**N**		

Segment Notes:

This segment is used to provide free form or coded text information which applies to the complete order status report message.
Use of this segment in free form is not recommended since in most cases it inhibits automatic processing of the order status report message.
Coded references to standard texts is an available functionality which enables automatic processing and reduces transmission and processing overheads. Standard texts should be mutually defined among trading partners and can be used to cover legal and other requirements.

Example:
FTX+AAI++001::91'

5. Segments Layout

Segment number: 6

SG1	- M	99 - NAD-SG2
NAD	- M	1 - Name and address

Function:

To specify the name/address and their related function, either by C082 only and/or unstructured by C058 or structured by C080 thru 3207.

		EDIFACT	EAN	*	Description
3035	Party function code qualifier	M an..3	M		AB = Buyer's agent/representative BY = Buyer DP = Delivery party LSP = Logistic Service Provider (EAN Code) SR = Supplier's agent/representative SU = Supplier

5. Segments Layout

Segment number: 6

		EDIFACT	EAN	*	Description
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**O**		
3228	Country sub-entity name	C an..70	**O**		County/State, clear text.
3251	Postal identification code	C an..17	**D**		Postal Code
3207	Country name code	C an..3	**D**		ISO 3166 two alpha code

Segment Notes:

This segment is used to identify the parties involved in the order status report message. Identification of the buyer, or buyer's agent, and the supplier, or supplier's agent, is mandatory in the order status report message. A logistic service provider may act as an agent of a buyer or a supplier.

Example:
NAD+BY+5412345123453::9'
NAD+SU+5411111123451::9'

Dependency Notes:
The following composites and data elements are only used when a coded name and address can not be used.
The affected composites and data elements are as follows:
C080 - C059 - 3164 - C819 - 3251 - 3207

5. Segments Layout

Segment number: 7

SG1	- M	99 - NAD-SG2
SG2	- C	5 - CTA-COM
CTA	- M	1 - Contact information

Function:

To identify a person or a department to whom communication should be directed.

		EDIFACT	EAN	*	Description
3139	Contact function code	C an..3	R		IC = Information contact
C056	DEPARTMENT OR EMPLOYEE DETAILS	C	O		
3413	Department or employee name code	C an..17	O		
3412	Department or employee name	C an..35	O		

Segment Notes:

This segment is used to identify a contact department and/or person within the party specified in the NAD.
The Global Location Number GLN is particularly suitable for this purpose.

Example:
CTA+IC+:MARK CARTER'

5. Segments Layout

Segment number: 8

SG1	- M	99 - NAD-SG2
SG2	- C	5 - CTA-COM
COM	- C	5 - Communication contact

Function:

To identify a communication number of a department or a person to whom communication should be directed.

		EDIFACT	EAN	*	Description
C076	COMMUNICATION CONTACT	M	**M**		
3148	Communication address identifier	M an..512	**M**		
3155	Communication address code qualifier	M an..3	**M**		EI = EDI EM = Electronic mail FX = Fax TE = Telephone TL = Telex

Segment Notes:

This segment is used to identify the communications number and the type of communications used for the department or person identified in the CTA segment.

Example:
COM+003222271020:TE'

5. Segments Layout

Segment number: 9

SG3	- M	999 - DOC-DTM-SG4-SG6
DOC	- M	1 - Document/message details

Function:

To identify documents and details directly related to it.

		EDIFACT	EAN	*	Description
C002	DOCUMENT/MESSAGE NAME	M	**M**		
1001	Document name code	C an..3	**R**		220 = Order
					221 = Blanket order
					226 = Call off order
					351 = Despatch advice
					297 = Instruction to collect
					240 = Delivery instructions
					350 = Despatch order
					90E = Cargo/goods handling and movement message (EAN Code)
1131	Code list identification code	C an..17	**O**

1004	Document identifier	C an..35	**R**		
1373	Document status code	C an..3	**N**		
1366	Document source description	C an..70	**N**		
3453	Language name code	C an..3	**N**		
1056	Version identifier	C an..9	**N**		
1060	Revision identifier	C an..6	**N**		
3153	Communication medium type code	C an..3	**N**		
1220	Document copies required quantity	C n..2	**N**		
1218	Document originals required quantity	C n..2	**N**		

Segment Notes:

This segment is used to identify the document(s) for which status information is being provided.

