Share Information – 13 weeks (July 26 – October 24)

Why get your eggs and milk from Farmers & Artisans? Our farm fresh brown eggs, by the dozen or half dozen, come from free-to-roam pastured hens that are hormone and antibiotic free. You'll see and taste the difference.

The milk, in gallons and half gallons, and now quarts, comes from a herd of Jersey cows that again are pastured and not treated with any hormones or antibiotics. The whole milk is low-temp pasteurized and non-homogenized, preserving nutrition that is lost with ultra-pasteurization and homogenization. The low-fat milk will continue to be homogenized.
