

NAME: _____

SECTION: _____

In Problems 1 – 5, choose the figure that matches each label.

For right and straight angles, indicate the number of degrees in the angle.

1. The ray is figure _____.
2. The obtuse angle is figure _____.
3. The straight angle is figure _____.
4. The line segment is figure _____.
5. The acute angle is figure _____.
6. Find the supplement of a 84° angle.
7. Find the complement of a 12° angle.
8. Find the measure of each numbered angle in the figure.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

In Problems 9 – 14, find the perimeter and area of each figure.

9. _____

10. _____

11. _____

12. _____

13. _____

14. _____

15. A triangle has angles that measure 29° and 124° . What does the third angle measure?

15. _____

In Problems 16 – 22, use 3.14 as the approximate value for π if needed. Round your answers to the nearest tenth when necessary.

16. Find the radius.

16. _____

17. Find the circumference.

17. _____

In Problems 18 – 19, find the area of each figure.

18.

18. _____

19.

19. _____

In Problems 20 – 22, find the volume of each figure.

20.

20. _____

21.

21. _____

22. _____

In Problems 23 – 24, find the unknown length(s). Round your answer(s) to the nearest tenth when necessary. In Problem 24, assume that the triangles are similar.

23. _____

24. _____

25. In your own words, explain what congruent angles are. Give an example of two congruent angles. Make sure to label the angles and indicate their measures.

25. _____