Example:
DOC+220+OR877-22'

5. Segments Layout

Segment number: 10

SG3	- M	999 - DOC-DTM-SG4-SG6
DTM	- C	5 - Date/time/period

Function:

To specify date, and/or time, or period.

		EDIFACT	EAN	*	Description
C507	DATE/TIME/PERIOD	M	**M**		
2005	Date or time or period function code qualifier	M an..3	**M**	*	9 = Processing date/time 11 = Despatch date and/or time 67 = Delivery date/time, current schedule 137 = Document/message date/time 154 = Acceptance date of document 178 = Arrival date/time, actual Code 9 is used to indicate the date on which an order, for which status information is being provided, has been processed. Code 154 is used to indicate the date on which the order was officially accepted by the supplier of the product or service.
2380	Date or time or period value	C an..35	**R**		
2379	Date or time or period format code	C an..3	**R**		102 = CCYYMMDD 203 = CCYYMMDDHHMM

Segment Notes:

This segment is used to specify dates relating to the references given in the previous DOC segment.

Example:
DTM+9:20020304:102'
The currently referenced order was processed on the 4th of March 2002.

5. Segments Layout

Segment number: 11

SG3	- M	999 - DOC-DTM-SG4-SG6
SG4	- C	99 - STS-DTM-PCD-SG5
STS	- M	1 - Status

Function:

To specify the status of an object or service, including its category and the reason(s) for the status.

		EDIFACT	EAN	*	Description
C601	STATUS CATEGORY	C	O		
9015	Status category code	M an..3	M		UP2 = Order (EAN Code) UP3 = Cash on delivery order (EAN Code) UP4 = Urgent order (EAN Code) UP5 = Previous call off order (EAN Code)

Segment Notes:

This segment is used to identify any parties related to the current status being reported.

Example:
NAD+CA+5422331123459::9'

Dependency Notes:
The following composites and data elements are only used when a coded name and address can not be used.
The affected composites and data elements are as follows:
C080 - C059 - 3164 - C819 - 3251 - 3207

5. Segments Layout

Segment number: 15

SG3	- M	999 - DOC-DTM-SG4-SG6
SG6	- C	999999 - LIN-PIA-IMD-SG7-SG8-SG16
LIN	- M	1 - Line item

Function:

To identify a line item and configuration.

		EDIFACT	EAN	*	Description
1082	Line item identifier	C an..6	O		Application generated number of the item lines within the order status report message.
1229	Action request/notification description code	C an..3	N		
C212	ITEM NUMBER IDENTIFICATION	C	D		This composite is only used for the identification of EAN/UPC codes. If another coding structure is required, e.g. Harmonised system number, this composite will not be used and the code will be detailed in the PIA segment.
7140	Item identifier	C an..35	R		Format n..14. GTIN.
7143	Item type identification code	C an..3	R	*	SRV = EAN.UCC Global Trade Item Number
1131	Code list identification code	C an..17	N		
3055	Code list responsible agency code	C an..3	N		
C829	SUB-LINE INFORMATION	C	D		
5495	Sub-line indicator code	C an..3	R	*	1 = Sub-line information
1082	Line item identifier	C an..6	R		
1222	Configuration level number	C n..2	N		
7083	Configuration operation code	C an..3	N		

Segment Notes:

This segment is used to identify a product on an order for which status information is being provided.
If Global Trade Item Numbers are available it is mandatory to use GTIN within the LIN segment.

Example:
LIN+1++4000862141404:SRV'

Dependency Notes:
C829 is only used when sub-lines are required.
FOR A COMPLETE DESCRIPTION ON THE USAGE OF SUB-LINES PLEASE REFER TO PART I, SECTION 4.10.

5. Segments Layout

Segment number: 16

SG3	- M	999 - DOC-DTM-SG4-SG6
SG6	- C	999999 - LIN-PIA-IMD-SG7-SG8-SG16
PIA	- C	99 - Additional product id

Function:

To specify additional or substitutional item identification codes.

		EDIFACT	EAN	*	Description
4347	Product identifier code qualifier	M an..3	M	*	1 = Additional identification 3 = Substituted by 4 = Substituted for 5 = Product identification Product Id function coded has the following restricted coded functions: 1 - Additional Identification - To provide an additional identity for the product identified in the LIN segment. The additional identification can consist of : A supplemental identification which provides more information complementary to the main GTIN provided in the LIN segment, e.g. a harmonised system number, promotional variant number, product group number, etc. An alternative identification which may be used instead of the main GTIN provided in the LIN segment, e.g. a buyers article number, etc. 3 - This code value can only be used with code 297, 240 or 250 in DE 1001 in the DOC segment. 4 - This code value can only be used with code 297, 240 or 250 in DE 1001 in the DOC segment. 5 - Product Identification - To provide the primary product identification code when no GTIN has been provided in the LIN segment.
C212	ITEM NUMBER IDENTIFICATION	M	M		
7140	Item identifier	C an..35	R		
7143	Item type identification code	C an..3	R		HS = Harmonised system MF = Manufacturer's (producer's) article number PV = Promotional variant number SA = Supplier's article number SRV = EAN.UCC Global Trade Item Number
1131	Code list identification code	C an..17	O		
3055	Code list responsible agency code	C an..3	D		9 = EAN (International Article Numbering association)
C212	ITEM NUMBER IDENTIFICATION	C	O		
7140	Item identifier	C an..35	R		
7143	Item type identification code	C an..3	R		
1131	Code list identification code	C an..17	O		
3055	Code list responsible agency code	C an..3	D		
C212	ITEM NUMBER IDENTIFICATION	C	O		

5. Segments Layout

Segment number: 16

		EDIFACT	EAN	*	Description
7140	Item identifier	C an..35	**R**		
7143	Item type identification code	C an..3	**R**		
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**D**		
C212	ITEM NUMBER IDENTIFICATION	C	**O**		
7140	Item identifier	C an..35	**R**		
7143	Item type identification code	C an..3	**R**		
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**D**		
C212	ITEM NUMBER IDENTIFICATION	C	**O**		
7140	Item identifier	C an..35	**R**		
7143	Item type identification code	C an..3	**R**		
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**D**		

Segment Notes:

This segment is used to specify additional or substitutional item identification codes such as a buyer's or supplier's item number.

Example:
PIA+1+ABC5343:MF'
In this example the PIA segment is used to provide an additional identification to the GTIN provided in the LIN segment. The GTIN 4000862141404 provided in the LIN segment refers to the manufacturers article number ABC5343.

PIA+5+2209953C001L:AC'
This example details the HIBC code 2209953C001L which is provided as the primary product code because no GTIN was provided in the LIN segment.

6. Examples

Example 1

The following is an example of a Order Status Report message sent from a supplier identified by GLN 5411111123451 to a buyer identified by GLN 5412345123453. The order status report was generated on the 6th of January 2002 and has the identity number OR5252.

The message provides status information for four purchase orders which are currently outstanding.

Order number CD2544 dated the 31st of December 2001 was despatched urgent using the carrier identified by GLN 5422331123459 on the 2nd of January 2002.

Order number BH4155 dated the 24th of December 2001 was delivered to the delivery party identified by GLN 5412345111115 on the 28th of December 2001.

Order number AJ5223 dated the 2nd of December 2001 has been refused clearance by the customs.

Order number CO5473 dated the 27th of December 2001 has been cancelled by the customer.

6. Examples

Example 2

The following is an example of an Order Status Report message sent from a supplier identified by GLN 5411111123451 to a buyer identified by GLN 5412345123453. The order status enquiry was generated on the 15th of January 2002 and has the identity number OR6122. The message provides status information for two products which are contained on three separate orders.

The first line indicates that 500 units of the product identified by GTIN 4000862141404 were ordered on order number GF4144, order line number 12, dated the 31st of December 2001. On the 5th of January 2002 360 units were delivered leaving a backorder quantity of 140 which were despatched on the 14th of January 2002.

The second line on line number 32 of the same order reports that delivery of 90 units of the product identified by GTIN 5412345111184 has been delayed due to export restrictions. The third line details the product identified by GTIN 4000862141404, on line 1 of order number HA0014 dated the 2nd of January 2002. The status reported on this line is that the 40 units of the product ordered were delivered on the 4th of January 2002.
